

- **Incapacitation:**

- The detaining of dangerous or delinquent individuals in a secure environment will not ultimately reform the person, necessarily deter 7 them from future crime, or attain real retaliation; however, it will temporarily prevent an offender from further criminal or harmful activity(Morris & Rothman, 1998). Incapacitation is often invoked with habitual offenders in an effort to detain them on long term sentences.

Career Criminals in Society Matt DeLisi, 2005-02-15 More than a century of scientific research has indicated that the majority of crime that occurs in society is committed by a small percentage of the population meaning that most criminals are repeat offenders or career criminals If societies devoted considerable resources toward preventing and neutralizing career criminals there would be dramatic reductions in crime the fear of crime and the assorted costs and collateral consequences of crime *Career Criminals in Society* examines the small but dangerous group of repeat offenders who are most damaging to society The book encourages readers to think critically about the causes of criminal behavior and the potential of the criminal justice system to reduce crime Author Matt DeLisi draws upon his own practitioner experience interviewing criminal defendants to argue that career criminals can be combated only with a combination of prevention efforts and retributive criminal justice system policies

Incapacitation Franklin E. Zimring, 1997 The one sure way that imprisonment prevents crime is by restraining offenders from committing crimes while they are locked up Called incapacitation by experts in criminology this effect has become the dominant justification for imprisonment in the United States where well over a million persons are currently in jails and prisons and public figures who want to appear tough on crime periodically urge that we throw away the key How useful is the modern prison in restraining crime and at what cost How much do we really know about incapacitation and its effectiveness This book is the first comprehensive assessment of incapacitation Zimring and Hawkins show the increasing reliance on restraint to justify imprisonment analyze the existing theories on incapacitation s effects assess the current empirical research report a new study and explore the links between what is known about incapacitation and what it tells us about our criminal justice policy An insightful evaluation of a pressing policy issue Incapacitation is a vital contribution to the current debates on our criminal justice system

The Psychiatrist in the Courtroom Jacques M. Quen, 2013-05-13 Over the course of an illustrious career the late Bernard Diamond established himself as the preeminent

forensic psychiatrist of the century The Psychiatrist in the Courtroom brings together in a single volume Diamond's pivotal contributions to a variety of important issues including the nature of diminished capacity the fallacy of the impartial expert the predictability of dangerousness and the unacceptability of hypnotically facilitated memory in courtroom proceedings Aibly introduced and edited by Jacques M Quen M D a close colleague of Diamond's and leading historian of forensic psychiatry these writings enable experts and neophytes alike to track Diamond's evolving positions while clarifying where current legal and psychiatric opinion converge and diverge on a host of critical topics For the forensic specialist The Psychiatrist in the Courtroom is not only an invaluable reference work but a compassionate reminder of the clinician's obligation to protect patients in legal proceedings And in an age when clinicians are increasingly called into court the book will be no less valuable to psychoanalysts and other mental health professionals eager for an introduction to the intricacies of judicial reasoning Then too owing to Diamond's clinical acumen the book is a compelling human document With great erudition and deep compassion Diamond tackles these and other knotty questions always with an eye to clarifying the legal and clinical implications of the answers By combining superb clinical gifts with an incisive understanding of legal principle Diamond produced a seminal corpus whose relevance to discussions of therapeutic ethics and to legal debates will continue well into the next century

The Violent Offender in the Criminal Justice System, 1982 **Justice Under Pressure** Sheldon Ekland-Olson, William R. Kelly, 2012-12-06 Justice Under Pressure analyzes the effects of prison crowding on the justice system The authors focus on dramatic changes in the administration of criminal justice in Texas during the 1980s and the influence of those changes on the three year survival rates among parolees released between 1984 and 1987 Setting out to identify differences in recidivism and the crime rate as a result of the changes instituted in Texas the authors report the findings of their comparative survival analysis of 4 successive cohorts of parolees plus a chapter specifically directed at a comparative analysis of an emergency release cohort

The final chapter compares prison construction policies and crime rate trends in Texas and California to highlight the major policy implications of the findings This book is of particular interest to criminologists forensic psychologists forensic psychiatrists and students in these fields Thinking About Crime James Q. Wilson,2013-05-14 As crime rates inexorably rose during the tumultuous years of the 1970s disputes over how to handle the violence sweeping the nation quickly escalated James Q Wilson redefined the public debate by offering a brilliant and provocative new argument that criminal activity is largely rational and shaped by the rewards and penalties it offers and forever changed the way Americans think about crime Now with a new foreword by the prominent scholar and best selling author Charles Murray this revised edition of Thinking About Crime introduces a new generation of readers to the theories and ideas that have been so influential in shaping the American justice system *Reform in the Making* Ann Chih Lin,2002-06-10 Is it time to give up on rehabilitating criminals Record numbers of Americans are going to prison and most of them will eventually return to society with a high chance of becoming repeat offenders But a decision to abandon rehabilitation programs now would be premature warns Ann Chih Lin who finds that little attention has been given to how these programs are actually implemented and why they tend to fail In *Reform in the Making* she not only supplies much needed information on the process of program implementation but she also considers its social context the daily realities faced by prison staff and inmates By offering an in depth look at common rehabilitation programs currently in operation education job training and drug treatment and examining how they are used or misused Lin offers a practical approach to understanding their high failure rate and how the situation could be improved Based on extensive observation and over 350 interviews with staff and prisoners in five medium security male prisons the book contrasts successfully implemented programs with subverted abandoned or neglected programs those which staff reject or which do not teach prisoners anything useful Lin explains that staff and prisoners have little patience with programs aimed at long range goals when they must face the ongoing immediate challenge of surviving prison life Finding incentives to make both sides participate fully in rehabilitation is among the book s many contributions to improving prison policy **Subject Catalog** Library of Congress,1979 **Bowker's Law Books and Serials in Print** ,1986
