Choosing Students Wayne Camara, Ernest W. Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions Other contributors however pose broader questions about the nature of selective admissions about institutional responses to the changing demography of those seeking to enter higher education or about the appropriate criteria of success in higher education The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger President at Michigan at the time the court cases were filed is particularly relevant This book brings together the research that underlies a variety of proposed approaches to improving the selection of students Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body this book explores the implications of the assessment component of K 12 school reform for higher education admissions practices The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools as well as for those scholars and scientists who research develop and validate tools for use in the process of choosing students in ways that are congruent with an institution's mission values and goals *Authentic*

*Assessment in Action* Linda Darling-Hammond, Beverly F. Falk, Jacqueline Anness, 2017-10-05 This book examines through case studies of elementary and secondary schools how five schools have developed authentic performance based assessments of students learning and how this work has interacted with and influenced the teaching and learning experiences students encounter in school This important and timely book reveals the changing dynamics of classroom life as it moves from more traditional pedagogy to one that asks students to master intellectual and practical skills that are eminently transferable to real life social settings and workplaces The issue of assessment comes first but we see in the following case studies how it becomes powerfully enveloped in the processes of learning and teaching of informing students teachers parents and others of how the children are doing The portraits explicitly and implicitly suggest a deep fair and defensible way to answer the question How am I doing in a manner that helps this child and eventually every child From the Foreword by Theodore RSizer Informative and thought provoking American Journal of Education

*Validity of Educational Assessments in Chile and Latin America* Jorge Manzi, María Rosa García, Sandy Taut, 2021-09-11 This edited volume presents a systematic analysis of conceptual methodological and applied aspects related to the validation of educational tests used in Latin American countries Inspired by international standards on educational measurement and evaluation this book illustrates efforts that have been made in several countries to validate different types of educational assessments including student learning assessments measurements of non cognitive aspects in students teacher evaluations and tests for certification and selection It gathers the experience of validity studies from the main international assessments in Latin America PISA TIMSS ERCE and ICCS Additionally it shows the challenges that must be taken into account when evaluations are used to compare countries groups or trends of achievement over time The book builds on the premise that measurements in the educational field should not be used if there are no studies that support the validity of the interpretation of their scores or the use made of such tests It shows that despite the recognition given to validity relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use In doing so this volume increases awareness about the relevance of validity especially when assessments are key component of educational policies

SAT Wars Joseph A. Soares, 2015-04-17 What can a college admissions officer safely predict about the future of a 17 year old Are the best and the brightest students the ones who can check off the most correct boxes on a multiple choice exam Or are there better ways of measuring ability and promise In this penetrating and revealing look at high stakes standardized admissions tests Joseph Soares demonstrates the far reaching and mostly negative impact of the tests on American life and calls for nothing less than a national policy change SAT Wars presents a roadmap for rethinking college admissions that moves us past the statistically weak and socially divisive SAT ACT The author advocates for evaluation tools with a greater focus on what youth actually accomplish in high school as a more reliable indicator of qualities that really matter in one's life and to one's ability to contribute to society This up to date book features contributions by well known experts including a piece from Daniel Golden who won a Pulitzer Prize for his reporting in the Wall Street Journal on admissions and a chapter on alternative tests from Robert Sternberg who is the world's most cited living authority on educational research As we continue to debate the use and misuse of standardized testing SAT Wars will be important reading for a wide audience including college administrators and faculty high school guidance counselors education journalists and parents
