Investigation of Digital Techniques for Radar Land Mass Simulation Pennsylvania Research Associates, Inc, 1962

Systems, Experts, and Computers Agatha C. Hughes, Thomas Parke Hughes, 2011-01-21 This groundbreaking book charts the origins and spread of the systems movement After World War II a systems approach to solving complex problems and managing complex systems came into vogue among engineers scientists and managers fostered in part by the diffusion of digital computing power Enthusiasm for the approach peaked during the Johnson administration when it was applied to everything from military command and control systems to poverty in American cities Although its failure in the social sphere coupled with increasing skepticism about the role of technology and experts in American society led to a retrenchment systems methods are still part of modern managerial practice This groundbreaking book charts the origins and spread of the systems movement It describes the major players including RAND MITRE Ramo Wooldridge later TRW and the International Institute of Applied Systems Analysis and examines applications in a wide variety of military government civil and engineering settings The book is international in scope describing the spread of systems thinking in France and Sweden The story it tells helps to explain engineering thought and managerial practice during the last sixty years **Technical**

Hubregt J. Visser, 2009-03-09 This step by step guide provides the reader with a detailed and thorough introduction to practical antenna design and model implementation In this book Hubregt J Visser provides an introduction to the fundamentals of antenna design and the implementation of design models A variety of antennas for wireless applications and communications systems are explained and the real life use of the antennas is demonstrated through extensive use of application examples The author includes discussions on the design process of several antennas such as intravascular MR Antennas PCB antennas RFID antennas rectennas etc Furthermore emphasis is placed on Computer Aided Design CAD using approximated models Key Features Includes coverage on intravascular MR Antennas PCB antennas RFID antennas rectennas etc Comprehensively details the application areas modeling analysis and validation processes for individual antennas Discusses the use of equivalent dipole antennas equivalent transmission line networks and electrostatics Introduces many antennas and models that have not been covered in previous publications such as MRI Antennas for example This book will be of interest to microwave and antenna engineers Graduate and post graduate antennas students studying BSc and MSc courses as well as research assistants will also find this book insightful **Radiation Laboratory Series**, 1964 **Principles of Modern Radar** Jerry Eaves, Edward

Reedy, 2012-12-06 This book Principles of Modern Radar has as its genesis a Georgia Tech short course of the same title This short course has been presented annually at Georgia Tech since 1969 and a very comprehensive set of course notes has evolved during that seventeen year period The 1986 edition of these notes ran to 22 chapters and all of the authors involved except Mr Barrett were full time members of the Georgia Tech research faculty After considerable encouragement from

various persons at the university and within the radar community we undertook the task of editing the course notes for formal publication. The contents of the book that ensued tend to be practical in nature since each contributing author is a practicing engineer or scientist and each was selected to write on a topic embraced by his area s of expertise. Prime examples are Chaps 2, 5 and 10 which were authored by E F Knott, G W Ewell and N C Currie respectively. Each of these three researchers is recognized in the radar community as an expert in the technical area that his chapter addresses and each had already authored and published a major book on his subject. Several other contributing authors including Dr Bodnar, Mr Bruder, Mr Corriher, Dr Reedy, Dr Trebits and Mr Scheer also have major book publications to their credit.
