Integrative Governance: Generating Sustainable Responses to Global Crises
Margaret Stout, Jeannine M. Love, 2018-07-20 Dominant governance theories are drawn primarily from Euro American sources including emergent theories of network and collaborative governance The authors contest this narrow view and seek a more globally inclusive and transdisciplinary perspective arguing such an approach is more fruitful in addressing the wicked problems of sustainability including social economic and environmental crises This book thus offers and affirms an innovative governance approach that may hold more promise as a universal framework that is not colonizing in nature due to its grounding in relational process assumptions and practices Using a comprehensive Governance Typology that encompasses ontological assumptions psychosocial theory epistemological concepts belief systems ethical concepts political theory economic theory and administrative theory the authors delve deeply into underlying philosophical commitments and carry them into practice through an approach they call Integrative Governance The authors consider ways this approach to radical self governance is already being implemented in the prefigurative politics of contemporary social movements and they invite scholars and activists to imagine governance in contexts of social economic and environmental interconnectedness to use the ideal type as an evaluative tool against which to measure practice and to pursue paradigmatic change through collaborative praxis

intractable disputes Between pessimism masquerading as realism and the unrealistic idealism that we can all get along Forester identifies the middle terrain where disputes do actually get resolved in ways that offer something for all sides Dealing with Differences serves as an authoritative and fundamentally pragmatic pathway for anyone who has to engage in the highly contentious worlds of planning and policymaking

A Radically Democratic Response to Global Governance Margaret Stout, Jeannine M. Love, 2016-12-08 This book presents a critique of dominant governance theories grounded in an understanding of existence as a static discrete mechanistic process while also identifying the failures of theories that assume dynamic alternatives of either a radically collectivist or individualist nature Relationships between ontology and governance practices are established drawing upon a wide range of social political and administrative theory Employing the ideal type method and dialectical analysis to establish meanings the authors develop a typology of four dominant approaches to governance The authors then provide a systematic analysis of each governance approach thoroughly unpacking and critiquing each one and exploring the relationships and movements among them that engender reform and revolution as well as retrenchment and obfuscation of power dynamics After demonstrating that each governance approach has fatal flaws within a diverse global context the authors propose an alternative they call Integrative Governance As a synthesis of the ideal types Integrative Governance is neither individualist nor collectivist while still maintaining the dynamic character required to accommodate responsiveness to cultural contexts

The Social Construction of Public Administration Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today's complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens
