Political Economy Of Competitiveness In An Enlarged Europe:

The Political Economy of Competitiveness in an Enlarged Europe J. Pellegrin, 2016-10-18 Central and Eastern European countries are entering the development race at a crucial juncture in EU enlargement and the wider phenomenon of globalization In the face of hesitant and controversial EU policy these countries need to engage sound development strategies International production networks are expected to be decisive in helping them strengthen their competitiveness and establish knowledge based economies In this book Julie Pellegrin looks at whether and how production networks develop in Central and Eastern European countries and assesses their chances of catching up with the rest of Europe **The Global Political Economy of Trade Protectionism and Liberalization** Tony Heron, 2012 Examines the social political and economic impacts of trade paying attention to the textiles and clothing sector with respect to developing countries This book is suitable for those studying and researching international and comparative political economy developing area studies economics law and geography **Privatisation and Its Limits in Central and Eastern Europe** H. Engerer, 2001-06-18 Hella Engerer analyses the emergence evolution and theory of property rights and establishes the limits for privatization of state owned enterprises in the transitional economies of Eastern Europe She counters the assumption that reduction of the state sector helps to create the basis for a private property system showing that privatization actually presupposes a stable framework including property order She makes use of an outstanding methodological approach reaching well beyond the limits of pure economic observation This is a major contribution to the understanding of the emerging economic order of Central and Eastern Europe **Social Failures of EU Enlargement** Guglielmo Meardi, 2013-06-17 Is the EU enlargement the success EU institutions proclaim Based on fifteen years of fieldwork research across Central and Eastern Europe and on migrants in the UK and Germany this book provides a less glittering answer The EU has betrayed hopes of social cohesion social regulations have been forgotten multinationals use threats of relocations and workers left without institutional channels to voice their concerns have reacted by leaving their countries en masse Yet migration for many increases social vulnerability Drawing on Hirschman's concepts of Exit and Voice the book traces the origins of such failures in the management of EU enlargement as a pure economic and market creating exercise neglecting the inherently political nature of labour relations The reinforcement of market mechanisms without political counterbalances has resulted in an increase in opportunistic exit behaviour by both employers and employees and thereby in a worsening quality of democracy at workplace national and European levels As a result of this process the EU has become more similar to the North American Free Trade Agreement between USA Canada and Mexico where social rights are marginalized and economic integration does not translate into better development **The Political Economy of the European Constitution** Luigi Paganetto, 2017-11-30 The enlargement process the creation of the Monetary Union and the need to promote further the political and economic integration of Europe have ignited an intense debate at the European level among researchers and policy makers Examining

the effects that political legal and regulatory institutions have on economic development this book provides new contributions on the political economy of the European constitution It covers many issues including social protection fiscal reform and regional policies that are on the table of European policy makers Furthermore it provides ideas and analysis of such issues as the problem of voting reform the centralization and decentralization of the policy process and the allocation of new policy prerogatives at the EU level which are crucial for the design of a new European constitution **Critical**

Management Research in Eastern Europe M. Kelemen,M. Kostera,2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement **The Political Economy of European Union Competition Policy** Tuna

Baskoy,2008-06-24 In the European Union EU competition policy occupies a central place amongst other EU public policies and is the first truly supranational public policy regulating market competition One of the stated objectives of EU competition policy is to prevent excessive concentration of economic power in the hands of a few **Bibliographie Internationale de Science Politique** ,2002-12 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

Reforming the Financial Sector in Central European Countries S. Poloucek,2016-01-13 The analysis in this book reflects various aspects of financial sector transformation in selected Central European countries that are expected to join the EU in 2004 The authors are Central European financial experts who provide among other things a detailed overview of the following main topics Banking Regulation and Supervision Concentration and Efficiency of the Banking Sectors Financial banking crises in selected Central European countries and Monetary and Exchange Rate Development The results of the research done by these authors reflect an interesting fact that there exist important differences in the financial sector development even in the relatively homogeneous group of selected Central European countries namely the Czech Republic Poland Slovakia and Hungary **Divergent Paths in Post-Communist Transformation** O. Havrylyshyn,2006-02-20 The most comprehensive and up to date analysis of the successes and failures of 27 countries post communism transformation Looking at life after the fall of the Berlin wall in 1989 the book examines and contrasts why some countries have virtually completed their transformation to a liberal polity and economy while others lag behind
