Fierce Fighters Predators Lee Martin, Paul Beck, 2017-09-19 Fierce Fighters Predators put the most dominant predators in the world into hypothetical fights and analyzes their power quickness venom to see who would

win For the world s fiercest predators winning is second nature But what would happen if they forgot their prey and battled one another instead Featuring dozens of the world s greatest hunters Fierce Fighters Predators showcases the most epic battles imaginable between the champions of the land sea and sky Grizzly versus mountain lion Electric eel versus piranha Orca versus great white shark Komodo dragon versus tiger Python versus king cobra These aren t just head to head match ups they are tooth to tooth and claw to claw Deadly venom against powerful jaws Speed and agility against brute force Brainy mammals against cold blooded reptiles with a survival instinct millions of years in the making Weigh the skills of the contestants and try to guess who will emerge victorious then check and see if the experts agree In these dozens of earth wide battles can you predict the most ferocious fighters of all **Beyond the Lens of Conservation** Eva Keller,2015-02-01

The global agenda of Nature conservation has led to the creation of the Masoala National Park in Madagascar and to an exhibit in its support at a Swiss zoo the centerpiece of which is a mini rainforest replica Does such a cooperation also trigger a connection between ordinary people in these two far flung places The study investigates how the Malagasy farmers living at the edge of the park perceive the conservation enterprise and what people in Switzerland see when looking towards Madagascar through the lens of the zoo exhibit It crystallizes that the stories told in either place have almost nothing in common one focuses on power and history the other on morality and progress Thus instead of building a bridge Nature conservation widens the gap between people in the North and the South **Multicultural Explorations** Mary A.

American Tropics Megan Raby,2017-10-03 Biodiversity has been a key concept in international conservation since the 1980s yet historians have paid little attention to its origins Uncovering its roots in tropical fieldwork and the southward expansion of U S empire at the turn of the twentieth century Megan Raby details how ecologists took advantage of growing U S landholdings in the circum Caribbean by establishing permanent field stations for long term basic tropical research From these outposts of U S science a growing community of American tropical biologists developed both the key scientific concepts and the values embedded in the modern discourse of biodiversity Considering U S biological fieldwork from the era of the Spanish American War through the anticolonial movements of the 1960s and 1970s this study combines the history of science environmental history and the history of U S Caribbean and Latin American relations In doing so Raby sheds new light on the origins of contemporary scientific and environmentalist thought and brings to the forefront a surprisingly neglected history of twentieth century U S science and empire *Tomart's Price Guide to McDonald's Happy Meal Collectibles* Meredith
