Charles Adams, 2016-12-01 Beginning sometime in the thirteenth century people from the Hopi Mesas established a cluster of villages to the south along the Little Colorado River They were attracted by the river's resources and the region's ideal conditions for growing cotton By the late 1300s these Homol'ovi villages were the center of a robust trade in cotton among many clusters of villages near or on the southern Colorado Plateau and were involved in the beginning of katsina religion among Hopi people Charles Adams has directed fifteen years of research at these sites for the Arizona State Museum including excavations in five of the seven primary Homol'ovi villages and in other villages predating them Through this

research he concludes that the founders of these settlements were Hopis who sought to protect their territory from migrating groups elsewhere in the Pueblo world This book summarizes that research and broadens our understanding of the relationship of Homol ovi to ancient and modern Hopi people Each Homol ovi village had a unique history of establishment growth sociopolitical organization length of occupation and abandonment and although the villages shared much in the way of material culture their size and configuration were tremendously varied By comparing Homol ovi research to information from projects on other settlements in the area Adams has been able to reconstruct a provocative history of the Homol ovi cluster that includes relationships among the individual villages and their relationships to nearby clusters He shows that social organization within villages is apparent by the number and variety of ritual structures while political organization among villages is indicated by the need for cooperation to share water for irrigation and by the exchange of such materials as pottery obsidian and ground stone Adams advances several important theories about why Homol ovi was founded where and when it was who its founders were and the importance of cotton in making Homol ovi an important center of trade in the 1300s He also considers why Pueblo settlements suddenly became so large addressing theoretical issues pertaining to multiple settlements and the rise of enormous villages containing more than 1 000 rooms Homol ovi is a rich work of synthesis and interpretation that will be important for anyone with an interest in Southwest archaeology Arizona history or Hopi culture By considering the settlement trajectory of an entire cluster of sites it will also prove valuable to archaeologists worldwide

Archeological Investigations at Antelope House Don P. Morris,1986 **The Colorado Plateau** Charles Van Riper,Kenneth L. Cole,2004-01-01 Stretching from the four corners of Arizona New Mexico Colorado and Utah the Colorado Plateau is a natural laboratory for a wide range of studies This volume presents 23 original articles drawn from more than 100 research projects presented at the Sixth Biennial Conference of Research on the Colorado Plateau This scientific gathering revolved around research inventory and monitoring of lands in the region The book s contents cover management techniques for cultural biological and physical resources representing collaborative efforts among federal university and private sector scientists and land managers Chapters on cultural concerns cover benchmarks of modern southwestern anthropological knowledge models of past human activity and impact of modern visitation at newly established national monuments challenges in implementing the 1964 Wilderness Act and opportunities for increased federal research on Native American lands The section on biological resources comprises sixteen chapters with coverage that ranges from mammalian biogeography to responses of elk at the urban wildland interface Additional biological studies include the effects of fire and grazing on vegetation research on bald eagles at Grand Canyon and tracking wild turkeys using radio collars and management of palentological resources Two final chapters on physical resources consider a proposed rerouting of the Rio de Flag River in urban Flagstaff Arizona and an examination of past climate patterns over the Plateau using stream flow records and tree ring data In light of similarities in habitat and climate across the Colorado Plateau techniques useful to
