Rethinking Nature Essays In Environmental Philosophy:

Rethinking Nature Bruce V. Foltz, Robert Frodeman, 2004-11-02 Rethinking Nature brings the voices of leading Continental philosophers into discussion about what is emerging as one of our most pressing and timely concerns the environmental crisis facing our planet The essays featured in this volume embrace environmental philosophy in its broadest sense and include topics such as environmental ethics environmental aesthetics ontology theology gender and the environment and the role of science and technology in forming knowledge about our world Here philosophy goes out into the field and comes back with rich insights and new approaches to environmental problems This far reaching and lively volume affords firm ground for thinking about the multiple ways that humans engage nature Contributors are David Abram Edward S Casey Daniel Cerezuelle Ron Cooper Bruce V Foltz Robert Frodeman Trish Glazebrook James Hatley Robert Kirkman Irene J Klaver Alphonso Lingis Kenneth Maly Diane Michelfelder Elaine P Miller Robert Mugerauer Stephen David Ross John Sallis Ingrid Leman Stefanovic Bruce Wilshire David Wood and Michael E Zimmerman Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity's place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues Conversations With Landscape Karl Benediktsson, Katrín Anna Lund, 2016-05-13 Conversations With Landscape moves beyond the conventional dualisms associated with landscape exploring notions of landscape and its relation with humans through the metaphor of conversation Such an approach conceives of landscape as an actor in the ongoing communication that is inherent in any perception recognising the often ignored mutuality of encounters between human and non human actors With contributions drawn from a variety of disciplines including anthropology geography archaeology philosophy literature and the visual arts this book explores the affects and emotions engendered in the conversations between landscape and humans Offering scope for an original and coherent approach to the study of landscape this book will appeal to scholars and researchers across a range of social sciences and humanities *Inhuman Nature* Jeffrey Jerome Cohen, 2014 Collection of essays examining the ways in which humanity is enmeshed in its surroundings **Linking Ecology and Ethics for a Changing World** Ricardo

Rozzi, S.T.A. Pickett, Clare Palmer, Juan J. Armesto, J. Baird Callicott, 2014-02-06 To comprehensively address the complexities of current socio ecological problems involved in global environmental change it is indispensable to achieve an integration of ecological understanding and ethical values Contemporary science proposes an inclusive ecosystem concept that recognizes humans as components Contemporary environmental ethics includes eco social justice and the realization that as important as biodiversity is cultural diversity inter cultural inter institutional and international collaboration requiring a novel approach known as biocultural conservation Right action in confronting the challenges of the 21st century requires science and ethics to be seamlessly integrated This book resulted from the 14th Cary Conference that brought together leading scholars and practitioners in ecology and environmental philosophy to discuss core terminologies methods questions and practical frameworks for long term socio ecological research education and decision making Hermeneutics of Human-Animal

Relations in the Wake of Rewilding Mateusz Tokarski, 2019-05-21 In consequence of significant social political economic and demographic changes several wildlife species are currently growing in numbers and recolonizing Europe While this is rightly hailed as a success of the environmental movement the return of wildlife brings its own issues As the animals arrive in the places we inhabit we are learning anew that life with wild nature is not easy especially when the accumulated cultural knowledge and experience pertaining to such coexistence have been all but lost This book provides a hermeneutic study of the ways we come to understand the troubling impacts of wildlife by exploring and critically discussing the meanings of ecological discomforts Thus it begins the work of rebuilding the culture of coexistence The cases presented in this book range from crocodile attacks to mice infestations and their analysis consequently builds up an ethics that sees wildlife as active participants in the shaping of human moral and existential reality This book is of interest not only to environmental philosophers who will find here an original contribution to the established ethical discussions but also to wildlife managers and even to those members of the public who themselves struggle to make sense of encounters with their new wild neighbors

From Nature to Creation (The Church and Postmodern Culture) Norman Wirzba, 2015-09-23 How does Christianity change the way we view the natural world In this addition to a critically acclaimed series renowned theologian Norman Wirzba engages philosophers environmentalists and cultural critics to show how the modern concept of nature has been deeply problematic He explains that understanding the world as creation rather than as nature or the environment makes possible an imagination shaped by practices of responsibility and gratitude which can help bring healing to our lands and communities By learning to give thanks for creation as God's gift of life Christians bear witness to the divine love that is reconciling all things to God Named a Best Theology Book of 2015 Englewood Review of Books Best Example of Theology in Conversation with Urgent Contemporary Concerns for 2015 Hearts Minds Bookstore *God, Humanity, and the Universe* Alexei V. Nesteruk, 2023-10-27 The main objective of this book on cosmology and theology is to reassess the current approach to research in the field of interaction mediation and dialogue between modern cosmology and Christian theology Eastern

Orthodox theology in particular This project was part of wide ranging cross disciplinary research undertaken by scientists philosophers and theologians across the world within the framework of Science Orthodoxy around the World run by the National Hellenic Research Foundation Athens from 2019 to 2023 The project and this publication contribute to the large scale academic activity in the field of science and religion or science and theology with a particular accent on the contribution of Eastern Orthodox theology to this dialogue as well as to the venues of advancement of this theology given the recent breakthroughs in cosmology physics and philosophy The book also underlines the importance of expressing cosmological ideas theologically symbolically and scientifically in the wide context of culture and humanity s sociopolitical and environmental predicaments

Gratitude for the Wild Nathaniel Van Yperen, 2019-06-17 Since the passage of the Wilderness Act of 1964 a hotly contested debate over the value of wilderness reveals cultural anxieties about an American society that has spurned limits Gratitude for the Wild explores how the wild known in wilderness raises our tolerance for mystery in the recognition of our limits and in the celebration of a God loved world that exceeds our grasping The idea of wilderness introduces questions about the balance between utility and appreciation and between enjoyment and restraint Wilderness is a nexus of competing and contested accounts of responsibility In conversation with the work of Doug Peacock Terry Tempest Williams James Gustafson and Martin Luther King Jr Nathaniel Van Yperen offers an original argument for how wilderness can evoke a vision of a good life in which creaturely limits are accepted in gratitude even in the face of ambiguity and mystery Through the theme of gratitude the book refocuses attention on the role of affection and testimony in ecological ethics and Christian ethics

New Visions of Nature Martin A. M. Drenthen, F.W. Jozef Keulartz, James Proctor, 2009-07-23 New Visions of Nature focuses on the emergence of these new visions of complex nature in three domains The first selection of essays reflects public visions of nature that is nature as it is experienced encountered and instrumentalized by diverse publics The second selection zooms in on micro nature and explores the world of contemporary genomics The final section returns to the macro world and discusses the ethics of place in present day landscape philosophy and environmental ethics The contributions to this volume explore perceptual and conceptual boundaries between the human and the natural or between an out there and in here They attempt to specify how nature has been publicly and genomically constructed known and described through metaphors and re envisioned in terms of landscape and place By parsing out and rendering explicit these divergent views the volume asks for a re thinking of our relationship with nature

Protecting Nature, Saving Creation Pasquale Gagliardi, Philipp Valentini, 2013-12-05 Can religions help us tackle the ecological crisis we are now facing Can we redefine our relationship with the Earth giving spiritual depth to ecological issues This book attempts to answer these questions by exploring the relationship between ecology and theology

Ecology and the Architectural Imagination

Brook Muller, 2014-02-24 By including ecological concerns in the design process from the outset architecture can enhance life Author Brook Muller understands how a designer's predispositions and poetic judgement in dealing with complex and dynamic ecological systems impact the greenness of built outcomes Ecology and the Architectural Imagination offers a series of speculations on architectural possibility when ecology is embedded from conceptual phases onward how notions of function and structure of ecosystems can inspire ideas of architectural space making and order and how the architect's role and contribution can shift through this engagement As an ecological architect working in increasingly dense urban environments you can create diverse spaces of inhabitation and connect project scale living systems with those at the neighborhood and region scales Equipped with ecological literacy critical thinking and collaboration skills you are empowered to play important roles in the remaking of our cities *Encountering Earth* Trevor George Hunsberger Bechtel, Matt Eaton, Tim Harvie, 2018-05-14 One day Matthew Eaton was walking through an impromptu animal shelter display at his local pet store when suddenly an eight month old kitten dug his claws into Eaton's flesh Eaton recognized that the eyes of this cat and the curve of his claw compelled a response analogous to those found in the writings of Buber Levinas and Derrida And not just Eaton but a whole community of theologians have found themselves in an encounter with particular places and animals that demands rich theological reflection Eaton enlisted fellow editors Harvie and Bechtel to collect the essays in this volume in which theologians listen to horses rats snakes cats dogs and the earth itself who become new theological voices demanding a response In this volume the voice of the more than human world is heard as making theology possible These essays suggest that what we say theologically represents not simply ideas of our own making subsequently superimposed onto the natural world through our own discovery but rather flow from an expressive Earth The Cambridge Companion to Literature and the Environment Louise Westling, 2014 This authoritative collection of rigorous but accessible essays investigates the exciting new interdisciplinary field of environmental literary criticism *Secularism and the Pursuit of Transcendence, Volume II* Stanley E. Porter, Wendy J. Porter, 2025-02-19 We live in a secular age or so we have been told Nevertheless the Christian church strongly believes that we still experience and in fact are surrounded by acts of transcendence encounters with God that often defy imagination and explanation And yet we do try to explain such phenomena whether theologically experientially biblically historically philosophically literarily or even or especially artistically These two volumes are more than just papers from a major conference on secularism and the pursuit of transcendence held at McMaster Divinity College in Hamilton Ontario They contain genuine attempts by people deeply engaged with their secular surroundings to explain what we mean by transcendence Transcendence has been a longstanding topic among the best thinkers of this and previous ages and the same is true for these volumes which include contributions by Charles Taylor Robert Wuthnow Merold Westphal and Christina Gschwandtner but also by a wide range of others who address the question from divergent vantage points The responses vary as much as the orientations of those involved in the

pursuit of defining not only what it means to live in our secular age but to be involved in the pursuit of transcendence or even to perceive the Transcendent's pursuit of us Food Justice in US and Global Contexts Ian Werkheiser, Zachary

Piso, 2017-07-01 This book offers fresh perspectives on issues of food justice. The chapters emerged from a series of annual workshops on food justice held at Michigan State University between 2013 and 2015 which brought together a wide variety of interested people to learn from and work with each other. Food justice can be studied from such diverse perspectives as philosophy, anthropology, economics, gender and sexuality studies, geography, history, literary criticism, philosophy, and sociology, as well as the human dimensions of agricultural and environmental sciences. As such interdisciplinary workshops are a much needed vehicle to improve our understanding of the subject which is at the center of a vibrant and growing discourse not only among academics from a wide range of disciplines but also among policy makers and community activists. The book includes their perspectives offering a wide range of approaches to and conceptions of food justice in a variety of contexts. This invaluable work requires readers to cross boundaries and be open to new ideas based on different assumptions.

Animal Narratology Joela Jacobs, 2020-12-15 Animal Narratology interrogates what it means to narrate, to speak, speak for, on behalf of, and to voice or represent life beyond the human which is in itself as different as insects, bears, and dogs are from each other and yet more as individual as a single mouse, horse, or puma. The varied contributions to this interdisciplinary Special Issue highlight assumptions about the human perception of attitude toward and responsibility for the animals that are read and written about, thus demonstrating that just as the animal does not exist, neither does the human. In their zoopoetic focus, the analyses are aware that animal narratology ultimately always contains an approximation of an animal perspective in human terms and terminology, yet they make clear that what matters is how the animal is approximated and that there is an effort to approach and encounter the non-human in the first place. Many of the analyses come to the conclusion that literary animals give readers the opportunity to expand their own points of view both on themselves and others by adopting another's perspective to the degree that such an endeavor is possible. Ultimately, the contributions call for a recognition of the many spaces, moments, and modes in which human lives are entangled with those of animals, one of which is located within the creative bounds of storytelling Integral Ecology Sean Esbjorn-Hargens, Ph.D., Michael E.

Zimmerman, Ph.D., 2011-03-08 Today there is a bewildering diversity of views on ecology and the natural environment. With more than two hundred distinct and valuable perspectives on the natural world and with scientists, economists, ethicists, activists, philosophers, and others often taking completely different stances on the issues, how can we come to agreement to solve our toughest environmental problems? In response to this pressing need, Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework, one that can be put to use right now. The framework is based on Integral Theory as well as Ken Wilber's AQAL model and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies. Dozens of real-life applications and

examples of this framework currently in use are examined including three in depth case studies work with marine fisheries in Hawai i strategies of eco activists to protect Canada s Great Bear Rainforest and a study of community development in El Salvador In addition eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness Integral Ecology provides the most sophisticated application and extension of Integral Theory available today and as such it serves as a template for any truly integral effort *Integral Ecology* Sean Esbjörn-Hargens,Michael E.
