Armaselu,Andreas Fickers,2023-12-31 Despite a variety of theoretical and practical undertakings there is no coherent understanding of the concept of scale in digital history and humanities and its potential is largely unexplored A clearer picture of the whole spectrum is needed from large to small distant to close global to local general to specific macro to micro and the in between levels The book addresses these issues and sketches out the territory of Zoomland at scale Four regions and sixteen chapters are conceptually and symbolically depicted through three perspectives bird s eye overhead and ground view The variable scale representation allows for exploratory paths covering areas such as theoretical and applicative reflections on scale combining a digital dimension with research in history media studies cultural heritage literature text analysis and map modelling creative use of scale in new digital forms of analysis data organisation interfaces and argumentative or artistic expressions Zoomland provides a systematic discussion on the epistemological dimensions hermeneutic methods empirical tools and aesthetic logic pertaining to scale and its innovative possibilities residing in humanities based approaches and digital technologies Enter the Zoomland game here or watch the teaser
