Richardson, William Henry Chaloner, 1996      Radicalism and Revolution in Britain 1775-1848 M. Davis, 1999-12-07 The spectre of revolution and the nature of radicalism in Britain from the late eighteenth century through to the age of the Chartists has for some time engaged the interest of scholars and been the topic of much debate This book honours one of the subject s most renowned and respected historians Professor Malcolm I Thomis In a collection distinguished by its formidable range of contributors a series of stimulating essays explores and re examines the threats and ideas of revolution and the byzantine networks and character of British radical culture in the turbulent and intriguing years between 1775 and 1848

**Responses to Industrialisation** Malcolm I. Thomis, 1976      **Ten Per Cent and No Surrender** H. I. Dutton, J. E.

King, 1981 This is a study of industrial unrest in the cotton industry at a time when the economy was on the threshold of mid Victorian prosperity and when Chartism was still much more than a memory The town of Preston was the crucial battlefield and here the masters and men fought out a bitter trial of strength The strike of 1853 54 closed the Preston cotton industry for seven months and disrupted production in many other towns in Lancashire Against the implacable opposition of the masters the strikers toured the country to organize support and raised 100 000 in subscriptions from their fellow operatives The dispute featured prominently in the national and provincial press and the weavers delegates notably George Cowell and Mortimer Grimshaw became celebrities overnight After five months the employers brought in blackleg labour and when the detested knobsticks failed to break the strike they had the operatives leaders arrested These moves did not deter the cotton workers who were forced back to work only when their financial reserves were exhausted Their campaign ended defiantly as it had begun with cries of Ten Per Cent still and no surrender This book is their story      The Industrial Revolution and British Society Patrick O'Brien, Roland Quinault, 1993-01-29 This text is a wide ranging survey of the principal economic and social aspects of the first Industrial Revolution      Slavery Past, Present and Future Catherine Armstrong, Jaya

Priyardarshini, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2016 Spanning swaths of time and space slavery as a phenomenon has known intersections of class gender race caste etc The historical experiences of slaves is more or less lacking in the pedagogic or intellectual knowledge but its legacy in modern times is felt in the marginalisation stigmatisation remorse or shame of the slave descendants Contrary to historical slavery the presence of modern or twenty first century slavery is variously mired in the complex and contested terrains of its definition Today the political and economic context of human conditions globally has muddled the understanding of servitude Its resurgence in newer avatars along with institutional or informal upholders challenges its abolition Hearing the slave voices more than the hegemonic involvement of the abolitionists is required for its complete abolition A unified public activism and awareness as always will go a long way in ending it while upholding social justice      **The Home Office and the Dangerous Trades** P.W.J.

Bartrip,2016-08-22 This book is the first in depth study of occupational health in nineteenth and early twentieth century Britain As such it is an important contribution to the burgeoning literature on the history of health in the workplace It focuses on the first four diseases to receive bureaucratic and legislative recognition lead arsenic and phosphorus poisoning and anthrax As such it traces the emergence of medical knowledge and growth in public concern about the impact of these diseases in several major industries including pottery manufacture matchmaking wool sorting and the multifarious trades in which arsenic was used as a raw material It considers the process of state intervention taking due account of the influence of government inspectors moral entrepreneurs and various interest groups     Labour and the Poor in England and Wales, 1849-1851: Lancashire, Cheshire, Yorkshire

**Writing the Materialities of the Past** Sam Griffiths,2021-06-14 Writing the Materialities of the Past offers a close analysis of how the materiality of the built environment has been repressed in historical thinking since the 1950s Author Sam Griffiths argues that the social theory of cities in this period was characterised by the dominance of socio economic and linguistic cultural models which served to impede our understanding of time space relationality towards historical events and their narration The book engages with studies of historical writing to discuss materiality in the built environment as a form of literary practice to express marginalised dimensions of social experience in a range of historical contexts It then moves on to reflect on England s nineteenth century industrialization from an architectural topographical perspective challenging theories of space and architecture to examine the complex role of industrial cities in mediating social changes in the practice of everyday life By demonstrating how the authenticity of historical accounts rests on materially emplaced narratives Griffiths makes the case for the emancipatory possibilities of historical writing He calls for a re evaluation of historical epistemology as a primarily socio scientific or literary enquiry and instead proposes a specifically architectural time space figuration of historical events to rethink and refresh the relationship of the urban past to its present and future Written for postgraduate students researchers and academics in architectural theory and urban studies Griffiths draws on the space syntax tradition of research to explore how contingencies of movement and encounter construct the historical imagination

Leonard,2010-01-01 Political Poetry as Discourse examines the works of the political poets John Greenleaf Whittier and

Ebenezer Elliott drawing comparisons to contemporary hip hoppers who take their words from local newspapers and other discursive sources that they read hear and observe Local presses and news vehicles stand as cultural material forms that supply poets with words particularly words that congeal into patterns of language allowing the creation of a poetic discourse As readers of these poets apply techniques and theories of discourse analysis they reveal how poets borrow lift hijack or resituate words from one or more different genres to use as tools of political change Leonard engages with the critical toolboxes of content analysis semiosis and deconstruction to demonstrate how to critically investigate and interrogate the images sounds and words not just of politically engaged poets but also of any disseminator of culture and news Moving beyond theory into praxis this book becomes a model of its own transgressive premise by thinking analyzing writing and teaching against the grain Its focus on language as unbounded discourse makes this book a relevant and insightful demonstration in democratic pedagogy and in teaching for transformation Why Slavery Endures David W.

Bulla,2020-11-09 This book examines slavery an antiquated ugly inhumane practice seemingly abolished in the nineteenth century yet never eradicated The legacies of historical slavery have become increasingly subject to public debate manifested in calls for reparations the UNESCO Slave Route Project and in the dismantling of Confederate monuments in the United States NGOs have researched and publicized the extent of contemporary slavery which some of the essays in this collection discuss This area of inquiry intersects with wider debates about the legacies of colonialism and structural racism which could be seen in the Rhodes Must Fall campaigns in South Africa and Oxford NGOs estimate that there are between 21 and 46 million slaves worldwide today The essays gathered here critically examine the historical roots of slavery the issue of reparations and deconstruct contemporary human trafficking Class and Space (RLE Social Theory) Nigel Thrift,Peter Williams,2014-09-04 This book is about the place of space in the study of class formation It consists of a set of papers that fix on different aspects of the human geography of class formation at different points in the history of Britain and the United States over the course of the last 200 years The book shows that the geography of class formation is a valuable and cross disciplinary tool in the study of modern societies integrating the work of human geographers with that of social historians sociologists social anthropologists and other social scientists in an enterprise which emphasises the essential unity of social science

**Labour and the Poor in England and Wales - The letters to The Morning Chronicle from the Correspondants in the Manufacturing and Mining Districts, the Towns of Liverpool and Birmingham, and the Rural Districts** J. Ginswick,2016-09-13 The Morning Chronicle presented the state of the working classes of Britain before the public with clarity insight and honesty Consisting mainly of verbatim statements from the people themselves it was a medium through which the previously inarticulate masses were able to speak with one firm voice First published in 1983 this book collates the letters from correspondents based in Lancashire Cheshire and Yorkshire The letters improve our knowledge of working class life in nineteenth century England and Wales and provide a unique insight into the impact of

industrialization This book will be of interest to those studying the history of the working class labour and poverty

Inventing the Industrial Revolution Christine MacLeod, 2002-05-09 This book examines the development of the English patent system and its relationship with technical change during the period between 1660 and 1800 when the patent system evolved from an instrument of royal patronage into one of commercial competition among the inventors and manufacturers of the Industrial Revolution It analyses the legal and political framework within which patenting took place and gives an account of the motivations and fortunes of patentees who obtained patents for a variety of purposes beyond the simple protection of an invention It includes the first in depth attempt to gauge the reliability of the patent statistics as a measure of inventive activity and technical change in the early part of the Industrial Revolution and suggests that the distribution of patents is a better guide to the advance of capitalism than to the centres of inventive activity It also queries the common assumption that the chief goal of inventors was to save labour and examines contemporary criticism of the patent system in the light of the changing conceptualisation of invention among natural scientists and political economists **Routledge**
