Radical Socioeducational Analysis:

Radical Socioeducational Analysis Scott B. Sigmon, 1985 *Critical Voices on Special Education* Scott B. Sigmon, 1990-07-05 The authors of this work address special education's most pressing concern the inappropriate placement into special education programs of millions of students who fall behind or do not conform well enough to the academic or behavioral standards of today's public schools Too often these students are misdiagnosed as mildly handicapped and are presumed to have some physical or sensory disability In fact this formal labeling practice may carry consequences that are not only self defeating and potentially ruinous for the stigmatized individual pupil but also ultimately threatening to society as a whole The book includes contemporary discussions about needed institutional change the shortcomings of practice currently in vogue and related to the education of the so called mildly handicapped and an appeal for new attitudes toward children that recognizes them as individual learners The authors offer a unique combination of practical solutions to help set the course for more humane efficacious educational practice with students who have difficulty learning They discuss preplacement interventions such as teaching learning strategies effective short term counseling and new ways to assess reading for instructional rather than special placement purposes

Resources in Education, 1992 Research Issues in Learning Disabilities Sharon Vaughn, Candace S. Bos, 2012-12-06 In this chapter we described issues in conducting intervention research with students with learning disabilities on the secondary level We maintained that interventions should be well grounded in theories of learning as well as characterizations of learning disabilities Pressley Scruggs that they should first be conducted in a series of highly controlled laboratory like experiments to carefully assess the potential utility of the intervention and that if the intervention is successful in highly controlled settings it should then be evaluated in classroom applications We maintained that research designs should evolve as the research questions become more applied and that the results of laboratory research should be used to support the findings of classroom applications Finally we described several research designs that we have found useful in conducting classroom intervention research There is a great deal more to conducting intervention research of course than experimental or quasi experimental design Intervention strategies likely to be effective must be identified relevant literature must be reviewed experimental materials must be developed and cooperative schools teachers parents and students must be located Nevertheless inadequate research designs can invalidate the best and most successful efforts in all of these areas while effective and practical research designs can do much to document the best practices and advance our knowledge of effective interventions with students with learning disabilities

References Brigham F J Scruggs T E Mastropieri M A 1992 Antonio Gramsci (Routledge Revivals) Harold Entwistle, 2009-07-15 Antonio Gramsci is one of the few Marxist theoreticians to have considered the role and nature of education yet paradoxically his revolutionary political and social theory seems at odds with his conservative approach to the content and processes of schooling This book originally published in 1979 examines his educational political and cultural

writings in an effort to resolve this apparent discrepancy Gramsci's relevance lies in his treatment in the context of his radical political theory of themes which currently exercise modern radical educationists Among the subjects he discusses are the sociology of the curriculum the apparent discontinuity between the culture of school and that of daily life problems of literacy and language in education the role of the state in the provision of education the cultivation of elites and the role of intellectuals the relative functions of authority and spontaneity in education and the ambiguous relationship of these to differing political ideologies particularly Fascism

Research Communications in Psychology, Psychiatry, and Behavior, 1985 Academic Distinctions James G. Ladwig, 2016-05-06 Academic Distinctions is the most sustained and rigorous critique of radical sociology of school knowledge and its major figures to date Using a variety of theoretical lenses to analyze and reconstitute the field structuralist poststructuralist and feminist James Ladwig documents how the so called new sociologists of education lost their theoretical way and failed to realize their educational goals

Disability Studies Quarterly, 1985 *Changing Narratives of Youth Crime* Bernd Dollinger, 2019-07-02 In recent years western societies have experienced a fundamental transformation in the way crime is understood and dealt with Against the backdrop of a current great interest in narratives in criminology this book draws on a narrative perspective to explore this transformation Drawing on data from Germany the book focuses on changing narratives of youth crime in recent decades and the exact narratives that have been used abandoned invented or criticized in order to instil particular understandings of crime and measures to act against it The author draws upon a wide range of sources including debates on youth crime in six parliaments from 1970 to 2012 articles on youth crime in four police and six social work journals from 1970 to 2009 and case studies with 15 young defendants who were interviewed before and after their trial and whose trial was observed In doing so the author reconstructs narratives over several decades and overall reveals a fascinating and multifaceted scope of narratives of youth crime This book will be of great interest to students and scholars of youth crime and justice as well as criminology sociology politics and social work more broadly
