Medical Management of Radiation Accidents Theodor M. Fliedner, I. Friesecke, K. Beyrer, 2001 This text from the British Institute of Radiology provides an international standard for the evaluation of radiation induced health impairments which should make a useful contribution to the harmonization and standardization of the Medical Management of Radiation Accidents

**Radiation Accidents and Emergencies in Medicine, Research, and Industry** Lawrence Herman Lanzl, 1965

*Medical Management of Radiation Accidents* Kenneth S. Cohen, 2001-03-28 Although radiation accidents are rare and often complex in nature they are of great concern not only to the patient and involved medical staff but to the media and public as well Yet there are few if any comprehensive publications on the medical management of radiation accidents

*Medical Management of Radiation Accidents* provides a complete reference

*Emergency and Disaster Medicine* C. Manni, S.I. Magalini, 2012-12-06 C Manni The focusing of general interest and of many disciplines on disaster medicine is an interesting and recent phenomenon in our society Disasters have by now left the historical and philosophical sphere and finally entered the operational arena Modern man in other words no longer accepts disasters in a passive and fatalistic manner but claims to be able to control them like so many other forces of nature The new approach is aimed at preventing containing and remedying the invariably tragic consequences of these events The role of medicine in this context is of fundamental importance and is characterized by two main aspects application of techniques of intervention appropriately and effectively and collaboration with the general organization assuming responsibility for the protection of health and the treatment of injuries Following a period of more or less chaotic growth during which sectionalism and empirical interests prevailed and localized aspects of this new discipline underwent considerable development a need is now felt to propose and realize a more comprehensive scientific approach It has become necessary to identify and to rationally analyze the individual components of this branch of medicine As in any analysis the recognition of the object of the research is of fundamental importance hence the title of this first round table

Types and Events of Disaster

**Preparedness and Response in Radiation Accidents** Bernard Shleien, 1983

**Hospital Emergency Department Management of Radiation Accidents**, 1984

**Medical Response to Major Incidents and Disasters** Sten Lennquist, 2012-01-03 This book written by members of the core faculty responsible for European courses on Medical Response to Major Incidents MRMI is a practical guide for all medical staff on how to respond to a wide range of disaster scenarios The entire spectrum of knowledge is covered from command and coordination through to the management of individual casualties Central importance is attached to the key component of decision making by explaining what needs to be done for patients in particular situations and the required order and timing of treatment measures Simplified methods receive due attention as it is often necessary for medical staff to administer primary treatment outside of their own specialty This book will prove an invaluable aid to all who may be involved in the response to major accidents and disasters including medical and nursing students ambulance crew and military personnel as
