Resources Deprivation And Poverty:

Resources, Deprivation, and Poverty Brian Nolan, Christopher T. Whelan, 1996 Poverty alleviation is a central aim of economic and social policy and yet there is no consensus about what poverty means or how it is best measured Often the households below an income poverty line are counted as poor but there may be no firm basis for concentrating on that particular income level There may also be wide variations among the households below any income poverty line in terms of their actual living standards This book explores what poverty means in developed countries and shows that understanding and measuring it requires widening the focus beyond current income By using broader measures of resources and information on living patterns and concrete indicators of deprivation it shows how those who are effectively excluded from participation in society due to lack of resources can be more accurately identified and the processes producing such exclusion better understood The core issue of this book is how to define and measure poverty in relatively rich countries in a way which is valid meaningful in the context and valuable for policy making Extensive analysis of data from a specially designed survey of a large representative sample of Irish households is used to illustrate the arguments

Analysis of Socio-Economic Conditions Gianni Betti, Achille Lemmi, 2021-03-30 Showcasing fuzzy set theory this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and behaviour The contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective Thus far fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement These chapters examine the latest work in this area while also exploring further applications including social exclusion the labour market educational mismatch sustainability quality of life and violence against women The authors demonstrate that real world situations are often characterised by imprecision uncertainty and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic By contrast fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena This book will be of significant interest to economists statisticians and sociologists utilising quantitative methods to explore socio economic phenomena

Social Exclusion in European Welfare States R. J. A. Muffels, Panos Tsakloglou, David G. Mayes, 2002-01-01 Social Exclusion in European Welfare States focuses on the complex relationship between economic welfare labor market performance and social inclusion exclusion The contributors to the volume examine in detail the alleged trade off between the social and economic capabilities of a society and their impact on the well being of the citizens Furthermore they identify welfare regimes whose policies are

more balanced in terms of prioritizing economic as well as social goals and hence are more successful in promoting social inclusion along with faster growth

throughout the social sciences particularly in sociology social policy public policy international relations politics and gender studies **Symposium "Analysing the Dynamics of Social Change in Europe"** Richard Berthoud, Katharina Spiess, 2002 This special edition of Schmollers Jahrbuch has been compiled to illustrate the potential value of comparative European studies As Melvin Kohn says cross national research is valuable even indispensable for establishing the generality of findings and the validity of interpretations derived from single nation studies It is equally valuable perhaps even more valuable for forcing us to revise our interpretations to take account of cross national differences and inconsistencies that could never be uncovered in single nation studies Cross country comparisons are of immense potential value for different actors Within Europe they are of likely significance To the institutions of the EU itself offering a detailed map of variations in social and economic experiences between countries and groups of countries To policy makers at the national level showing how far the social and economic problems observed locally are experienced in common with other European countries To social scientists seeking to understand the processes and results of change If the influences identified in one country are not generalisable to other countries it is necessary to develop hypotheses about the reasons for the differences To analysts of social policy looking

for general conclusions about the influence of government actions on individuals lives in Europe There are many different approaches to cross country research Summary macro data may be compared across many countries At the other extreme highly detailed studies can be undertaken of the effects of policy in just two or three countries The papers in this compilation are focused on micro level data about individuals and households in most of the countries in the EU They are mostly based on one cross national survey the European Community Household Panel ECHP Most of them have been contributed by members of the European Panel Analysis Group EPAG

From Child Welfare to Child Well-Being Sheila Kamerman, Shelley Phipps, Asher Ben-Arieh, 2009-10-23 This chapter provides a brief overview of the book highlighting the modest progress from child welfare to child well being reflected in these chapters and the parallel movement in Kahn's career and research as his scholarship developed over the years It then moves to explore the relationship between two overarching themes child and family policy stressing a universal approach to children and social protection stressing a more targeted approach to disadvantaged and vulnerable individuals including children and the complementarity of these strategies Introduction To a large extent Alfred J Kahn was at the forefront of the developments in the field of child welfare services protective services foster care adoption and family preservation and support Over time his scholarship moved to a focus on the broader policy domain of child and family policy and the outcomes for child wellbeing His work as is true for this volume progressed from a focus on poor disadvantaged and vulnerable children to a focus on all children He was convinced that children by definition are a vulnerable population group and that targeting all children employing a universal policy as a strategy would do more for poor children than a narrowly focused policy targeted on poor children alone As we first argued more than three decades ago Not for the Poor Alone Universalism and Income Testing in Family Policy one could target the most disadvantaged within a universal framework and this would lead to more successful results than targeting only the poor

Handbook of Research on Economic and Social Well-Being Conchita D'Ambrosio, 2018-03-30 The past decade has been characterized by a burgeoning interest in new concepts of individual and social well being The impetus for this new research has stemmed from increased demand from policy makers and civil society for measures of progress that go beyond the traditional measures of GDP as well as improved datasets allowing individuals and households to be tracked over their life course The aim of this Handbook is to chart these developments and provide extensive surveys of many of the recent themes that have emerged in the research literature Some of the topics addressed include poverty relative deprivation and satisfaction economic insecurity social exclusion and inequality income and social polarization and social fractionalization and diversity Each topic is first analyzed from a theoretical perspective followed by detailed empirical discussion

Death, Dying, and Social Differences David Oliviere, Barbara Monroe, Sheila Payne, 2011-09-15 Society has become increasingly diverse multi cultural multi faith and wide ranging in family structures The wealthier are healthier and social inequalities are more pronounced Respecting and working with the range of differences among service users families and communities in health and social

care with ill dying and bereaved people is a neglected area in the literature. As the principles of palliative and end of life care increasingly permeate the mainstream of health and social care services, it is important that professionals are sensitive and respond to the differing needs of individuals from diverse socio-economic backgrounds, ethnicities, beliefs, abilities, and sexual orientations, as well as to the different contexts and social environments in which people live and die. This book explores what underpins inequality, disadvantage, and injustice in access to good end of life care. Increasingly, clinicians, policy planners, and academics are concerned about inequity in service provision. Internationally, there is an increasing focus and sense of urgency both on delivering good care in all settings regardless of diagnosis and on better meeting the needs of vulnerable and disadvantaged groups. National initiatives emphasise the importance of resolving disparities in care and harnessing empowered user voices to drive change. This newly expanded, fully revised second edition with 11 new chapters provides a comprehensive analysis of discrimination, difference, and disadvantage in end of life care and offers practical guidance for all who seek to support the equitable provision of good end of life care.
