Integrating Landscape Ecology Into Natural Resource Management Jianguo Liu, William W. Taylor, 2002-08 The rapidly increasing global population has dramatically increased the demands for natural resources and has caused significant changes in quantity and quality of natural resources To achieve sustainable resource management it is essential to obtain insightful guidance from emerging disciplines such as landscape ecology This text addresses the links between landscape ecology and natural resource management These links are discussed in the context of various landscape types a diverse set of resources and a wide range of management issues A large number of landscape ecology concepts principles and methods are introduced Critical reviews of past management practices and a number of case studies are presented This text provides many guidelines for managing natural resources from a landscape perspective and offers useful suggestions for landscape ecologists to carry out research relevant to natural resource management In addition it will be an ideal supplemental text for graduate and advanced undergraduate ecology courses Wetland Ecology Paul A. Keddy, 2010-07-29 This text provides a synthesis of the existing field of wetland ecology using a few central themes including key environmental factors that produce wetland community types and some unifying problems such as assembly rules restoration and conservation

Applying Ecological Principles to Land Management Virginia H. Dale, Richard A. Haeuber, 2011-06-27 This volume applies ecological principles and guidelines to understand past and current land use and land management and more importantly endeavors to promote more ecologically sound approaches to future land use and management decisions The volume incorporates case studies from a wide variety of disciplines and perspectives The case studies explore past and current land use decisions on both public and private lands and include practical approaches and tools for land use decision making

Perhaps the most important feature of the book is the linking of ecological theory and principle with applied land use decision making the theoretical and empirical are joined through concrete case studies of actual land use decision making processes In this volume readers will find a statement of fundamental ecological principles that are relevant for land use planning and management coupled with multiple in depth explorations of the application of these principles in action In addition most case studies describe specific tools and approaches for incorporating endeavors to join fundamental ecological knowledge with cutting edge application in order to both educate and provide concrete guidance for decision making The intended audience is broad and multidisciplinary from undergraduate and graduate level courses in environmental studies to professional land use planners
