Political Power And Social Theory Volume 11:

Political Power and Social Theory Diane E. Davis, Julian Go, 2009-12-21 It is time to consider changes in the field of comparative historical sociology as the discipline seeks to accommodate old and new trends as well as the transforming spatial scales in which political power and social theory are increasingly embedded This title showcases articles that pursue similar themes *Political Power and Social Theory* Julian Go, 2010-12-07 Helps in advancing our interdisciplinary critical understanding of the linkages between social relations political power and historical development This title contains a section on the politics of the new middle class in the global south and post socialist societies Classes Erik Olin Wright, 2023-04-18 Questions of class power and distribution have reemerged as central concerns in the public discourse When we talk about class we don't always know what is meant Is class about income or affect or the ownership of the means of production Perhaps it is about authority or autonomy But what happens when as is often the case in complex advanced economies people can occupy social and economic roles that seem to indicate membership in more than one class And what does this mean for the supposed relationship between class and potential political capacity and affinity In *Classes* Erik Olin Wright the greatest American Marxist sociologists rises to the twofold challenge of both clarifying the abstract structural account of class implicit in Marx and of applying and refining the account in the light of contemporary developments in advanced capitalist societies What Wright calls contradictory class locations can make the class landscape appear much more complex than the simple model presented in Marx Despite this complexity common interests and therefore political alliances can still be found In a society like the US characterized by extreme inequality *Classes* provides not just a useful descriptive account of the operation of class but also the tools to understand the interplay of class interests and political re alignment

Postcolonial Sociologies Julian Go, 2016-08-26 How can postcolonial thought be most fruitfully translated and incorporated into sociology This special volume brings together leading sociologists to offer some answers and examples The chapters offer new postcolonial readings of canonical thinkers like Karl Marx Max Weber Emile Durkheim and Robert Park

Decentering Social Theory Julian Go, 2013-08-22 Social theory and research has long faced the limitations of its conventional Eurocentric focus The essays in this volume offer new thoughts and empirical studies for transcending those limitations Power Relations in Black Lives Christa Buschendorf, 2017-11-15 According to relational sociology power imbalances are at the root of human conflicts and consequently shape the physical and symbolic struggles between interdependent groups or individuals This volume highlights the role of power relations in the African American experience by applying key concepts of Pierre Bourdieu and Norbert Elias to black literature and culture The authors offer new readings of power asymmetries as represented in works of canonical and contemporary black writers Richard Wright Ralph Ellison Gwendolyn Brooks Toni Morrison Percival Everett Colson Whitehead rap music e.g. Jay Z images of black homelessness and figurations of political activism civil rights activist Bayard Rustin BlackLivesMatter in Ferguson **Max Weber on Power**

and Social Stratification Catherine Brennan,2020-07-09 First published in 1997 this book revolves around a textual analysis of the Weberian thesis that classes status groups and parties are phenomena of the distribution of power within a community An internal reconstruction of Weber s own ideas on what is called social stratification in contemporary sociological discourse is undertaken The reason for this reconstruction inheres in the fact that Weber s thought especially in the field of social stratification has been modified and misappropriated to such an extent that Weber himself is usually lost in the commentaries Moreover this reconstruction is crucial because the secondary literature does not contain a single account teasing out the analytic structure underlying Weber s statements on the nature of social inequality in various societies It is the principal intention of the book then to retrieve the essential form and significance of Weber s ideas on social stratification

The Political Philosophy of Hannah Arendt Maurizio Passerin d'Entrèves,2002-01-04 First published in 1993 This is a systematic introduction to the thought of one of the most important political philosophers of the twentieth century The author uncovers the concepts of modernity action judgement and citizenship that underpin her work

Handbook of Classical Sociological Theory Seth Abrutyn,Omar Lizardo,2021-11-01 This is the first handbook focussing on classical social theory It offers extensive discussions of debates arguments and discussions in classical theory and how they have informed contemporary sociological theory The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions This book presents new approaches to thinking about theory in relationship to sociological methods

Class, Trauma, Identity Giorgos Bithymitris,2023-04-14 This book is a dialectic and multi perspective examination of classed traumas in late modernity The primary anchoring question is whether and how class becomes a condition of possibility for coping with traumas What does it mean to experience deindustrialization crises or domestic violence from a specific class position Do the coping mechanisms differ along the lines of class gender race age or ethnicity The text negotiates such questions travelling back and forth from psychoanalysis to sociology and from the global to the local while critically engaging with memories narratives and myths engraved into social and personal histories Through a dialogic quest for what is silenced and what is salient within oral written and visual testimonies it foregrounds what the upper classes prefer to neglect the traumatizing core of the new class divide Rather than idealizing or vilifying the dominated this study calls for an exploration of practices narrations and spaces whereby alienation and integration co exist antagonistically producing hybrid and fragmented but also potentially transformative subjectivities This book will be of interest to scholars of humanities and social sciences primarily for those studying social stratification and inequalities sociology of emotions identity theory trauma and memory political psychoanalysis labour history and ethnography
