The Law and Policy of Ecosystem Services J. B. Ruhl, Steven E. Kraft, Christopher L. Lant, 2013-03-19 The Law and Policy of Ecosystem Services is the first comprehensive exploration of the status and future of natural capital and ecosystem services in American law and policy The book develops a framework for thinking about ecosystem services across their ecologic geographic economic social and legal dimensions and evaluates the prospects of crafting a legal infrastructure that can help build an ecosystem service economy that is as robust as existing economies for manufactured goods natural resource commodities and human provided services The book examines the geographic ecological and economic context of ecosystem services and provides a baseline of the current status of ecosystem services in law and society It identifies shortcomings of current law and policy and the critical areas for improvement and forges an approach for the design of new law and policy for ecosystem services Included are a series of nine empirical case studies that explore the problems caused by society's failure to properly value natural capital Among the case study topics considered are water issues The Conservation Reserve Program the National Conservation Buffer Initiative the agricultural policy of the European Union wetland mitigation and pollution trading The Law and Policy of Ecosystem Services is a groundbreaking look at the question of whether and how law and policy can shape a sustainable system of

ecosystem service management It is an accessible and informative work for faculty students and policy makers concerned with ecology economics geography political science environmental studies law and related fields **The Political Economy of Evaluation** Jerker Carlsson,Gunnar Koehlin,Anders Ekbom,2016-07-27 Examines the economic impact of aid but not in the sense that it questions the relevance of this objective or tries to measure whether aid works or not The focus of this book is on the evaluation process itself Can aid evaluation be improved in order to increase the effectiveness of aid Resource Management, Sustainable Development and Governance Baleshwar Thakur,Rajiv R. Thakur,Srikumar Chattopadhyay,Rajesh K. Abhay,2022-01-01 This book examines the relationship between natural resource management sustainable development and governance with case studies from India and other places covering disaster risk reduction conflict resolution capacity building climate change adaptation and resilience citizen engagement and ecological conservation Though the studies focus mostly on cases in India the volume discusses how governance can be employed to help develop and implement sustainable practices globally through the lens of the United Nations Sustainable Development Goals SDGs framework Readers will learn how to integrate concepts of resource management sustainable development and governance to improve human resilience to global environmental change and to assess the proper development approaches to assist economically stressed and resource deprived individuals The book will be of use to graduate students and academics policy makers planners and nonprofits

Property And Politics In Sabah, Malaysia Amity A. Doolittle,2005 This very welcome book offers important insights into the logic of development in Malaysia as well as its impact on local struggles for land rights Amity Doolittle has written an exemplary work that utilizes ethnography political economy and historical analysis An impressive well written and well researched book American Anthropologist *Geoenvironment, An Introduction* U. Aswathanarayana,2018-12-19 The focus of this book is on the management of the geoenvironment It seeks to explain how through an understanding of the environmental processes that take place in rocks soils waters sediments air and so on the resources contained in them could be managed sustainably Topics covered in the book include Ecologically sustainable industrial development dynamics of the geoenvironment the impact of mining on rocks soils water and biota the natural radiation environment the use of geotechnology to mitigate the consequences of natural disasters and the disposal of various kinds of waste particularly hazardous waste The models proposed by the World Bank on how to make environmental amelioration economically viable are also looked at **Natural Resource Policymaking in Developing Countries** William Ascher,Robert G. Healy,1990 Drawing on case studies developed over a two year period 1987 1989 by Fellows in the Program in International Development Policy at Duke University including experienced representatives from developing countries the World Bank and scholars the authors integrate the growing interest in environmental protection and resource conservation into the existing body of knowledge about the political economy of developing countries This book is about the links that tie resource use environmental quality and economic development and the way in which those links are affected by the distribution of income

and resource ownership The links may be relatively simple as in the case of peasant farmers too poor to conserve resources for the future and with nothing to gain from sound environmental practices Or they may be very complex as the authors find when they demonstrate how achievement of higher incomes by the rich can increase environmentally destructive behavior by the poor Many of the links in some way involve rural land use whether for agriculture or forestry Natural Resource Policymaking in Developing Countries argues that the policies that matter are not merely those dealing with resources and the environment but a much broader set that includes income distribution and asset ownership Understanding Poverty and the Environment Fiona Nunan, 2015-03-27 Does poverty lead to environmental degradation Do degraded environments and natural resources lead to poverty Or are there other forces at play Is the relationship between poverty and the environment really as straightforward as the vicious circle portrayal of poverty leading to environmental destruction leading to more poverty would suggest Does it matter if the relationship is portrayed in this way This book suggests that it does matter Arguing that such a portrayal is unhelpful and misleading the book brings together a diverse range of analytical frameworks and approaches that can enable a much deeper investigation of the context and nature of poverty environment relationships Analytical frameworks and approaches examined in the book include political ecology a gendered lens Critical Institutionalism the Environmental Entitlements framework the Institutional Analysis and Development approach the Sustainable Livelihoods Framework wellbeing analysis social network analysis and frameworks for the analysis of the governance of natural resources Recommended further reading draws on published material from the last thirty years as well as key contemporary publications giving readers a steer towards essential texts and authors within each subject area Key themes running through the analytical frameworks and approaches are identified and examined including power access institutions and scale

Perspectives In Resource Management In Developing Countries (volume Iv: Land Appraisal And Development) Baleshwar Thakur, 2009 **A Dictionary of Human Geography** Alisdair Rogers, Noel Castree, Rob Kitchin, 2013-04-26 A Dictionary of Human Geography is a brand new addition to Oxford's Paperback Reference Series offering over 2 000 clear and concise entries on human geography terms From basic terms and concepts to biographical entries acronyms organisations and major periods and schools in the history of human geography it provides up to date accurate and accessible information It also includes entry level web links that are listed and regularly updated on a dedicated companion website This dictionary is a reliable reference for students of human geography and ancillary subjects for researchers and professionals in the field and for interested generalists Green Gold Adam S. Dohrenwend, 2021-10-04 This book applies an approach to study the externalization of cost under capitalism in the production of Argentine yerba mate an infusion with stimulant properties long used by indigenous peoples Consumption in today's globalized economy makes it difficult to understand the consequences of our actions across the globe A political ecological lens informed by the work of Robert Sack and Ian Cook can help guide an analysis that geographically reconstructs supply chains and reveal the realities

of consumption The use of yerba mate has become a cornerstone of Argentine society and identity and yerba mate processors are working to expand exports globally In Argentina s Misiones Province the heart of yerba mate production the true costs of production are borne by the children the impoverished laborers and the environment of Argentina s Atlantic Rainforest These consequences of modernity along with the efforts of an NGO to remedy them are presented and assessed

Contested Nature Steven R. Brechin, Peter R. Wilshusen, Crystal L. Fortwangler, Patrick C. West, 2012-02-01 How can the international conservation movement protect biological diversity while at the same time safeguarding the rights and fulfilling the needs of people particularly the poor Contested Nature argues that to be successful in the long term social justice and biological conservation must go hand in hand The protection of nature is a complex social enterprise and much more a process of politics and of human organization than ecology Although this political complexity is recognized by practitioners it rarely enters into the problem analyses that inform conservation policy Structured around conceptual chapters and supporting case studies that examine the politics of conservation in specific contexts the book shows that pursuing social justice enhances biodiversity conservation rather than diminishing it and that the fate of local peoples and that of conservation are completely intertwined

Global Thinking and Local Action Uwem Ite, 2018-02-06 This title was first published in 2001 Based on extensive local field research undertaken in and around the Cross River National Park in Nigeria this book provides a socio economic study of the tensions between agriculture and nature conservation Taking a bottom up approach and focussing on the farm household and the dynamics of forest farming at household level it brings together a wealth of new information on the subject of tropical forestry the causes and dynamics of tropical rain forest loss and the problematic relations between conservation authorities in National Parks and local people Its conclusions raise important questions about practical ways forward in the development of such areas

New Models In Geography Richard Peet, Nigel Thrift, 2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original Models in Geography was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis its own questions and debates The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies

Cultivating Peace Marty Branagan, Bert Jenkins, Helen Ware, 2014-04-11 Cultivating Peace Contexts Practices and Multidimensional Models moves away from negative connotations associated with the concept of post conflict peacebuilding It embraces a multiplicity of trans disciplinary approaches to peacebuilding mostly coinciding with the eco horticultural metaphor of peace cultivation Ultimately the idea of cultivating peace embodies love and compassion while utilising local knowledge expertise and wisdom to do no harm Using various case studies from across the world the narratives and insights in this book present diverse facets of peacebuilding yet all contribute constructive lessons The chapters cover three general themes Some examine the structural and discursive causes of violence and how to improve situations where violence is evident or to prevent it from breaking out Others deal with the aftermath of violence and how to reconcile and restore shattered lives and societies The third group deals with positive social change by nonviolent means which is much more constructive than the negative peace of ceasefires and peace enforcement used to manage direct violence Promoting the ideal of peace cultivation this volume emphasises ways to improve things to suggest alternatives and to employ initiatives to plant and grow positive changes both during the fighting and in the aftermath of violent conflicts

Community Climate Justice and Sustainable

Development Roy, Parimal Kumar, Hamidi, Mashitah Binti, Wahab, Haris Abd, 2025-03-26 Climate justice is a crucial issue particularly for Indigenous communities that are disproportionately affected by environmental changes despite contributing the least to global emissions Achieving sustainability and social justice requires an inclusive approach that considers diverse policies cultural perspectives and methodological interventions As globalization deepens interconnectivity addressing climate justice through equitable policies climate finance and community driven solutions becomes essential for ensuring a just and sustainable future Examining both policy gaps and actionable solutions can help create frameworks that protect vulnerable

populations while advancing global sustainability goals Community Climate Justice and Sustainable Development explores the intersection of climate justice Indigenous rights and sustainable development highlighting the policies and actions needed to achieve social and environmental equity By analyzing case studies policy frameworks and financial mechanisms it provides a comprehensive discussion on bridging the gap between climate commitments and real world impact Covering topics such as climate migrants tribal rights and indigenous knowledge this book is an excellent resource for social justice advocates environmentalists policymakers professionals researcher scholars academicians and more
