Rethinking Education William F. O'Neill, 1983 Educational Ministry in the Logic of the Spirit James E. Loder, 2018-07-20 In November 2001 James E Loder Jr Professor of the Philosophy of Christian Education for forty years at Princeton Theological Seminary suddenly died He was a creative and profound thinker who had just completed a promising book In it he developed a compelling interdisciplinary model to disclose how the divine Spirit affirms reconstitutes and transforms the human spirit to bring new energy and creativity into human experience He called it redemptive transformation You now hold that book in your hands Those who know Loder's work are confident that *Educational Ministry in the Logic of the Spirit* though delayed for over fifteen years will still become the best introduction to his complex thought More important it offers the imaginative means by which we may learn to attune ourselves and our faith communities to what God is doing in our fractured distracted and self destructive world to bring about a revolution of love the fruit of Christ's Spirit and the center of our human vocation Creativity and Innovation in Business and Beyond Leon Mann, Janet Chan, 2011-02-01 In many modern economies creativity the essential prerequisite for innovation tends to be assumed or neglected while the catchphrase innovation dominates the field of business as the key to national performance and competitiveness *Creativity and Innovation in Business and Beyond* illustrates the ways in which creativity spurs innovation and innovation enables creativity not only in the realms of business and management where the innovation is regularly acknowledged and discussed but throughout the social sciences With contributions from experts in fields as far flung as policy history economics economic geography sociology law psychology social psychology and education in addition to business and management this volume explores the manifold avenues for creativity and innovation at many levels including nation region city institution organisation and team across a multitude of sectors and settings **Rethinking Online Education** Bessie Mitsikopoulou, 2015-11-17 *Rethinking Online Education* analyzes online educational materials on the recent Iraq war aimed to be used by U S educators in elementary and secondary schools It is suggested that far from being ideologically neutral these educational materials weave together resources which provide a coherent view of the Iraq war theme and can thus be seen as constituting a kind of an informal curriculum Mitsikopoulou argues that the teacher resources adhere to different pedagogical discourses and constitute materializations of two broad approaches to education A number of pedagogical issues are also raised in the discussion What is the difference between critical thinking and critical pedagogy How is the genre of lesson plan realized in different teaching philosophies and how do curricular texts change when they are delivered online This important book highlights the need to explore the new forms of textuality which emerge from online curricular materials and to develop an understanding of the processes of text composition distribution and consumption *El-Hi Textbooks & Serials in Print, 2005*, 2005 **Rethinking Education Across Borders** Uttam Gaulee, Shyam Sharma, Krishna Bista, 2020-02-14 This book focuses on critical issues and perspectives concerning globally

Rethinking Teacher Education David Hopkins, Ken Reid, 2012-05-04 In recent years there has been a new mood in teacher education The emphasis is on professional studies on encouraging trainee teachers to think intelligently about how to tackle problems of the classroom This book surveys the developments which are taking it further in both Britain and North America It goes on to argue the case for consolidating the new approach in a thoughtful structured and comprehensive way It argues that teacher education should be regarded as a discipline in its own right that teacher education should be increasingly school focused and problem centered that it needs to blend theory more effectively with practice It argues that teacher training programmes should prepare teachers for an uncertain future in a changing world This calls for an emphasis on process rather than content in programmes and the preparing of teachers who are self directed
