Policing The Inner City A Study Of Amste:

Policing the Inner City Maurice Punch,1979-06-17 *Legitimacy and Trust in Criminal Law, Policy and Justice* Nina Peršak,2016-04-22 Whereas previous studies of legitimacy and trust have mostly dealt with procedural justice and the police this book focuses on other crucial understudied aspects of legitimacy within criminal law policy and criminal justice The chapters expand and develop current criminological legal and socio legal research by addressing conceptions of legitimacy linked to criminal law norms criminalisation and sanctioning by examining EU legal and policy aspects of the phenomenon and by exploring some specific court related issues of legitimacy and trust hitherto neglected With contributions from across the EU this interdisciplinary collection presents a valuable discussion on the importance of trust in legal institutions of modern democracies and suggests ideas for future research in this area to challenge ways of thinking about legitimacy

Humour in Society George E Paton,Chris Powell,1988-04-18 *Cops Across Borders* Ethan A. Nadelmann,2010-11-01

Critical Perspectives on Police Leadership Claire Davis,Marisa Silvestri,2020-03-11 In a critical analysis of conventional understanding leading authors Claire Davis and Marisa Silvestri present bold new conceptualisations of police leadership Drawing on empirical research in criminology sociology and leadership studies they present a thoughtful critique of the nature and practice of leadership in contemporary policing The book Critically explores the identities of leaders and their positions within wider organisational structures and processes Provides a critique of contemporary reform to police professionalisation training and education equalities and diversity by situating these developments within wider historical social and political contexts Draws on critical theory to offer an alternative challenging and novel interpretation of police leaders as not simply the result of individual experiences and attitudes but of the social institutional and historical processes of policing and the cultures that exist within it Points towards future directions and a reimagining of leadership in the police Accessible and stimulating this is an essential text for policing students and valuable reading for current leaders and those interested in policing criminology and leadership Women, Policing, and Male Violence (Routledge Revivals) Jalna Hanmer,Jill Radford,Elizabeth Stanko,2013-10-14 First published in 1989 this book focuses on the policing of male violence against women It is an issue that has been criticised substantially in the past and the book shows how even police themselves have sometimes admitted that women have received inadequate treatment The book includes contributions from North America Australia and Western Europe and looks at different approaches that have been taken by states in intervening into the violence of men against women Chapters explore the differences and similarities of policing practices in western societies at the time surrounding the book s original publication **Policing and the Poetics of Everyday Life** Jonathan M. Wender,2008 A former police sergeant draws on philosophy literature and art to reveal the profound indeed poetic significance of police citizen encounters The Policing Web Jean-Paul Brodeur,2010-09-30 In this comprehensive study Jean Paul Brodeur examines the diversity of the policing web Policing agencies such as criminal investigation units

intelligence services private security companies and military policing organizations are examined in addition to public uniformed police to show the extent to which policing extends far beyond the confines of public police working in uniform and visible to all. The study also includes a consideration of military policing both when compatible with the values of democracy and when in opposition. It also examines criminal organizations enforcing their own rules in urban zones deserted by the police and criminal individuals acting as police informants since they too are part of the policing web even though they do not qualify as legitimate policing agents or agencies. The underlying argument of *The Policing Web* is that the diverse strands of the policing web are united by a common definition that emphasizes the licence granted to policing agencies to use either legally or with complete impunity means that are otherwise prohibited as crimes to the rest of the population. This claim is argued for throughout the book and its paradoxical consequences investigated. Although much effort is devoted to presenting a comprehensive model linking all the components of policing it is acknowledged that the policing web is by no means a neat and well integrated structure. Even the belief that it will develop into a tightly coordinated system is in itself questionable. Indeed the study shows that there is not just one policing web but several depending on the country police history and culture and the images of policing which shape the mind of the community. These often overlooked factors are nonetheless essential components of the context of policing and are discussed within an international framework.

Introducing Policework Mike Brogden, Tony Jefferson, Sandra Walklate, 2023-03-31 Originally published in 1988

Introducing Policework offered a new and concise overview of the controversial subject of policework at the time. The authors provide critical evaluations of the contributions made by psychologists, social psychologists, historians, sociologists and political scientists and an assessment of how these fit within an overall understanding of policework. Among the issues considered are the process of socialization that lead to a cop culture, the historical evolution of police working practices and their current impact upon the social divisions of age, gender, race and class, problems with the present system of accountability, the prospects for success of recent post Scarman initiatives such as community consultation. The achievement of this book is that it provides lively and consistent discussion of key issues in the consideration of policework, race and crime, the question of gender victimization and the new realism, police monitoring, Neighbourhood Watch and police training initiatives. Today it will provide an interesting look back at a critical evaluation of policework in the 1980s. [Taking Care of Business](#) Matthew Bacon, 2017-02-08 *Taking Care of Business* Police Detectives Drug Law Enforcement and Proactive Investigation offers a rich and insightful empirical study of drug investigations based on extensive fieldwork undertaken with the specialist detective units of two English police services. It fills a significant gap in criminological literature by providing a timely and thought provoking ethnography of detective culture, investigative practice and drug law enforcement. Drawing on data collected from over five hundred hours of direct observation of ordinary police work both on and off the streets, the chapters are skilfully interwoven with fieldnotes, informal conversations, interviews and analysis of official documents. Taken

together they explore how police officers perceive the drug world and their role in it translate policy from its written form into action and utilise intelligence led policing strategies to instigate covert operations and make cases There is in depth examination of the everyday realities of the war on drugs alongside the associated working rules tacit understandings and underlying assumptions that operate behind the public face of police organizations The book also critically examines the most pertinent legislative initiatives organizational reforms and shifts in thinking concerning the values objectives and norms of policing that have occurred over recent decades which between them have contributed to significant changes in the ways that detectives are trained and investigations are controlled and carried out With highly salient insights regarding operational policing and drug control policy in the current social economic and political climate Taking Care of Business is a compelling and important work on contemporary criminal investigation and the policing of drugs It will be of interest to scholars of criminology sociology law and policy studies especially those researching and studying policing regulation surveillance drug control policy and the informal economy as well as policymakers police practitioners and criminal justice professionals
