Restless Energy A Biography Of William Rowan 1891-1957:

Restless Energy Marianne Gosztonyi Ainley, 1993 William Rowan was one of Canada's most prestigious scientists in the first half of the 20th century. A world renowned biologist, outstanding conservationist, wildlife artist, and founder of the department of zoology at the University of Alberta, Rowan established an international reputation with his experiments on bird migration and pioneered the use of radio as a vehicle for popularizing science and conservation. Restless Energy describes Rowan's experiences as a European-trained scientist in the Canadian West and chronicles his scientific experiments and concern about social issues. With a feminist sensibility, Restless Energy also looks at Rowan's career as a scientist and the effect his commitment to science had on his marriage. Biographies of Scientists Roger Smith, 1998 Identifies over 500 sources of information about the lives of scientists for young and adult general readers and for scholars. Entries ranging from a quarter to a half page in length explain briefly what the subjects achieved, worthy of biography as well as describing the work in some detail. The works cited include books, encyclopedias, and periodicals, and both biography and autobiography. The arrangement is by discipline; the social sciences are not included, with indexes by author and subject. scientist Annotation copyrighted by Book News Inc. Portland, OR The Art and Science of Healing Since Antiquity Daya Ram Varma, 2011-02-03 *The Cambridge History of Science: Volume 8, Modern Science in National, Transnational, and Global Context* Hugh Richard Slotten, Ronald L. Numbers, David N. Livingstone, 2020-04-09 This volume in the highly respected Cambridge History of Science series is devoted to exploring the history of modern science using national, transnational, and global frames of reference. Organized by topic and culture, its essays by distinguished scholars offer the most comprehensive and up-to-date interdisciplinary history of modern science currently available. Essays are grouped together in separate sections that represent larger regions: Europe, Africa, the Middle East, South Asia, East and Southeast Asia, the United States, Canada, Australia, New Zealand, Oceania, and Latin America. Each of these regional groupings ends with a separate essay reflecting on the analysis in the preceding chapters. Intended to provide a balanced and inclusive treatment of the modern world, contributors analyze the history of science not only in local, national, and regional contexts but also with respect to the circulation of knowledge, tools, methods, people, and artifacts across national borders. **Historical Identities** Euthalia Lisa Panayotidis, Paul James Stortz, 2006-01-01 As intellectual engines of the university, professors hold considerable authority and play an important role in society. By nature of their occupation, they are agents of intellectual culture in Canada. Historical Identities is a new collection of essays examining the history of the professoriate in Canada. Framing the volume with the question "What was it like to be a professor?" editors Paul Stortz and E. Lisa Panayotidis, along with an esteemed group of Canadian historians, strive to uncover and analyze variables and contexts such as background, education, economics, politics, gender, and ethnicity in the lives of academics throughout Canada's history. The contributors take an in-depth approach to topics such as academic freedom, professors and the state, faculty development, discipline construction, and academic cultures.

and Barbara Waterfall Wilfrid Laurier University A Passion for Birds Mark V. Barrow, Jr., 2021-08-10 In the decades following the Civil War as industrialization urbanization and economic expansion increasingly reshaped the landscape many Americans began seeking adventure and aesthetic gratification through avian pursuits By the turn of the century hundreds of thousands of middle and upper class devotees were rushing to join Audubon societies purchase field guides and keep records of the species they encountered in the wild Mark Barrow vividly reconstructs this story not only through the experiences of birdwatchers collectors conservationists and taxidermists but also through those of a relatively new breed of bird enthusiast the technically oriented ornithologist In exploring how ornithologists struggled to forge a discipline and profession amidst an explosion of popular interest in natural history A Passion for Birds provides the first book length history of American ornithology from the death of John James Audubon to the Second World War Barrow shows how efforts to form a scientific community distinct from popular birders met with only partial success The founding of the American Ornithologists Union in 1883 and the subsequent expansion of formal educational and employment opportunities in ornithology marked important milestones in this campaign Yet by the middle of the twentieth century when ornithology had finally achieved the status of a modern profession its practitioners remained dependent on the services of birdwatchers and other amateur enthusiasts Environmental issues also loom large in Barrow's account as he traces areas of both cooperation and conflict between ornithologists and wildlife conservationists Recounting a colorful story based on the interactions among a wide variety of bird lovers this book will interest historians of science environmental historians ornithologists birdwatchers and anyone curious about the historical roots of today's birding boom Creating Complicated Lives Marianne Gosztonyi Ainley, 2012 Ainley argues that we must look at the lives of women scientists through a new historical lens that takes into account both the advances of science and concurrent debates about the advancement of women Rather than having linear career trajectories many women shifted fields coped with discrimination and endeavoured to find niches in which they could make significant contributions Pub desc Working for Wildlife Janet Foster, 1998-01-01 Foster shows how a small band of dedicated civil servants transformed their own goals of preserving endangered animals into active government policy The definitive history of the beginnings of wildlife conservation in Canada **Snowbird** Ellen D. Ketterson, Jonathan W. Atwell, 2016-03-30 At birdfeeders and in backyards across North America the dark eyed junco or snowbird can be found foraging for its next meal With an estimated population of at least 630 million juncos inhabit forests parks and even suburban habitats making them one of the continent's most abundant and easily observable songbirds But while common and widespread juncos also exhibit extraordinary diversity in color shape size and behavior across their range making them ideal study subjects for biologists interested in ecology and evolutionary diversification Intended for scholars citizen scientists and amateur ornithologists alike Snowbird synthesizes decades of research from the diverse and talented researchers who study the Junco genus Though contributors approach their subject from a variety of perspectives they share a common goal elucidating the organismal and

evolutionary processes by which animals adapt and diversify in response to environmental change Placing special emphasis on the important role that underlying physiological hormonal and behavioral mechanisms play in these processes Snowbird not only provides a definitive exploration of the junco s evolutionary history and behavioral and physiological diversity but also underscores the junco s continued importance as a model organism in a time of rapid global climate change By merging often disparate biological fields Snowbird offers biologists across disciplines an integrative framework for further research into adaptation population divergence and the formation of new species Great Dames Elspeth Cameron,Janice Dickin,1997-01-01 This book elucidates the lives and achievements of several Canadian women from different walks of life

Contributions to the History of North American Ornithology William E. Davis (Jr.),Jerome A. Jackson,1995 *Ten Thousand Birds* Tim Birkhead,Jo Wimpenny,Bob Montgomerie,2014-03-01 Ten Thousand Birds provides a thoroughly engaging and authoritative history of modern ornithology tracing how the study of birds has been shaped by a succession of visionary and often controversial personalities and by the unique social and scientific contexts in which these extraordinary individuals worked This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum based discipline focused almost exclusively on the anatomy taxonomy and classification of dead birds It describes how in the early 1900s pioneering individuals such as Erwin Stresemann Ernst Mayr and Julian Huxley recognized the importance of studying live birds in the field and how this shift thrust ornithology into the mainstream of the biological sciences The book tells the stories of eccentrics like Colonel Richard Meinertzhagen a pathological liar who stole specimens from museums and quite likely murdered his wife and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack Niko Tinbergen Robert MacArthur and others who through their studies of birds transformed entire fields of biology Ten Thousand Birds brings this history vividly to life through the work and achievements of those who advanced the field Drawing on a wealth of archival material and in depth interviews this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any other group of organisms **Nature Canada** ,1995 **The Davis Collection of Ornithological and Other Natural History Documents at the Cornell Laboratory of Ornithology** Cornell University.
