## **Restructuring Networks In Post Socialism Legacies Linkages And Localities:**

*Restructuring Networks in Post-socialism* Gernot Grabher, David Stark, 1997 In these pages leading sociologists economists and political scientists analyze current changes in Central and Eastern Europe Drawing on a range of contemporary perspectives such as evolutionary economics and network analysis they question many of the assumptions associated with the notion of transition while reporting on changes in organizational forms in Hungary Poland Eastern Germany Russia and the Czech Republic Editors Grabher and Stark offer a book that will appeal not only to students of Central and Eastern European organizational change but also to those interested in social and economic change in general

*Postsocialist Pathways* David Stark, Laszlo Bruszt, 1998-02-28 This book first published in 1998 analyzes democratization and economic change in the postsocialist societies of East Central Europe

**Postcommunist Transformation and the Social Sciences** Frank Bönker, Klaus Müller, Andreas Pickel, 2003-08 The work's major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate

Theorizing Transition John Pickles, Adrian Smith, 2005-08-31 Examining transformations using a variety of perspectives Theorizing Transition provides both a rich empirical map of the dimensions of post Communism and raises important theoretical issues about how we interpret these changes

Democratic and Capitalist Transitions in Eastern Europe M. Dobry, 2012-12-06 here of exchange and borrowing in debates between these disciplines all the more so as we shall see a little further on as the analysis of the Central and East European transformations has also contributed to introduce into political science and sociology theoretical systematizations first formulated in economics In addition to this opening up to the objects and theories of economics the pseudo dilemma of simultaneity produced by a kind of feedback another series of effects on transitology and the related research domains Contrary to most expectations and predictions in the wake of the 1989 upheavals affirmations that the dilemmas problems or challenges of the transitions in Central and Eastern Europe ought to have been dealt with and resolved one after the other in sequence in the manner of the more or less idealized trajectories of Great Britain or Spain trajectories significantly enough promoted far beyond the circles of scholars as a model of transition and above all contrary to the assumption that superposing a radical economic transformation upon a transition to democracy would make the whole edifice thoroughly unworkable unstable or dangerous it must be stated clearly out that the two processes in their simultaneity are not necessarily incompatible This is one of the main findings stressed upon in several chapters of this book

**Articulations of Capital** John Pickles, Adrian Smith, 2016-01-19 Articulations of Capital offers an accessible grounded yet theoretically sophisticated account of the geographies of global production networks value chains and regional development in post socialist Eastern

and Central Europe Proposes a new theorization of global value chains as part of a conjunctural economic geography Develops a set of conceptual and theoretical arguments concerning the regional embeddedness of global production Draws on longitudinal empirical research from over 20 years in the Bulgarian and Slovakian apparel industries Makes a major intervention into the debate over the economic geographies of European integration and EU enlargement **Global Geographies of Post-Socialist Transition** Tassilo Herrschel, 2006-09-27 Since the formal raising of the Iron Curtain there has been much interest in post socialism and the process of post socialist transition This timely book provides a systematic review and analysis of the process of transition Herrschel explores recent theories concepts and debates on post socialism and the notion of transition provides a systematic topical account of post socialist transitions around the world as evidence by social economic and political processes examines case studies of post socialist transition in east and Central Europe the former Soviet Union Asia and South East Asia and Africa and Latin America brings together theoretical and practical aspects by examining what lessons can be learned from recent experiences Global Geographies of Post Socialist Transition provides a truly global comparative account of the meaning and processes of post socialist transition and will be an invaluable resource for all those interested in this area **Domesticating Neo-Liberalism** Alison Stenning, Adrian Smith, Alena Rochovská, Dariusz Świątek, 2011-06-20 Based on in depth research in Poland and Slovakia Domesticating Neo Liberalism addresses how we understand the processes of neo liberalization in post socialist cities Builds upon a vast amount of new research data Examines how households try to sustain their livelihoods at particularly dramatic and difficult times of urban transformation Provides a major contribution to how we theorize the geographies of neo liberalism Offers a conclusion which informs discussions of social policy within European Union enlargement **Regionalism Contested** Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe *Regional Diversity and Local Development in the New Member States* P. Blokker, B. Dallago, 2009-09-16 This book analyzes regional and local models of development in the context of existing socio economic disparities and the impact of EU enlargement and European policy offering a comparative and in depth analysis of the distinct nature of regional differences within Central and Eastern Europe *Constructing Capitalisms* Roderick

Martin,2013-03-28 This book provides an analysis of the changes in business systems of four Central and Eastern European countries Poland Hungary the Czech Republic and Romania since the fall of Communism in 1989 drawing on the Varieties of Capitalism debate      **Reconstructing the Regional Economy** Adrian Smith,1998-06-25 The book focuses on regional and economic change in Eastern and Central Europe using Slovakia as a case study It explains the relationship between industrial change and regional development and discusses fragmentation within the context of the legacy of the state socialist industrialization model      **Dependent Growth: Foreign Investment and the Development of the Automotive Industry in East-Central Europe** Petr Pavlínek,2017-04-07 This book offers a critical analysis of recent developments in the automotive industry of East Central Europe ECE Economists industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success This rapid growth has been based on large inflows of foreign direct investment FDI from Western Europe North America Japan and South Korea and it significantly contributed to GDP growth created thousands of new jobs and completely transformed the previously existing automotive industry in the region This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth It is based on original detailed firm level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers Theoretically and conceptually the analysis will draw on the global production networks and global value chains perspectives Drawing on the original empirical data and on additional available information this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s The upgrading of the automotive industry in East Central Europe through FDI The position of ECE in the automotive industry research and development R D The effects of the 2008 2009 economic crisis in the automotive industry of ECE The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s The effects of FDI on domestic firms in the form of linkages between foreign owned and domestic firms and spillovers from foreign owned to domestic firms      **Work, Employment and Transition** Al Rainnie,Adrian Smith,Adam Swain,2005-07-28 Since the late 1980s the experiences of work and employment in the former communist world have been profoundly transformed Work Employment and Transition brings together a series of essays by leading international scholars which highlights the varied and complex forms that work and employment restructuring are taking in the post soviet world and makes important theoretical contributions to our understanding of these transformations      **From Iron Rice Bowl to Informalization** Sarosh Kuruvilla,Ching Kwan Lee,Mary E. Gallagher,2011-08-15 In the thirty years since the opening of China s economy China s economic growth has been nothing short of phenomenal At the same time however its employment relations system has undergone a gradual but fundamental transformation from stable and permanent employment with good benefits often called the iron rice bowl to a system

characterized by highly precarious employment with no benefits for about 40 percent of the population. Similar transitions have occurred in other countries such as Korea although perhaps not at such a rapid pace as in China. This shift echoes the move from breadwinning careers to contingent employment in the postindustrial United States. In *From Iron Rice Bowl to Informalization*, an interdisciplinary group of authors examines the nature, causes and consequences of informal employment in China at a time of major changes in Chinese society. This book provides a guide to the evolving dynamics among workers, unions, NGOs, employers and the state as they deal with the new landscape of insecure employment. **Europe** Bettina Van Hoven, Tim Unwin, 2016-04-15. First published in 2003, *Europe lives in transition* gives a voice to people living through transition, opening a door for outsiders to understand how such people have lived, an opportunity for one to speak and another to listen. The book has been deliberately written in an accessible, engaging and first-hand manner. Original quotes from various projects are woven together throughout the text. This book focuses explicitly on the experiences of respondents and functions largely to introduce themes and speakers. The principal themes are identities, relationships, production, consumption and power. Except for selected crucial theoretical and methodological discussions, any academic commentary which might overshadow the words of the respondents is kept to a minimum. A key aim is to engage the readers with the text by confronting them with their own preconceptions and geographical imaginations. Each chapter opens with two activity sections to help readers think about the themes in broader terms, for example by doing some research themselves. Each chapter closes with two further activity sections for review and discussion. Region, Regional Identity and Regionalism in Southeastern Europe Klaus Roth, 2008. Southeastern Europe is often portrayed as an area plagued by endemic nationalisms, a view that seems to be confirmed by the break up of Yugoslavia. However, a closer look shows that the nation is not the only territorial unit of identification. Regions play an important role as well, especially those that look back on traditions that differ from those of the national state. Thus the end of socialism also brought forward regional movements which articulated opposition to the dominance of the centralized state. These developments are furthered by the integration into the European Union, whose policy of a Europe of the Regions demands strong regional centres for the administration of structural funds and for the empowerment of the regions. The contributions to this volume address the dynamics of regions, regionalism and regional identities in present Southeast Europe but also look into the history of individual regions. They provide ample material for understanding the complex nature of territorial identification in this rapidly changing part of Europe.

**Economies of Favour After Socialism** David Henig, Nicolette Makovsky, 2017. A volume on the economics of favours and how they function as socially efficacious actions in post-socialist regions including central eastern and south eastern Europe, the former Soviet Union, Mongolia and post-Maoist China. "Clean, Friendly, Profitable"? Carla Bethmann, 2013. Popular with travelers since the 1960s, the Varna region of Bulgaria's Black Sea coast was considered a highly desirable vacation spot within the Eastern Bloc. Since the 1990s, the region has been increasingly integrated into the global tourism

market as a mass tourism destination This book is an ethnographic study of the transformation of Varna's tourism industry after the collapse of socialism It examines the impact of the changing flows on the region and its population addressing wider issues such as the social and economic contours of post socialist transformation in Varna growing stratification within Bulgarian society and the re shaping of Bulgarian national identity between Europe and the Orient Series Halle Studies in the Anthropology of Eurasia Vol 28     **Between Hierarchies and Markets** Grahame Thompson, 2003 This book conducts a survey into the ways in which the word network has been deployed in a wide range of literature In particular it offers a commentary on how the idea of networks has been used to illustrate contemporary forms of socio economic organization as well the idea of a network society or a network state for instance broadly conceived to also include the political aspects of networks BOOK JACKET Book jacket
