Poisoned power : the case against nuclear power plants before and after Three Mile Island John William Gofman,1979

Poisoned Power John W. Gofman,Arthur R. Tamplin,1979 **Three Mile Island, Radioactive Waste Disposal**

Resulting from Mar.1979 Accident, Unit 2 ,1981 Energy Abstracts for Policy Analysis ,1982 **Decontamination of the Three Mile Island Unit 2 Reactor Building Atmosphere, Environmental Assessment** ,1980 **The Scientists Who Alerted Us To The Dangers of Radiation** Ian Fairlie,Cindy Folkers,24-03-29 This book remembers and

commemorates many brave radiation scientists most of whom are no longer with us These scientists published findings that radiation risks were more dangerous than officially accepted at the time However they often suffered as a result from official displeasure defamatory articles and public obloquy Scientific findings especially recently have revealed that these defamed and or disadvantaged scientists were actually correct in their assessments that official risk factors for radiation were too low and needed to be increased The lives of these scientists are discussed from early radiation pioneers including Ernest Rutherford Hermann Mueller and Linus Pauling to contemporary scientists such as Steve Wing *The Nuclear Power Debate* Jerry W. Mansfield,2019-03-28 Originally published in 1984 This annotated bibliography will serve as a starting point for information on the issue of nuclear power Arranged for easy use into three sections Pro Nuclear Anti Nuclear and Neutral the book cites over a hundred of the most important books on the subject offering for each full bibliographic data and a lengthy annotation that is balanced and informative This work which features author title and subject indexes is

simultaneously a collection building tool a guide for non specialist library patrons and an invaluable aid for research The Woman Who Knew Too Much, Revised Ed. Gayle Greene,2017-03-02 The life story of the epidemiologist who discovered the harmful effects of fetal X rays and other radiation exposure Why We Need Nuclear Power Michael H. Fox,2014-03-03

Nuclear power may just be the most important solution to our search for clean sustainable energy sources Although wind and solar can contribute to our energy mix we need a reliable source to meet large scale energy demands and break our dependence on fossil fuels However most people are wary if not downright afraid of nuclear power Given nuclear disasters such as Chernobyl and Fukushima it s not difficult to see why In the wake of these events fear has clouded the public s understanding of the facts It s time to clear up those misconceptions and examine the science behind nuclear power in order to determine what role it could and should play in our future In *Why We Need Power* The Environmental Case radiation biologist Michael H Fox argues that nuclear power is essential to slowing down the impact of global warming He examines the issue from every angle relying on thirty five years of research spent studying the biological effects of radiation Fox begins with the problem carefully laying out how our current energy uses and projections for the future will affect greenhouse gases and global warming The book then evaluates each major energy source and demonstrates the limits of renewable energy sources concluding that nuclear power is the best solution to our environmental crisis Fox then delves into nuclear power

looking at the effects of radiation the potential for nuclear accidents and the best methods to dispose of nuclear waste By systematically analyzing each aspect of the nuclear issue Fox clarifies which concerns have a scientific basis and which remain unsupported His in depth exploration of the facts persuasively demonstrates that nuclear power is critical to reducing the effects of energy production on the global climate Written in an engaging and accessible style Why We Need Nuclear Power is an invaluable resource for both general readers and scientists interested in the facts behind nuclear energy

Routledge Library Editions: Energy Resources Various, 2021-06-23 Reissuing works originally published between 1961 and 1990 this set of 12 books offers a selection of scholarship on the history of natural resources Many of the titles discuss the nuclear power debate from various angles while others look at coal or resources and energy in the third world
