remarkably different dynamics of disciplinary growth between countries as well as important interdisciplinary differences within countries. In addition, instances of institutional contractions and downturns and veritable breaks of continuity under authoritarian political regimes can be observed which are almost totally absent from narratives of individual disciplinary histories. This important work will provide a valuable resource to scholars of disciplinary history, the history of ideas, the sociology of education and of scientific knowledge.

Identity and Resistance in Further Education Pete Bennett, Rob Smith, 2018-02-02. In recent years, Further Education has reached a crossroads with questions being asked about its function, aims and focus as well as querying the role of the FE teacher, the key aspects of the curriculum and which values should inform FE pedagogy. *Identity and Resistance in Further Education* explores these questions and effectively conveys the sense of uncertainty that those in the field are experiencing today. Connecting Higher Education and FE practitioners and researchers, the book gathers a collection of essays covering a range of topics including the journey from student to teacher, critical reflective practice as a way of organising identity, values-based teacher education and policy critique. In keeping with the themes of resistance and creativity, the chapters draw on a wide range of theoretical as well as literary perspectives to offer answers. Problematising relationships between the teacher and the institution and the teacher and government, the book argues that the profound challenge to teachers' values and identities finds its response in a critical collegiality. This book will be of great interest to academics, researchers and postgraduate students engaged in the study of further education, educational policy and teacher education. It should also be essential reading for practitioners and policymakers.

Maintaining Strategic Relevance Kevin J. Fleming, 2015-05-14. The community and technical college mission requires offering relevant Career and Technical Education (CTE) programs. Board policies are plentiful for creating new programs in alignment with workforce needs. However, few districts have robust policies in place to appropriately discontinue or replace CTE programs. This book identifies successful CTE program discontinuance, including how people feel about the process and the impact of institutional culture. The interviews and policy analysis conducted provide best practices to effectively and appropriately discontinue CTE programs. Eleven practical recommendations are outlined to help community and technical colleges in establishing program discontinuance processes which strategically and effectively discontinue CTE programs while making optimal use of limited fiscal and human resources. This book provides readers with information on career and technical education, appropriate strategies to manage the constant churning of CTE programs, college governance and academic discontinuance policies.

Crisis in the Academy Christopher J. Lucas, 1998-03-15. Not since student turmoil and unrest wreaked havoc on the nation's campuses three decades ago has American higher education been the subject of so much controversy and popular criticism. Countless indictments compete for the public's attention as critics explore vital issues confronting today's institutions of higher learning: curricular fragmentation, declining academic standards, the apparent erosion of liberal learning within academe, widespread neglect of undergraduate education in favour of academic research.

and unprecedented financial woes Confusion over fundamental priorities and purposes the author argues lies at the heart of the dilemma facing end of the century higher education Thoughtful and timely Crisis in the Academy offers a wide ranging analysis of contemporary higher education while making an important contribution to the ongoing public debate over the future of America s beleaguered and diverse institutions of higher learning
