Population Policies Reconsidered:

Population Policies Reconsidered Gita Sen, Adrienne Germain, Lincoln C. Chen, 1994 *Population Policy Reconsidered* brings together a rare combination of scholars feminists social activists and policy makers across many disciplines to critically reexamine the scientific foundation of contemporary population policies This book explores population policy dilemmas based on the perspective of ethics women s empowerment and health and human rights The seventeen chapters are centered around the premise that the single minded pursuit of demographic goals may not be the most effective means of achieving policy objectives for such may lead to the abuse or violation of choice and human rights especially of women Rather the book explores the alternative idea that population policies should focus on those ultimate aims of development that are linked to human reproduction health social empowerment and human rights If respectful of individuals especially women such policies are likely to promote better individual welfare and may well also result in desirable demographic outcomes

Encyclopedia of Medical Anthropology Carol R. Ember, Melvin Ember, 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world s cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world

Economic Development Michael P. Todaro, Stephen C. Smith, 2006 This text maintains a problem and policy oriented approach to development economics It focuses on people and government in developing countries Redeveloping Communication for Social Change Karin Gwinn Wilkins, 2000 Proposes situating theory and practice within contexts of power recognizing both the ability of dominant groups to control and the potential for marginal communities to resist Contributors from communication and anthropology explore the global and institutional structures within which agencies construct social problems and interventions the discourse guiding the normative climate for conceiving and implementing projects and the practice of strategic interventions for social change Examines early and emerging models of development power dynamics ethnographic approaches gender issues and information technologies **Reproductive Health and Human Rights** Laura Reichenbach, Mindy Jane Roseman, 2011-11-29 *Reproductive Health and Human Rights The Way Forward* critically reflects on the past fifteen years of international efforts aimed at improving health alleviating poverty diminishing gender inequality and promoting human rights The volume includes essays by leading scholars and practitioners that are centered on the 1994 United Nations International Conference on Population and Development ICPD and its resulting Programme of Action ICPD

an agreement among 179 governments UN agencies and NGOs was intended to shape population and development policy reinterpreted and redefined as reproductive health More than a decade after the enthusiasm that accompanied ICPD there is growing concern about its effectiveness in the context of global health and development Reproductive Health and Human Rights addresses that concern The book grapples with fundamental questions about the relationships among population fertility decline reproductive health human rights poverty alleviation and development and assesses the various arguments demographic public health human rights based and economic for and against ICPD today A number of the chapters address institutional challenges to ICPD and consider how the changing political religious academic and disciplinary contexts matter Other chapters engage operational and conceptual issues and whether ICPD has been able to move the reproductive health agenda forward on topics such as maternal mortality abortion HIV AIDS adolescents reproductive technologies and demography Finally several chapters examine how ICPD has been sidelined by emerging health and development agendas and what could be done in response Unlike any book yet published Reproductive Health and Human Rights The Way Forward examines the state of the arguments for reproductive health and rights from a multidisciplinary perspective that provides policymakers scholars and activists with a better understanding of how reproductive health and rights have developed their place in the global policy agenda and how they might evolve most effectively in the future

The Cairo Consensus Saul E. Halfon, 2007-01-01 The Cairo Consensus explores population policy during the 1990s Starting from the question of how the transition from population control to women s empowerment was formulated as an international consensus Halfon maps the discourses technical practices and institutional practices that made this transition possible and stable

The Continuing Demographic Transition G. W. Jones, R. M. Douglas, J. C. Caldwell, R. M. D'Souza, 1998-01-29 From the perspective of human society one of the most significant occurrences of the twentieth century has been the demographic transition the movement from tragic and wastefully high death and birth rates to low rates in many countries Many other countries however are still at only the early or intermediate stages of this process In these countries means need to be found to accelerate the transition This book brings new evidence to bear on aspects of the demographic transition with contributions from leading demographers anthropologists sociologists and historians The book ranges widely over the history and current experience of both developed and developing countries with particular emphasis on Asia and Africa The new field of anthropological demography is strongly represented with contributions challenging much conventional wisdom

Feminist Theory Reader Carole Ruth McCann, Seung-Kyung Kim, 2003. Feminist Theory Reader is an anthology of classic and contemporary works of feminist theory organized around the goal of providing both local and global perspectives.

The Right to Know Sandra Coliver, 1995. This book documents the massive deprivation of human rights resulting from governmental censorship, manipulation, and control of reproductive health and sexuality information. The introductory chapter applies a human rights perspective to reproductive health to show that women must have full and impartial information to be able to choose services which further their goals rather than governmental policies. Examples of different types of state manipulation are provided, and demographic, biomedical, and reproductive health paradigms of contraceptive delivery programs are described. Chapter 2 identifies the binding obligations imposed on governments by the international principle that women have a right to appropriate reproductive health information. The third chapter provides a global overview of such topics as health expenditures, fertility rates, infertility, literacy, and education, infant and child mortality, maternal mortality, child spacing, contraceptive usage, unmet need, abortion, HIV/AIDS, and sexually transmitted diseases (STDs). Chapters 4-13 present country reports for Algeria, Brazil, Chile, Ireland, Kenya, Malawi, Pakistan, the Philippines, Poland, and the US. The country reports reveal the overwhelming need of women to have access to this information and the innumerable ways in which governments control such access. The country reports also describe factors such as religion, culture, tradition, state of development, and influence of foreign donors which have an impact on access to information. Each country report ends with specific recommendations, and the concluding chapter defines seven obligations of national governments imposed by the right to information contained in international law and contains recommendations of ways nongovernmental organizations can use these obligations to lobby governments for improvements.

A Companion to Bioethics Helga Kuhse, Peter Singer, 2013-04-16. This second edition of *A Companion to Bioethics* fully revised and updated to reflect the current issues and developments in the field, covers all the material that the reader needs to thoroughly grasp the ideas and debates involved in bioethics. Thematically organized around an unparalleled range of issues including discussion of the moral status of embryos and fetuses, new genetics, life and death, resource allocation, organ donations, AIDS, human and animal experimentation, health care, and teaching. Now includes new essays on currently controversial topics such as cloning and genetic enhancement. Topics are clearly and compellingly presented by internationally renowned bioethicists. A detailed index allows the reader to find terms and topics not listed in the titles of the essays themselves.

Population and Development Robert L. Cliquet, Kristiaan Thienpont, 2013-04-09. Since the onset of modernisation, the world population has doubled several times and will soon reach 6 billion of people. The annual rate of

increase in the world population is approximately 90 million people This is the largest absolute level of population growth ever recorded According to the most recent population projections of the United Nations the world population will probably double again before stabilising at a stationary level Ninety percent of the present and future population growth is accounted for by developing countries The fast increase in the size of the population in many developing countries is a serious obstacle to their attempts to overcome their backwardness make a substantial improvement to their quality of life and achieve a sustainable way of exploiting their renewable and non renewable resources At the same time non sustainable consumption and production patterns in the industrial countries and among wealthy citizens in developing countries place additional burdens on the planet's natural resources and ecosystems With a view of considering these problems and elaborating policy guidelines the United Nations staged its International Conference on Population and Development ICPD in Cairo Egypt September 5-13 1994 This monograph deals with the background to the ICPD its preparation proceedings and contents It also evaluates its results and recommendations by comparing the ICPD Action Programme with the current scientific literature The ICPD dealt with the key issues concerning the interrelations between population development and environment and their causes and was not limited to marginal issues such as abortion promiscuity and homosexuality as was the impression given in the media as a result of the way these questions were distorted by the action of religious fundamentalists The ICPD Action Programme forms an impressive charter with a broad range of relevant policy recommendations Nevertheless compared to most of the current scientific literature the ICPD seems to underestimate the seriousness and urgency of the issues at stake

Reproductive Health and Gender Equality Guang-zhen

Wang, 2016-04-08 Since the late 1990s approaches to women's reproductive health has shifted from a service based model to a human rights approach This approach associates reproductive health with freedom from discrimination and enjoyment of a satisfying and safe sex life and full access to information and services related to reproduction In spite of this shift and the global effort to promote women's reproductive health through the enhancement of human rights and gender equality progress has been very slow In this book the author fills a much needed empirical study of women's reproductive health The author assesses data from 137 developing countries or areas and challenges the prevailing bioscience and public health models by linking women's reproductive health to gender equality measures and development policies Discussion on abortion rights regional variations and reproductive health needs among refugees and internally displaced persons are also discussed This is a timely study which provides a theoretical and social policy basis for monitoring and improving women's reproductive health in developing countries This is particularly important in the light of insufficient research in the field and a lack of analysis on the empirical and theoretical linkages between reproductive health and gender equality The book will be of interest to researchers professionals and students interested in women's health issues gender women's studies and human rights

Demography in the Age of the Postmodern Nancy E. Riley, James McCarthy, 2003-07-24 Demography has

developed into a remarkably coherent field and now stands as a firmly established discipline with strong ties to policy making agencies. However, in recent years there has been increasing recognition within demography of the limits of existing theories and methods, particularly its absence of a strong critical tradition and its isolation from recent theoretical developments in other social sciences. In this study, Nancy Riley and James McCarthy use the lens of postmodernism to structure a critical analysis of the field of demography. Paying particular attention to the fundamental epistemologies and methodologies that currently underlie the field, they explore how postmodern perspectives might serve to energize the field and how demography could be enhanced by the introduction of insights from other social sciences. Drawing on examples of new kinds of research in demography and related fields, this is an important new book that seeks to reinvigorate the field of demography.
