New Leadership into the 21St Century Yahya ibn Shabazz, 2003-09-17 Imam W Deen Mohammed said in a public address words make people I believe that a word can be anything that leaves an impression on the minds of human society be it spoken acted out or whatever form it may take all creation is to be seen as a word According to scripture all creation is here as a result of a word spoken by G d so again we say words make people If we can go deeper and look at the mind of the human being and look at what kinds of words that are going into the mental makeup of a person we then can get a better picture of what forms the character of that person We must understand that our physical construction only acts as a vehicle that transports the mind which is the real person So just to view the physical makeup of a

person is not really seeing that person at all It is the ideas the activities the words etc that comes from that persons mind that helps us to see the real person So now we can see the importance of understanding a word like leader Leader a person that leads or has commanding influence or authority over others The director conductor or guide Ship the state condition or quality of something Art skill of office So now we see that not only do we still need leaders but also we must have leaders that have the best interest of the people at heart Leaders with the vision the wisdom knowledge and the integrity to know when to stay or change courses so that not only will they be able to get the people to the next level but will also give the people the knowledge so that they may guide themselves through the rough waters of society When we talk about leadership we should understand that for the subject to even come up there has to be something lacking in the minds of the people in term of where we as a people or as a society want to go and how we are going to reach the goals we have set for ourselves In todays society we hear some foolish people make the statement I dont need a leader Or I follow my self I make my own decisions We must understand that theres not a thought or an idea that we can think of that is our very own We are influenced by the environment that we live in We should also realize that this society is not hap hazard but rather very orchestrated Therefore many decisions that we make become life determining In todays society we are lead to think that all accomplishments have to be material With this kind of thinking we can easily see how a person can become so limited in terms of growth and development and a non contributor to the positive development of human society as a whole Many are influenced by the all pervasiveness of the media which contrary to what those in media would have us believe media is not art mimicking life but rather it helps to set the trends of life We see many people with lots of money especially those in the field of entertainment with little or no vision reach their peak in the early stages of their development and then suddenly crash as a result of the trials of life Still others who desire to have these material accomplishments although never rise to that level still they see it as their lifes goal and in their quest for it they use illegal methods which eventually leaves them dead in the streets or locked up behind bars for a good deal of their young lives Then there are those who continue to struggle to make ends meet and those who do manage to make it up the higher end of the economic ladder Too many of these tend to lose their identity because they have been lead to believe that the goal for the African American community is voting rights or integration and once these goals are achieved then the struggle is over As a consequence of this kind of thinking as African Americans we still see ourselves at the bottom of American society Not only here in America but around the world as well It is unfortunate

A Dangerous Passion Haig Patapan,2021-05-01 A Dangerous Passion argues that leadership and honor are mutually constitutive and that this dynamic relationship fundamentally shapes the character of political practice Haig Patapan shows how our contemporary blindness to this leadership honor dynamic and neglect of the significance of honor and shame in modern politics have caused us to fundamentally misunderstand the nature of leadership We have lost sight of how honor shapes the ambitions and aspirations of those who seek political office and the opportunities and limits it imposes on leaders

when engaging with their followers What has been obscured are the two faces of honor how it is the dangerous passion that fuels the ambitions of the glory seekers to pursue tyranny and empire as well as being the source of good leadership that is founded on noble ambition and sacrifice for the common good Patapan examines classical magnanimity Machiavellian glory and Hobbesian dispersed leadership views that continue to be debated and then offers insights from these debates to illuminate a series of contemporary political challenges for leaders including the politics of fame identity and nationalism

Reconceptualizing Development in the Global Information Age Manuel Castells, Pekka Himanen, 2014-08-29 The conditions in which development, the process by which people individually and collectively enhance their capacities to improve their lives according to their values and interests, operates have significantly changed in the global information age, a period characterized by the technological revolution in information and communication, the rise of the networking form of social organization and the global interdependence of economies and societies. This volume aims to redefine the means and goals of development in this new context, first by characterizing the specific mode of development, informational development, that the authors consider to be the driver of the creation of material wealth in the twenty-first century, secondly by reconceptualizing human development as the fulfilment of human wellbeing in the multidimensionality of the human experience, ultimately affirming dignity as the supreme value of development, thirdly by examining the relationship between informational development and human development. After first setting out its analytical framework, the book brings together a diverse set of empirically rich case studies to illustrate this investigation from across the globe: Silicon Valley, Costa Rica, Chile, South Africa, Finland, the European Union and China, and concludes by attempting to reconceptualize development. It raises important questions and provides observations, including examining the concept of dignity as development, to contribute to a policy debate that should provide specific answers linked to the conditions of each society and be enacted by democratic institutions in a concerted global effort to save humankind while there is still time. **MEGHARIEF**
