Rethinking Borders John C. Welchman, 2016-07-27 The condition of borders has been crucial to many recent exhibitions conferences and publications But there does not yet exist a convincing critical frame for the discussion of border discourses *Rethinking Borders* offers just such an introduction It develops important contexts in art and architectural theory contemporary film making criticism and cultural politics for the proliferation of border theories and border practices that have marked a new stage in the debates over postmodernism cultural studies and postcolonialism **Rethinking Borders**

John C. Welchman, 1996 The eight essays and three responses collected in *Rethinking Borders* were commissioned from an exciting range of leading younger writers artists and intellectuals whose work has raised significant questions about the border cultures in which we live and have traversed in the middle of the last decade of the twentieth century **Reshaping the World** Ernesto Castañeda, 2021-03-16 This volume provides information and analyses to better grasp the social implications of geographical borders as well as the individuals who travel between them and those who live in border regions Sociologists anthropologists philosophers linguists and scholars of international relations and public health are just some of the authors contributing to *Rethinking Borders* The diversity in the authors disciplines and the topics they focus on exemplify the intricacies of borders and their manifold effects This openness to so many schools of thought stands in contrast to the solidification of stricter borders across the globe The contributions range from case studies of migrants sense of belonging and safety to theoretical discussions about migration and globalization from empirical studies about immigrant practices and exclusionary laws to ethical concerns about the benefits of inclusion It is timely that this collective work is published in the middle of a pandemic that has affected every single part of the world Unprecedented border closures and stringent travel restrictions have not been enough to contain the virus entirely As COVID 19 shows diseases ideas and xenophobic and racist discourses know no borders Plans that transcend borders are vital when dealing with global threats such as climate change and pandemics *Rethinking Borders* Welchman J, **Reshaping the World** Ernesto Castañeda, 2021 This volume provides information and analyses to better grasp the social implications of geographical borders as well as the individuals who travel between them and those who live in border regions Sociologists anthropologists philosophers linguists and scholars of international relations and public health are just some of the authors contributing to *Rethinking Borders* The diversity in the authors disciplines and the topics they focus on exemplify the intricacies of borders and their manifold effects This openness to so many schools of thought stands in contrast to the solidification of stricter borders across the globe The contributions range from case studies of migrants sense of belonging and safety to theoretical discussions about migration and globalization from empirical studies about immigrant practices and exclusionary laws to ethical concerns about the benefits of inclusion It is timely that this collective work is published in the middle of a pandemic that has affected every single part of the world Unprecedented border closures and stringent travel restrictions have not been enough to contain the

virus entirely As COVID 19 shows diseases ideas and xenophobic and racist discourses know no borders Plans that transcend borders are vital when dealing with global threats such as climate change and pandemics **Of Borders and Thresholds**

Michal Kobińska, 1999 The theatre is full of borders and boundaries between the real and illusionary conditions of the stage between the way one acts onstage and in real life between stage and audience performance and reception As such theatre offers a unique opportunity to examine the construction representation and functioning of borders This is the task undertaken by the authors of this volume the first to apply the lexicon and concepts of border theory to theatre history and performance theory The contributors highly regarded theatre historians theorists and practitioners address a wide range of border related themes Their topics include the construction of America in the sixteenth century theatre practices in eighteenth century England American Latino playwrights performances of gender and sexuality cyborg technologies and fashion Intimacy and mobility in an era of hardening borders Haldis Haukanes, Frances Pine, 2021-04-13 This book is a

collection of articles by anthropologists and social scientists concerned with gendered labour care intimacy and sexuality in relation to mobility and the hardening of borders in Europe Interrogating the relation between physical geopolitical borders and ideological conceptual boundaries this book offers a range of vivid and original ethnographic case studies that will capture the imagination of anyone interested in gendered migration policies of inclusion and exclusion and regulation of reproduction and intimacy The first part of the book presents ethnographic and phenomenological discussions of people s changing lives as they cross borders how people shift transgress and reshape moral boundaries of proper gender and kinship behaviour and moral economies of intimacy and sexuality In the second section the focus turns to migrants navigation of social and financial services in their destination countries putting questions about rights and limitations on citizenship at the core The final part of the book scrutinises policy formation at the level of state examining the ways that certain domains become politicised and disputed at different historical junctures while others are left outside of the political *Medicalising borders* Sevasti Trubeta, Christian Promitzer, Paul Weindling, 2021-05-11 The research of pandemics epidemics and pathogens like COVID 19 reaches far beyond the scope of biomedicine It is not only an objective for the health political and social sciences but epidemics and pandemics are a matter of geography foci and vectors of communicable diseases continue to test the efficacy of medical control at state borders This volume illuminates these issues from various disciplinary viewpoints It starts by exploring historical models of quarantine spatial isolation and detention as precautionary means against the dissemination of disease and contagion by border crossers migrants and refugees Besides the patterns of prejudice with which these groups are confronted the book also deals with various kinds of fear of contamination from outside of the nation state The contributors address the implementation of medical techniques at state borders in the twentieth and early twenty first centuries as well as the presently practiced measures of medical and biometric screening of migrants and refugees Uniquely this volume shows that the current border security regimes of Western states exhibit a high share of medicalised

techniques of power which originate both in European modernity and in the medical and biological disciplines developed during the last quarter of the millennium Drawing on the collective expertise of a network of international researchers this interdisciplinary volume is essential reading for those wishing to understand the medicalisation of borders across the globe from the early eighteenth century up to the present day Border abolitionism Martina Tazzioli,2023-07-11 Building on an abolitionist perspective this book offers an essential critique of migration and border policies unsettling the distinction between migrants and citizens This is the only book that brings together carceral abolitionist debates and critical migration literature It explores the multiplication of modes of migration confinement and detention in Europe examining how these are justified in the name of migrants protection It argues that the collective memory of past struggles has partly informed current solidarity movements in support of migrants A grounded critique of migration policies involves challenging the idea that migrants rights go to the detriment of citizens An abolitionist approach to borders entails situating the right to mobility as part of struggle for the commons Border Women Debra A. Castillo,María Socorro Tabuenca Córdoba,2002 A transnational analysis with an emphasis on gender examines the work of women writers from both sides of the border writing in Spanish English or a mixture of the two languages whose work questions the accepted notions of border identities

Boxing Pandora Timothy William Waters,2020-01-07 A timely and provocative challenge to the foundations of our global order why should national borders be unchangeable The inviolability of national borders is an unquestioned pillar of the post World War II international order Fixed borders are believed to encourage stability promote pluralism and discourage nationalism and intolerance But do they What if fixed borders create more problems than they solve and what if permitting borders to change would create more stability and produce more just societies Legal scholar Timothy Waters examines this possibility showing how we arrived at a system of rigidly bordered states and how the real danger to peace is not the desire of people to form new states but the capacity of existing states to resist that desire even with violence He proposes a practical democratically legitimate alternative a right of secession With crises ongoing in the United Kingdom Spain Ukraine Iraq Syria Sudan and many other regions this reassessment of the foundations of our international order is more relevant than ever *The political materialities of borders* Olga Demetriou,Rozita Dimova,2018-10-18 The Political Materialities of Borders seeks to produce social theory at from the border rather than apprehending the border as mere epiphenomenon to urban or state driven social theoretical dynamics it calls for a specificity to the border in border studies as a rejuvenated space for theoretical enquiry **West African Studies Borders and Conflicts in North and West Africa** OECD,Sahel and West Africa Club,2022-02-19 This publication examines the role of border regions in shaping patterns of violence since the end of the 1990s in North and West Africa Using the innovative OECD Spatial Conflict Dynamics indicator SCDi the report looks at the growing relationship between political violence and borderlands at the regional level by analysing more than 170 000 violent events between January 1997 and June 2021 and through the exploration of case studies in the Central

and Eastern Sahel

Borderscaping: Imaginations and Practices of Border Making Dr Chiara Brambilla, Dr Jussi

Laine, Professor Gianluca Bocchi, Professor James W. Scott, 2015-12-28 Using the borderscapes concept this book offers an approach to border studies that expresses the multilevel complexity of borders from the geopolitical to social practice and cultural production at and across the border Accordingly it encourages a productive understanding of the processual de territorialized and dispersed nature of borders and their ensuring regimes in the era of globalization and transnational flows as well as showcasing border research as an interdisciplinary field with its own academic standing Contemporary bordering processes and practices are examined through the borderscapes lens to uncover important connections between borders as a challenge to national and EU policies and borders as potential elements of political innovation through conceptual re framings of social political economic and cultural spaces The authors offer a nuanced and critical re reading and understanding of the border not as an entity to be taken for granted but as a place of investigation and as a resource in terms of the construction of novel geo political imaginations social and spatial imaginaries and cultural images In so doing they suggest that rethinking borders means deconstructing the interweaving between political practices of inclusion exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity The result is a book that proposes a wandering through a constellation of bordering policies discourses practices and images to open new possibilities for thinking mapping acting and living borders under contemporary globalization

Challenging the Borders of Justice in the Age of Migrations Juan Carlos

Velasco, MariaCaterina La Barbera, 2019-04-16 The volume gathers theoretical contributions on human rights and global justice in the context of international migration It addresses the need to reconsider human rights and the theories of justice in connection with the transformation of the social frames of reference that international migrations foster The main goal of this collective volume is to analyze and propose principles of justice that serve to address two main challenges connected to international migrations that are analytically differentiable although inextricably linked in normative terms to better distribute the finite resources of the planet among all its inhabitants and to ensure the recognition of human rights in current migration policies Due to the very nature of the debate on global justice and the implementation of human rights and migration policies this interdisciplinary volume aims at transcending the academic sphere and appeals to a large public through argumentative reflections Challenging the Borders of Justice in the Age of Migrations represents a fresh and timely contribution In a time when national interests are structurally overvalued and borders increasingly strengthened it s a breath of fresh air to read a book in which migration flows are not changed into a threat We simply cannot understand the world around us through the lens of the migration crisis a message the authors of this book have perfectly understood Aimed at a strong link between theories of global justice and policies of border control this timely book combines the normative and empirical to deeply question the way our territorial boundaries are justified Professor Ronald Tinnevelt Radboud University Nijmegen The Netherlands This book is essential reading for those frustrated by the limitations of the dominant ways of thinking about global justice especially in relation to migration By bringing together discussions of global justice cosmopolitan political theory and migration this collection of essays has the potential to transform the way in which we think and debate the critical issues of membership and movement Together they present a critical interdisciplinary approach to international migration human rights and global justice challenging disciplinary borders as well as political ones Professor Phil Cole University of the West of England UK

Border porosities Rozita Dimova, 2021-09-21 This innovative book documents border porosities that have developed and persisted between Greece and North Macedonia over different temporalities and at different localities By drawing on geology s approaches to studying porosity Dimova argues that similar to rocks and minerals that only appear solid and impermeable seemingly impenetrable borders are inevitably traversed by different forms of passage The rich ethnographic case studies from the history of railroads in the southern Balkans border town beauty tourism child refugees during the Greek Civil War mining and environmental activism and the urban renovation project in Skopje show that the political borders between states do not only restrict or regulate the movement of people and things but are also always permeable in ways that exceed state governmentality

Europe's Border Crisis Nick Vaughan-Williams, 2015-10-01 Europe s Border Crisis explores current dynamics in EU border security and migration management It argues that a crisis point has emerged because irregular migrants are seen as both a security threat to the EU and also as a life threatened and in need of protection This leads to paradoxical situations whereby humanitarian policies

and practices expose irregular migrants to often dehumanizing and sometimes lethal border security mechanisms The dominant way of understanding these dynamics one that blames a gap between policy and practice fails to address the deeper issues at stake and ends up perpetuating the terms of the crisis Drawing on conceptual resources in biopolitical theory the book offers an alternative diagnosis and sets out a new research agenda for the interdisciplinary field of critical border and migration studies

Toward a New Art of Border Crossing Ananta Kumar Giri, Arnab Roy Chowdhury, David Blake Willis, 2024-11-05 Boundaries borders and margins are related concepts and realities and each of these can be conceptualized and organized in closed or open ways with degrees of closure or openness The logics of stasis and closure as well as cults of exclusivist and exclusionary sovereignty are reflected and embodied in the closed xenophobic conceptualization and organization of boundaries borders and margins But an open conceptualization of the borderlands where mixing and hybridity take place at a rapid even dizzying pace gives rise to Creolization at the threshold of sovereignties which can also be imagined At present our border zones are spaces of anxiety ridden security arrangements violence and death The existing politics of boundary maintenance is wedded to a cult of sovereignty at various levels which produces bare lives bodies and lands We need the new art of border crossing to be defined by the notion of camaraderie and shared sovereignties and non sovereignties Border zones can also be zones of meetings communication transcendence and festive celebration of the limits of our identities Thus we need a new art and politics of boundary transmutation transformation and transcendence in the broadest possible sense that entails the production of spatial scalar somatic cognitive affective and spiritual transitions

Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state s territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how Placing the Border in Everyday Life complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization
