Understanding Behavior in the Context of Time Alan Strathman,Jeff Joireman,2006-04-21 Understanding Behavior in the Context of Time reviews the research on temporal orientation and brings together the disparate social behaviors influenced by time perspective Organized into four sections each chapter includes theory research applications and directions for future research Some chapters outline novel theoretical approaches that help to expand and or integrate existing theories The second part focuses on individual level processes and reviews the conceptualization measurement and lifespan development of time orientation the outcomes associated with various time orientations and how temporal factors influence attitudes and persuasion Part

three explores the role of time within interpersonal and group level processes as applied to such areas as close relationships group cooperation aggression organizational behavior pro environmental behavior and cultural issues This book will be of interest to social and personality psychologists and the book s applied emphasis will appeal to health environmental and industrial psychologists The Rewards of Punishment Christine Horne,2009-05-08 The Rewards of Punishment describes a new social theory of norms to provide a compelling explanation why people punish Identifying mechanisms that link interdependence with norm enforcement it reveals how social relationships lead individuals to enforce norms even when doing so makes little sense This groundbreaking book tells the whole story from ideas to experiments to real world applications In addition to addressing longstanding theoretical puzzles such as why harmful behavior is not always punished why individuals enforce norms in ways that actually hurt the group why people enforce norms that benefit others rather than themselves why groups punish behavior that has only trivial effects and why atypical behaviors are sometimes punished and sometimes not it explores the implications of the theory for substantive issues including norms regulating sex crime and international human rights Neuroeconomics and the Firm Angela A. Stanton,Mellani Day,Isabell M. Welp,2010-01-01 Do people with high testosterone levels make decisions the same way as people with lower testosterone Do men change their behavior when a pretty woman enters the office Do women change their behavior when a handsome man enters the office Do men and women affect each other within the firm to the detriment or the benefit of the firm In some ways the questions this edited volume addresses are questions that we are all familiar with and have asked for many years It suggests looking for answers in places that that we have never thought of before Some of the chapters will surprise you with their ingenious simple answers and propositions some will perhaps make you feel awkward with their straight forward way of presenting what we all suspected but felt uncomfortable to talk about From the foreword by David B Audretsch This volume brings together leading researchers from a variety of fields to investigate the concept of the firm from new perspectives arising from neuroeconomics The traditional theory of the firm has focused on the strategic operational and resource management objectives of the firm as an organization This timely and informative book explores new horizons in the biology of human decision making and behavior including uncertainty entrepreneurship and ethics as it affects the functioning of the organization The fascinating chapters cover a wide range of research fields drawing on both the conscious and the unconscious mind and how common hormonal cycles in the female and testosterone variations in the male affect each other in the workplace and its affect on the firm as an organization The topics of entrepreneurship and the recent global financial crisis are discussed from the perspective of hormonal forces and the implications of those forces in the future It is an enlightening selection of articles that scholars students business leaders and managers will find a valuable read Vernon L Smith 2002 Nobel Laureate in Economics The ideal firm has been studied over several centuries yet little is known about what makes one successful and another fail This pioneering book brings together leading researchers investigating the

concept of the firm from a neuroscientific perspective From the viewpoint of economics the firm s purpose is to maximize shareholders wealth resources are commodities each with its particular supply and demand curve that can be manipulated by the firm to its own benefit Traditionally the firm is focused on the strategic operational and resource management objectives The editors instead suggest that the objective of the firm is equal to the objectives of its workers The definition and function of risk in decision making ethics trust and the global financial crisis are all discussed They are analyzed from the perspective of human bio physiology using scanning and hormonal analysis tools with a focus on the implications for the bottom line of the firm With experimental as well as theoretical and applied contributions this book will benefit scholars and students of economics business management finance organizational behavior entrepreneurship psychology neuroscience and law Practitioners of management entrepreneurship and law firms will also find this book to be a captivating read *The Law of Good People* Yuval Feldman, 2018-06-07 Currently the dominant enforcement paradigm is based on the idea that states deal with bad people or those pursuing their own self interests with laws that exact a price for misbehavior through sanctions and punishment At the same time by contrast behavioral ethics posits that good people are guided by cognitive processes and biases that enable them to bend the laws within the confines of their conscience In this illuminating book Yuval Feldman analyzes these paradigms and provides a broad theoretical and empirical comparison of traditional and non traditional enforcement mechanisms to advance our understanding of how states can better deal with misdeeds committed by normative citizens blinded by cognitive biases regarding their own ethicality By bridging the gap between new findings of behavioral ethics and traditional methods used to modify behavior Feldman proposes a law of good people that should be read by scholars and policymakers around the world
