Japanese aggression in China in the early 1930s and only ending with the triumph of the Chinese Communists in 1949 In The Oxford Illustrated History of World War Two a team of leading historians re assesses the conflict for a new generation exploring the course of the war not just in terms of the Allied response but also from the viewpoint of the Axis aggressor states Under Richard Overy s expert editorial guidance the contributions take us from the genesis of war through the action in the major theatres of conflict by land sea and air to assessments of fighting power and military and technical innovation the economics of total war the culture and propaganda of war and the experience of war and genocide for both combatants and civilians concluding with an account of the transition from World War to Cold War in the late 1940s Together they provide a stimulating and thought provoking new interpretation of one of the most terrible and fascinating episodes in world history
