Resource Communities A Decade Of Disruption:

Resource Communities Don D Detomasi, J. W. Gartrell, John W Gartrell, 2020-01-16 This volume consists of eleven original papers that survey the state of the art in research and public policy regarding specific problems and opportunities confronted by resource communities. The papers are international in scope dealing with the experiences of resource communities in four nations: Canada, Norway, the United Kingdom, and the United States. **Stability and Change in Forest-based Communities** Catherine Woods Richardson, 1996 **Proceedings of the 1993 Northeastern Recreation Research Symposium** Gail A. Vander Stoep, 1993 *Forty Years of Hydrometeorological Data from the Fernow Experimental Forest, West Virginia*, 1994 *General Technical Report NE*, 1980 **Community And Forestry** Robert G Lee, 2019-05-20 The contributors consider how social science perspectives can contribute to our understanding of communities and their conflicting choices regarding the allocation and use of forest, agriculture, and other natural resources. The topics discussed include community stability, community adjustment to economic and technological change, and the public's role in resource management. [Resources and Sustainable Development in the Arctic](#) Chris Southcott, Frances Abele, David Natcher, Brenda Parlee, 2018-10-04 Over the past thirty years we have witnessed a demand for resources such as minerals, oil, and gas which is only set to increase. This book examines the relationship between Arctic communities and extractive resource development. With insights from leading thinkers in the field, the book examines this relationship to better understand what, if anything, can be done in order for the development of non-renewable resources to be of benefit to the long-term sustainability of these communities. The contributions synthesize circumpolar research on the topic of resource extraction in the Arctic and highlight areas that need further investigation, such as the ability of northern communities to properly use current regulatory processes, fiscal arrangements, and benefit agreements to ensure the long-term sustainability of their culture, communities, and to avoid a new path dependency. This book provides an insightful summary of issues surrounding resource extraction in the Arctic and will be essential reading for anyone interested in environmental impact assessments, globalization, and Indigenous communities and the future of the Arctic region. **Large-scale Mines and Local-level Politics** Colin Filer, Pierre-Yves Le Meur, 2017-10-20 Despite the difference in their populations and political status, New Caledonia and Papua New Guinea have comparable levels of economic dependence on the extraction and export of mineral resources. For this reason, the costs and benefits of large-scale mining projects for indigenous communities has been a major political issue in both jurisdictions, and one that has come to be negotiated through multiple channels at different levels of political organisation. The resource boom that took place in the early years of the current century has only served to intensify the political contests and conflicts that surround the distribution of social, economic, and environmental costs and benefits between community members and other stakeholders in the large-scale mining industry. However, the mutual isolation of Anglophone and Francophone scholars has formed a barrier to systematic comparison of the relationship between large-scale

mines and local level politics in Papua New Guinea and New Caledonia despite their geographical proximity This collection of essays represents an effort to overcome this barrier but is also intended as a major contribution to the growth of academic and political debate about the social impact of the large scale mining industry in Melanesia and beyond **General**

Vander Stoep,1994

Company Towns in the Americas Oliver Jürgen Dinius,Angela Vergara,2011-01-01 Company towns were the spatial manifestation of a social ideology and an economic rationale The contributors to this volume show how national politics social protest and local culture transformed those founding ideologies by examining the histories of company towns in six countries Argentina Firmat Brazil Volta Redonda Santos Fordl ndia Canada Sudbury Chile El Salvador Mexico Santa Rosa R o Blanco and the United States Anaconda Kellogg and Sunflower City Company towns across the Americas played similar economic and social roles They advanced the frontiers of industrial capitalism and became powerful symbols of modernity They expanded national economies by supporting extractive industries on thinly settled frontiers and as a result brought more land natural resources and people under the control of corporations U S multinational companies exported ideas about work discipline race and gender to Latin America as they established company towns there to extend their economic reach Employers indeed shaped social relations in these company towns through education welfare and leisure programs but these essays also show how working class communities reshaped these programs to serve their needs The editors introduction and a theoretical essay by labor geographer Andrew Herod provide the context for the case studies and illuminate how the company town serves as a window into both the comparative and transnational histories of labor under industrial capitalism
