Poland Economic Management For A New Era

Manfred Kremer, Marion Weber

Poland Economic Management For A New Era:

Poland, 1990 **Transforming Economic Systems: The Case of Poland** Manfred Kremer, Marion Weber, 2013-04-17

This book deals with the transformation of the Polish centrally planned system to a western type market system Poland represents the most interesting case to study as it runs an unprecedentedly radical and fast course of reform The book provides insights in the theoretical foundations of the transformation of an economic system as well as a critical assessment of first experiences in Poland As the authors develop theoretical approaches as well as study the empirical situation the book offers valuable insights both to the reader who is rather theoretically interested and to a pragmatically orientated audience One of the main features of the book is the broad variety of the subjects chosen for analysis and of the respective approaches taken by the authors who mostly specialize in the fields they worked on for this book Poland, 1990 **Economic**

Reforms in New Democracies Luiz Carlos Bresser Pereira, José María Maravall, Adam Przeworski, 1993-04-30 This assessment of the experiences of political transition in Southern Europe Latin America and Eastern Europe implies that the most successful reforms have been those resolved through democratic negotiation as opposed to the big bang approach

Economic Aspects of German Unification Paul J.J. Welfens, 2012-12-06 Paul J.J. Welfens The editor is pleased to present a second edition of *Economic Aspects of German Unification* which includes new chapters and several postscripts Almost five years after unification output in the ex GDR is back to its 1989 level Due to a massive intra German resource transfer consumption per capita in eastern Germany has not fallen as much as output and employment which reduced by one fifth within three years Given high West German transfers which represented about 5% of West German GDP and more than 50% of East German GDP the fall of industrial output could have been much stronger than had politically been feasible Hence structural change necessary for productivity growth was dramatic in the ex GDR where the goods producing sector manufacturing mining energy and construction strongly changed its proportions within four years construction almost doubled and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1 % Mining lost two thirds of its share in the producing sector which itself was reduced relative to GDP The share of the services industry increased by 5 percentage points between 1991 and 1994 but with a share of 27.7% in East Germany's GDP it was still about 9 percentage points lower than in western Germany By contrast government accounted for 20.9% of GDP in eastern Germany but for only 13.2% in western Germany **Stabilization and Privatization in Poland** K.

Poznanski, 2012-12-06 *Stabilization and Privatization* An Economic Evaluation of the Shock Therapy Program is the first comprehensive account of Poland's economic transition since mid 1989 Monetary stabilization trade liberalization including convertibility and privatization of state capital assets are discussed Sources of economic recession which have accompanied the post 1989 transition are analyzed The role of demand side factors i.e. monetary contraction is weighed against that of supply side factors i.e. credit availability The prevailing view is that the recession has been supply type rather than demand

type Economic performance has been impacted by the lack of a proper institutional framework e.g. a segmented banking sector diluted property rights Arguments in favor of evolutionary reforms and market enhancing measures are presented

Stabilization and Privatization examines the main components of Poland's shock therapy program implemented in 1990 Post shock recession lasting at least through 1992 is examined to establish whether a sharp decline in output was caused by excessive demand contraction or lack of accommodating credit policies The merits of an evolutionary approach and a more proactive state are debated *German Unification and the International Economy* Bernhard Heitger, Leonard Waverman, 2005-06-23 First published in 1993 Routledge is an imprint of Taylor Francis an informal company **Managing the Transition** Eric Rice, 1991 The consensus of dozens of Bank and outside experts on issues and measures essential to government reform in six Eastern European economies changing to a market economy and on how external agencies can best aid the reform process Comparative Public Administration Eric E. Otenyo, Nancy S. Lind, Lawrence R. Jones, 2006-07-24 Public administration scholars and practitioners are increasingly concerned with the need to broaden the field's scope beyond particularistic accounts of administration in given countries This title brings together seminal readings in comparative development public administration and contemporary public management scholarship *Market-oriented Systemic Transformations in Eastern Europe* Paul J.J. Welfens, 2012-12-06 Socialist economies in Eastern Europe have collapsed and embarked upon market oriented reforms The causes of the demise of centrally planned economies are analyzed and the basic challenges of systemic transformation discussed Negative income and wealth effects as well as distribution issues make adjustment extremely difficult The fundamental roles of privatization and foreign investment are addressed Foreign economic liberalization is considered to be of central importance for a growth oriented adjustment path in a stage of conflict prone policy and options Politico economic aspects of the new European developments in addition to North South issues are analyzed Difficult choices await decision makers in economic policy and the business community in Eastern Europe and in leading market economies
