Rethinking Human Rights Challenges For Theory And Action

Wolfgang Sachs

Rethinking Human Rights Challenges For Theory And Action:

Rethinking Human Rights Smitu Kothari, Harsh Sethi, 1991 Contributed articles in the Indian context most previously published in late 1987 in Lokayan bulletin bimonthly Human Rights, Gender and the Environment Priyam, Manisha, Menon, Krishna, Banerjee, Madhulika, 2010 In *Human Rights Gender and the Environment* the authors unravel the complex themes of human rights gender and the environment basing their approach on the pivotal issue of inequality All three themes manifest unequal relationships that exist between humans and between humans and the environment It discusses human rights gender issues in contemporary India impact of socio economic development on the environment and examines the specific issues of the environment in an international context and presents policies and movements in India

On Humane Governance Richard A. Falk, 1995 This book contends that the forces of late modernism are being caught between a capital driven globalization and a territorially rooted revival of tribalism and ultra nationalism Its critical focus is on global structures that are producing new patterns of North South and rich poor domination as well as exerting dangerous pressures on the carrying capacities of the planet Richard Falk argues that any hopeful response to these threatening developments requires the fundamental revision of such basic ideas as sovereignty democracy and security These organizing conceptions of political life are being reshaped during this era of transition from a state centric world of geopolitics to a more centrally guided world of geogovernance He contends that geogovernance will have adverse consequences for the human condition unless it can be mainly constructed by transnational democratic forces animated by a vision of humane governance This volume was written for the Global Civilization Project of the World Order Models Project WOMP an international group of scholars formed to think creatively about legal and political structures adequate to the needs of the modern world

Environmental Jurisprudence in India C.M. Abraham, 2023-12-11 Within the last two decades India has not only enacted specific legislation on environmental protection but has also virtually created a new fundamental right to a clean environment in the Constitution The models and methods adopted in the Indian context appear at first sight similar to those in other common law systems Yet there are many subtle differences which have changed the structure and content of legal development in India Indian environmental jurisprudence brings out the unique characteristics of a new legal order which has gradually been established in India The distinguishing nature of this jurisprudence as this book shows in detail has three interconnected elements First the nature of the new Indian constitutional law regime accords greater importance to public concerns than protecting private interests Secondly this jurisprudential development reflects certain aspects of Indian legal culture through implicit and explicit reliance on autochthonous values and concepts of law encapsulated in the Indian juristic postulate of dharma Thirdly the emerging Indian environmental jurisprudence bears testimony to the activist role of the Indian judiciary which has also had a significant impact in many areas other than environmental law In short the development of environmental jurisprudence in India manifests neo dharmic jurisprudence in postmodern public law It

accommodates ideas currently voiced by experts around the world for protecting the environment in forms modified by the Indian legal culture

Religion in Global Civil Society Mark Juergensmeyer, 2005-11-03 The extraordinary changes in world society at the beginning of the 21st century have involved religion to a degree that would have amazed earlier observers of modernity Within the past decade religion has been associated with some of the world's most strident forms of political encounter including new movements of nationalism the clerical leadership of political sects and the religiously motivated acts of terrorism Religion seems to be trying to tear the planet apart even as other cultural forces seem to be trying to pull it together The technology of the Internet film television cell phones and other forms of rapid universal communication seem to be knitting the world into a single social fabric Consumer franchises and popular culture seem to be making the world a single global city Religion seems to be at odds with all of this Is religion the natural enemy of globalization The essays in this volume explore the difficulties and possibilities of a diversity of religious groups occupying the same civil society The authors avoid simplistic generalizations Religion they show is not only identified with the culture and politics of the hostile anti urban village it is not simply the jihad that Benjamin Barber identified as the opponent of the homogenous global culture of McWorld True some religious activists have blown things up But others have tried to smooth things over Even the religious opposition to globalization is nuanced Some violent activists like Hindu extremists in India want a new religious state Others like Christian militias or al Qaeda envision a transnational religious entity a kind of religious globalization to supplant the secular one Prophetic religious voices call for moderation justice and environmental protection Religion these essays demonstrate plays diverse and sometimes contradictory roles in the new cultural globalization In a global culture the shared values of different religious traditions can provide a collective sense of virtuous conduct in public life But religion can also support the position of enemies of global society those who see in globalization the effort to impose the values and power of one country over the others
