## **Radar The Silent Detector:**

Target Detection by Marine Radar John N. Briggs, 2004-12-03 Radar is a legal necessity for the safe navigation of merchant ships and within vessel traffic services is indispensable to the operation of major ports and harbours Target Detection by Marine Radar concentrates solely on civil marine operations and explains how marine surveillance radars detect their targets The book is fully illustrated and contains worked examples to help the reader understand the principles underlying radar operation and to quantify the importance of factors such as the technical features of specific equipment the weather target reflection properties and the ability of the operator The precision with which targets are positioned on the radar screen and with which their progress is tracked or predicted depends on how definitely they have been detected therefore a whole chapter has been devoted to the issue of accuracy The various international regulations governing marine radar are examined a brief historical background is given to modern day practice and the book does with a discussion of the ways in which marine radar may develop to meet future challenges The Applications of Radar and Other Electronic Systems in the Royal Navy in World War 2 F.A. Kingsley, 2016-07-27 This book presents a collection of authoritative accounts of the evolution and application of Royal Naval shipborne radars during World War 2 in the fields of weapon control weapon direction action information and fighter direction Accounts are also presented of the successful pioneering activities at the Admiralty Signal Establishment in the fields of counter measures against various enemy electronic systems in active operations and also of high frequency direction finding ashore and afloat which in conjunction with radar contributed substantially to winning the Battle of the Atlantic Synthesis of systems, 1963 Detecting and Classifying Low Probability of Intercept Radar Phillip E. Pace, 2004 Pace Naval Postgraduate School presents the principles of radar design that enable a low probability of intercept LPI by a noncooperative intercept receiver The RF system uses complex pulse compression CW waveforms low side lobe antennas and power management techniques to render itself virtually undetectable The second part of the textbook investigates three algorithms for providing the intercept receiver with a processing gain that is close to the radar's matched filter processing gain and quantifies their performance with LPI waveforms The CD ROM contains MATLAB code for evaluating the complex LPI radar receiver interactions Annotation 2004 Book News Inc Portland OR booknews com **Department of Defense Dictionary of Military and Associated Terms**, 1994 Ski, 1987-11 *Department of Defense dictionary of military and associated terms (Online)* United States.
