The End(s) of Religion Eric Bain-Selbo, 2022-01-13 Eric Bain Selbo argues that the study of religion from philosophers to psychologists and historians of religion to sociologists has separated out the ends or goals of religion and thus created the conditions by which institutional religion is increasingly irrelevant in contemporary Western culture There is ample evidence that institutional religion is in trouble and little evidence that it will strengthen in the future giving some reason to believe that we are in the process of seeing the end of religion At the same time various cultural practices have met in the past and continue to meet today certain fundamental human needs needs that we might identify as religious that now are being fulfilled through what Bain Selbo calls the religion of culture The End s of Religion traces the way that the very study of religion has led to institutional religion being viewed as just one human institution that can address our particular religious needs rather than the sole institution to do so In turn ultimately we can begin to see how other institutions or forms of culture can function to serve these same needs or ends

Honoring the Ancestors Donald H. Matthews, 1998-07-02 Donald Matthews affirms once and for all the African foundation of African American religious practice His analysis of the methods employed by historians social scientists and literary critics in the study of African American religion and the Negro spiritual leads him to develop a methodology that encompasses contemporary scholarship without compromising the integrity of African American religion and culture Because the Negro spiritual is the earliest extant body of African American folk religious narration Matthews believes that it holds the key to understanding African American religion He explores the works of such seminal black scholars as W E B DuBois Melville Herskovits and Zora Neale Hurston tracing the early development of the African centered approach to the interpretation of African American religion This approach involves cultural structuralism the author s term for the method used by DuBois Herskovits and Hurston that emphasizes the thick reading of narrative expressions Such a reading allows the scholar to identify the cultural significance of particular oral and written texts and serves as a point of identification and a cultural link between African and African American religion Matthews close analysis of the spiritual employs a dialectical and postmodernist reading and reveals a religious philosophy that addresses the deepest concerns and desires of Africans in America These concerns are cultural political and psychological but are ultimately related to African religious structures of meaning This book poses a challenge to end the battle between Afrocentrists and multiculturalists by acknowledging their common intellectual heritage in the works of DuBois Herskovits and Hurston It will be of great interest to students and scholars of African American religion and culture and those interested in Afrocentric literature

Violence, Utopia and the Kingdom of God George Aichele, Tina Pippin, 2002-01-31 This controversial book explores the presence of the fantastic

in Biblical and related texts and the influence of Biblical traditions on contemporary fantasy writing cinema music and art The contributors apply a variety of critical concepts and methods from the field of fantasy studies including the theories of Tolkien Todorov Rosemary Jackson and Jack Zipes to Biblical texts and challenge theological suppositions regarding the texts which take refuge in science or historiography Violence Utopia and the Kingdom of God presents a provocative and arresting new analysis of Biblical texts which draws on the most recent critical approaches to provide a unique study of the Biblical narrative

The Theology and Philosophy of Eliade C. Olson,1992-07-21 The primary focus of this study is to view Eliade as not only a historian of religions but also as a theologian a philosopher novelist and as someone engaged in cross cultural dialogue with other religious traditions Besides attempting to view Eliade s work from a variety of perspectives this study contends that the scholarly work of Eliade cannot be separated from his own personal quest for meaning

Sacred Surrealism, Dissidence and International Avant-Garde Prose Vivienne Brough-Evans,2016-05-05 Vivienne Brough Evans proposes a compelling new way of reevaluating aspects of international surrealism by means of the category of *divin fou* and consequently deploys theories of sacred ecstasy as developed by the Collège de Sociologie 1937-39 as a critical tool in shedding new light on the literary oeuvre of non French writers who worked both within and against a surrealist framework The minor surrealist genre of prose literature is considered herein rather than surrealism s mainstay poetry with the intention of fracturing preconceptions regarding the medium of surrealist expression The aim is to explore whether International surrealism can begin to be more fully explained by an occluded strain of dissident surrealist thought that searches outside the self through the affects of ekstasis Bretonian surrealism is widely discussed in the field of surrealist studies and there is a need to consider what is left out of surrealist practice when analysed through this Bretonian lens The Collège de Sociologie and Georges Bataille s theories provide a model of such elements of dissident surrealism which is used to analyse surrealist or surrealist influenced prose by Alejo Carpentier Leonora Carrington and Gellu Naum respectively representing postcolonial feminist and Balkan locutions The Collège and Bataille s dissident surrealism diverges significantly from the concerns and approach towards the subject explored by surrealism Using the concept of ekstasis to organise Bataille s theoretical ideas of excess and inner experience and the Collège s thoughts on the sacred it is possible to propose a new way of reading types of International surrealist literature many of which do not come to the forefront of the surrealist literary oeuvre

Finding All Things in God Hans

Gustafson,2017-05-25 In *Finding All Things In God* Hans Gustafson proposes pansacramentalism as holding the potential to find the divine in all things and all things in the divine Such a proposition carries significant interreligious implications particularly in the practice of theology Presupposing theological practice as divorced from spirituality lived religious experience Gustafson presents pansacramentalism as a bridge between the two In so doing Gustafson offers a history of spirituality sketching the foundations of a classical approach to sacramentality through Aquinas as well as a contemporary approach to the same through Rahner and Chauvet Through three fascinating case studies this book presents particular instances of sacramentality in lived religious experience Gustafson offers an exciting method of doing theology one which is entirely compatible with the interdisciplinary field of interreligious studies

Transcendence and History Glenn Hughes,2003-05-01 Transcendence and History is an analysis of what philosopher Eric Voegelin described as the decisive problem of philosophy the dilemma of the discovery of transcendent meaning and the impact of this discovery on human self understanding The world s major religious and wisdom traditions are built upon the recognition of transcendent meaning and our own cultural and linguistic heritage has long since absorbed the postcosmological division of reality into the two dimensions of transcendence and immanence But the last three centuries in the West have seen a growing resistance to the idea of transcendent meaning contemporary and postmodern interpretations of the human situation both popular and intellectual indicate a widespread eclipse of confidence in the truth of transcendence In Transcendence and History Glenn Hughes contributes to the understanding of transcendent meaning and the problems associated with it assisting in the philosophical recovery of the legitimacy of the notion of transcendence Depending primarily on the treatments of transcendence found in the writings of twentieth century philosophers Eric Voegelin and Bernard Lonergan Hughes explores the historical discovery of transcendent meaning and then examines what it indicates about the structure of history Hughes s main focus however is on clarifying the problem of transcendence in relation to historical existence Addressing both layreaders and scholars Hughes applies the insights and analyses of Voegelin and Lonergan to considerable advantage Transcendence and History will be of particular value to those who have grappled with the notion of transcendence in the study of philosophy comparative religion political theory history philosophical anthropology and art or poetry By examining transcendent meaning as the key factor in the search for ultimate meaning from ancient societies to the present the book demonstrates how the decisive problem of philosophy both illuminates and presents a vital challenge to contemporary intellectual discourse

René Guénon and the Future of the West Robin Everard Waterfield,2002 The first English language biography of the well known traditionalist metaphysican Ren Gu non including a separate section assessing the impact of his work in the Western

world and an extensive annotated bibliography Rene Guenon and the Future of the West Robin Waterfield, 2005-03 Reni Guinon 1886 1951 is undoubtedly one of the luminaries of the twentieth century whose critique of the modern world has stood fast against the shifting sands of recent philosophies His oeuvre of 26 volumes is providential for the modern seeker pointing ceaselessly to the perennial wisdom found in past cultures ranging from the Shamanistic to the Indian and Chinese the Hellenic and Judaic the Christian and Islamic and including also Alchemy Hermeticism and other esoteric currents at the same time it directs the reader to the deepest level of religious praxis emphasizing the need for affiliation with a revealed tradition even while acknowledging the final identity of all spiritual paths as they approach the summit of spiritual realization This is the only biographical introduction to Guinon currently available in English Sophia Perennis will soon publish another biography *The Simple Life of Reni Guinon* written shortly after Guinon's death by his close friend and publisher Paul Chacornac After a lonely childhood often interrupted by ill health Guinon navigated the seductive half truths of occultism toward a deeper unified vision offering a way out from the confusion and fragmentation of our time Against the seemingly inexorable process of dissolution the twentieth century experienced Guinon pointed to the transcendent unity of all religious faiths and the abiding Truth that contains them all The Allure of Decadent Thinking Carl Olson, 2013-01-22 Carl Olson offers a compelling and provocative argument against the application of postmodern thought to Religious Studies showing how such radically skeptical thinking undermines subverts and distorts the study of religion **Philosophy, Religious Studies, and Myth** Robert A. Segal, 2014-07-16 Much of the theorizing about myth in philosophy and religious studies grows out of efforts to understand the classics and the Bible In the case of the classics the presence of myth has been taken for granted and conclusions reached about Greek and Roman mythology have spurred generalizations about myth In the case of the Bible however the existence of myth has been contested In fact Judaism and Christianity are regularly praised for their nonmythic outlook Conclusions reached about the presence or absence of myth in either the Hebrew Bible or the New Testament have led to generalizations about myth per se Many of the essays in this volume apply theories of myth to classical biblical and ancient Near Eastern cases but in so doing they draw conclusions about the nature of myth itself Those essays that criticize past applications make generalizations as well By no means has all theorizing about myth from philosophy and religious studies centered on the ancient world and this volume contains selections from theories in both disciplines that stem from reflections on the nature of science language knowledge and reality *Deep History, Secular Theory* Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987 The contents of this collected volume represent Martin's shift from comparative studies to socio political studies to scientific studies of religion and especially to the cognitive science of

religion He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university The twenty five contributions collected in this volume are selected from over one hundred essays articles and book chapters published over a long and industrious career and are representative of Martin s work over the past two decades Nuclear Madness Ira Chernus,1991-01-01 This book builds on Robert Jay Lifton s theory of psychic numbing and takes madness as a guiding metaphor It shows that public perceptions of the Bomb are a kaleidoscope of ever changing ideas and images Recent changes in public awareness only signal new symptoms of this public madness symptoms unwittingly fostered by the antinuclear movement Since the newest nuclear images follow the same psychological pattern as their predecessors they are likely to lead us deeper into nuclear madness Chernus offers new interpretations of four major theorists in the psychology of religion Paul Tillich R D Laing Mircea Eliade and James Hillman to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security The author develops an interpretation of Lifton s own thought as an ontological and religious psychology Drawing on the work of Eliade and Hillman he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation
