AIRCRAFT OF THE SECOND WORLD WAR Ruben Ygua,2025-08-19 **AVIATION IN THE SECOND WORLD WAR**

Aviation played a pivotal role in the WW2 Controlling the airspace was the first step in the direction of victory for the armies on the ground or the naval forces in all the war scenarios The effective action of German aviation allowed Hitler to successfully launch the Blitzkrieg the Lightning War with its armored divisions in Poland Norway Denmark and the surprising victory in the west over Belgium Holland and France On the other hand it was the aviation that allowed the British to reject the Luftwaffe avoiding the invasion of Great Britain Later aviation enabled the Allied landing on the beaches of Normandy with its full control of air space On the other side of the world without the intervention of air forces the Japanese could not have carried out their attack on Pearl Harbor and American aviation would be responsible for the greatest naval victories in the Pacific imposing the superiority of the aircraft carriers as the main weapon maritime and displacing forever the hegemony of the old battleships Finally the planes were responsible for the launch of the two atomic bombs that forced the Japanese to capitulate ending the war without the need for a single American soldier to land in enemy territory During the Second World War about 675 000 aircraft were used of which some 475 000 were from the Allied countries The conflict

marked the end of biplane aircraft and wooden and canvas aircraft to give rise to metal monoplanes In the same way the war definitively established the heavy strategic bombers and the airplane as an essential part of the Navy the night fighter equipped with radar and the jet plane emerged which revolutionized the world aviation Aviation enabled the air transport of millions of men and goods from one continent to another through the oceans in a massive and rapid manner With the use of nuclear weapons launched from a single plane with the power to annihilate entire cities aviation has changed the global strategy ending forever with the old concepts of front and rear of war transforming conventional forces into secondary actors and replacing the conquest with absolute nuclear destruction In the 2nd World War the Axis Powers Germany Italy Japan Romania Hungary Finland Slovakia Croatia Lithuania Estonia and Bulgaria they faced the allied countries France Great Britain and the countries of the Commonwealth United States Soviet Union China Norway Holland Belgium Greece Yugoslavia Poland and several Latin American countries with little participation of their limited air forces
