Point Counterpoint Universal Grammar In The Second Language:

Point Counterpoint Lynn Eubank, 1991-01-01 *Point Counterpoint* offers a series of papers and replies originally presented at a special session of the Second Language Research Forum UCLA March 1989 The focus of the papers is primarily the role of Universal Grammar in second language acquisition though the agenda also includes discussion of other fundamental questions viz the explanatory potential of linguistic theory in native language development It may come as no surprise that the contributors and their respondents often present very different perspectives on the issues for most of the authors were known in advance to hold contrasting points of view Contributors c and Respondents r are Wolfgang Klein c Nina Hyams r Sascha Felix c Jacquelyn Schachter r Suzanne Flynn Lydia White c Robert Bley Vroman r Peter Jordens c Lynn Eubank r Jurgen Meisel c Bonnie Schwartz r Sharon Hilles c William O Grady r Daniel Finer c Margaret Thomas r Usha Lakshmanan c Nina Hymans Ken Safir r

Point Counterpoint Lynn Eubank, 1991 [Second Language Acquisition and Universal Grammar](#) Lydia White, 2003-03-06 This authoritative 2003 textbook provides an overview and analysis of current second language acquisition research conducted within the generative linguistic framework Lydia White argues that second language acquisition is constrained by principles and parameters of Universal Grammar The book focuses on characterizing and explaining the underlying linguistic competence of second language learners in terms of these constraints Theories as to the role of Universal Grammar and the extent of mother tongue influence are presented and discussed with particular consideration given to the nature of the interlanguage grammar at different points in development from the initial state to ultimate attainment Throughout the book hypotheses maintaining that second language grammars are constrained by universal principles are contrasted with claims that Universal Grammar is not implicated relevant empirical research is presented from both sides of the debate This textbook is essential reading for those studying second language acquisition from a linguistic perspective

The Generative Study of Second Language Acquisition Suzanne Flynn, Gita Martohardjono, Wayne O'Neil, 2014-01-14 The vast majority of work in theoretical linguistics from a generative perspective is based on first language acquisition and performance The vast majority of work on second language acquisition is carried out by scholars and educators working within approaches other than that of generative linguistics In this volume this gap is bridged as leading generative linguists apply their intellectual and disciplinary skills to issues in second language acquisition The results will be of interest to all those who study second language acquisition regardless of their theoretical perspective and all generative linguists regardless of the topics on which they work

Third Language Acquisition and Universal Grammar Yan-kit Ingrid Leung, 2009-01-01 This volume presents studies which approach the relatively new field of third language L3 acquisition from the generative linguistic perspective It aims to bring together researchers who are interested in L3 acquisition and who are at the same time working within the generative framework i e Chomsky's Universal Grammar UG approach to language acquisition A total of nine contributions are included reporting research on L3 involving different

combinations of source target languages and investigating various UG related properties *Paths of Development in L1 and L2 acquisition* Sharon Unsworth, Teresa Parodi, Antonella Sorace, Martha Young-Scholten, 2006-02-15 The main focus of generative language development research in recent decades has been the logical problem of language acquisition how learners go beyond the input to acquire complex linguistic knowledge This collection deals with the complementary issue of the developmental problem of language acquisition How do learners move from one developmental stage to another and how and why do grammars develop in a certain fashion Building on considerable previous research the authors address both general and specific issues related to paths of development These issues are tackled through considering studies of L1 and L2 children and L2 adults learning a range of languages including Dutch English French German Greek and Japanese

Language Acquisition Beyond Parameters Anahí Alba de la Fuente, Elena Valenzuela, Cristina Martínez Sanz, 2016-12-16 The chapters in this volume take different approaches to the exploration of language acquisition processes in various populations monolingual and bilingual first language acquisition L2 acquisition and address issues in syntax morphology pragmatics language processing and interface phenomena This volume is a tribute to Juana M Liceras fundamental and enduring contribution to the field of Spanish Second Language Acquisition SLA All the chapters in the volume are linked to or inspired by Juana s extensive body of work and like Juana s research they all stand at the crossroads of formal and experimental linguistics Together the studies presented in this volume are a reflection of Juana s impact both as a mentor and as a collaborative researcher while at the same time showcasing current trends and new directions in the field of generative SLA **The Acquisition of French in Different Contexts** Philippe Prévost, Johanne Paradis, 2004-01-01 This volume is a collection of studies by some of the foremost researchers of French acquisition in the generative framework It provides a unique perspective on cross learner comparative research in that each chapter examines the development of one component of the grammar functional categories across different contexts in French learners i e first language acquisition second language acquisition bilingual first language acquisition and specifically language impaired acquisition This permits readers to see how similar issues and morphosyntactic properties can be investigated in a range of various acquisition situations and in turn how each context can contribute to our general understanding of how these morphosyntactic properties are acquired in all learners of the same language This state of the art collection is enhanced by an introductory chapter that provides background on current formal generative theory as well as a summary and synthesis of the major trends emerging from the individual studies regarding the acquisition of different functional categories across different learner contexts in French *The Development of Prosodic Structure in Early Words* Mitsuhiro Ota, 2003-01-01 This monograph addresses three basic questions regarding the development of word internal prosodic structure How much of the phonological structure of early words is regulated by the same constituents and principles that govern the organization of prosodic structure of mature grammar Why do early words diverge from the adult targets in shape and size And what is

the best way to model developmental changes that occur in prosodic structure. Answers to these questions are explored through the longitudinal analysis of spontaneous production data from child Japanese. The analysis provides new types of evidence and new arguments that the prosodic phonology of young children is largely continuous with that of adults and that the surface child/adult divergence in word forms and the overall pattern of developmental changes are best explained in terms of ranked violable constraints on the representation of prosodic structure whose ordering is modified in the course of acquisition.

The Acquisition of the DP in Modern Greek Theodoros Marinis, 2003-01-01. This book offers new data on the acquisition of functional categories in early child speech. Based on longitudinal corpora of five children acquiring Modern Greek as their first language, it describes the development of single DPs consisting of definite and indefinite articles, complex DPs that require the use of multiple definite articles, possessive constructions, appositive constructions, and Determiner Spreading, a form of adjectival modification, and number and case marking in nouns and definite articles. Detailed quantitative and qualitative analyses show an incremental development of the DP. The findings address the debate concerning maturation versus continuity. Incremental acquisition of the DP argues in favour of a weak continuity approach to language acquisition. Whilst gradual acquisition of the DP remains unexplained within the Principles and Parameters Theory, it is fully compatible within Minimalism as it is argued to result from the gradual acquisition of the features associated with the Greek DP.
