## **Retired Except On Demand The Life Of Dr Cicely Williams:**

**Retired, Except on Demand: Life of Dr. Cicely Williams** Sally Craddock,1983 *Retired Except on Demand* Sally Craddock,1983 The life of pediatrician Dr Cecily Williams whose work took her all over the world *A History of Women in Medicine and Medical Research* Dale DeBakcsy,2022-12-15 In the nineteenth century a small but dedicated group of European and American women rose to agitate for the inclusion of women in the medical profession It is a historic tale that we have told and retold for decades but it is far from where the story of women as physicians and healers begins Stretching back into deepest antiquity we possess accounts of women who were consulted by emperors and paupers alike for their medical expertise They were surgeons apothecaries midwives university lecturers and medical researchers in correspondence with the most learned societies of their time And then it all came crashing down A History of Women in Medicine and Medical Research is the story of the women who participated in that early Golden Age and of a medical establishment closing ranks against them so effectively that by the early Victorian era they not only were barred from practicing medicine but from so much as stepping into a classroom where medical topics were being discussed It is the story of that intrepid band of reformers and pioneers who built back the women s medical profession from the ashes and constructed a thriving new community of researchers and practitioners who within a century had retaken not only the ground that had been lost but boldly advanced to levels of fame and achievement unimaginable to any previous era Told through in depth accounts of the lives of the pioneers and practitioners who built and rebuilt the women s medical movement this title dives into the lives of not only legendary figures like Florence Nightingale Gertrude Elion Rosalyn Yalow and Elizabeth Blackwell but visits women the world over whose medical contributions broke down doors and advanced the cause of women s and world health like the revolutionary medieval physician Trota of Salerno the pioneering eighteenth century midwife and businesswoman Madame du Coudray the microbiological research trailblazer Mary Putnam Jacobi and the HIV researcher and world epidemic response coordinator Francoise Barre Sinoussi With over 140 stories spanning three millennia of global medicine this book shines a light on the unknown heroes towering discoveries tragic missteps and profound struggles that have accompanied the Rise Fall and Rebirth of the women s medical profession *History of Medicine, Third Edition* Jacalyn Duffin,2021-06-28 The third edition of this bestselling introduction to medical history has been thoroughly updated to include recent scholarship and new events in major fields of medical endeavor *Ruling Minds* Erik Linstrum,2016-01-04 The British Empire used intelligence tests laboratory studies and psychoanalysis to measure and manage the minds of subjects in distant cultures Challenging assumptions about the role of scientific knowledge in the exercise of power Erik Linstrum shows that psychology did more to reveal the limits of imperial authority than to strengthen it **Bibliography of the History of Medicine** ,1984 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), *Tropical Medicine in the Twentieth Century* Helen J. Power,2012-11-12 First published in 1998 Despite the upsurge of interest in the

history of tropical medicine international public health and the provision of health care in colonial and post colonial tropical countries no major text discusses the history of the academic discipline in the twentieth century In Britain the two Schools of Tropical Medicine opened within six months of each other in the final year of the nineteenth century They have played a pivotal role in developing tropical medicine as an academic discipline in postgraduate medicine with an active research profile The Schools also affected the development of health care in the tropical colonies They trained the Medical Officers of the Colonial Medical Service and the indigenous doctors whose training failed to include infectious endemic diseases and lacked an emphasis on community health The Schools also contributed to a body of knowledge applied by the colonial powers international agencies and independent nation states as part of their health care programmes Ultimately the Schools helped the developing world to establish its own priorities for health This volume charts the history of the Liverpool School of Tropical Medicine from 1898 to 1990 *History of Medicine, Second Edition* Jacalyn Duffin, 2016-10-27 Jacalyn Duffin s History of Medicine has for ten years been one of the leading texts used to teach medical and nursing students the history of their profession It has also been widely used in history courses and by general readers An accessible overview of medical history this new edition is greatly expanded including more information on medicine in the United States Great Britain and in other European countries The book continues to be organized conceptually around the major fields of medical endeavor such as anatomy pharmacology obstetrics and psychiatry and has grown to include a new chapter on public health Years of pedagogic experience medical developments and reader feedback have led to new sections throughout the book on topics including bioethics forensics genetics reproductive technology clinical trials and recent outbreaks of BSE West Nile Virus SARS and anthrax Up to date and filled with pithy examples and teaching tools such as a searchable online bibliography History of Medicine continues to demonstrate the power of historical research to inform current health care practice and enhance cultural understanding *Women in Jamaica*, 1997 The first detailed bibliography of books unpublished reports theses and articles written on women in Jamaica up to 1994 There is no limitation in scope except that newspaper articles are excluded as is material published after 1994 Most of the works identified were written after 1970 as the bulk of the research on women in Jamaica really had its genesis with the declaration of International Women s Year in 1975 Prior to that research seems to have been concentrated on the twin subjects of family and fertility Certain areas are yet to be tapped and recorded but the bibliography by identifying what already exists points to areas where material is lacking Introduction Women in Jamaica is intended for the practitioner the researcher and the tertiary level student and lecturer It cites over 600 works under topical headings such as Arts and Literature Biography Education Economic Conditions and Employment Family and Fertility Health Legal Issues Politics and Social Conditions This volume includes short listings of bibliographies periodicals and audiovisual material **David Livingstone and the Myth of African Poverty and Disease** Sjoerd Rijpma, 2015-06-24 This study about David Livingstone is different from all other publications about him Here Livingstone is

not the main topic of interest the focus of the author is on nutrition and health in pre colonial Africa and Livingstone is his key informant David Livingstone and the Myth of African Poverty and Disease is an unusual book After a close examination of Livingstone s writings and comparative reading of contemporary authors Sjoerd Rijpma has been able to draw cautious conclusions about the relatively favourable conditions of health and nutrition in southern and central Africa during the pre colonial period His findings shed new light on the medical history of Sub Saharan Africa The surprise awaiting travellers in and also before 19th century Africa was that the inhabitants of the interior even the slaves were healthier and better fed than many of their contemporaries in Europe s Industrial Revolution An impressive piece of scholarship truly forensic in its close reading and re reading of Livingstone s published works and those of other travellers during the same era clearly a labour of love which has taken years to complete Joanna Lewis *New Perspectives on the Japanese Occupation in Malaya and Singapore, 1941-1945* Yōji Akashi, Mako Yoshimura, 2008-12-01 Information on the Japanese Occupation of Malaya and Singapore is sparse and Japanese language materials are particularly difficult to find because the Japanese military systematically destroyed war related documents when the war ended The contributors to this volume participated in a Forum that spent four years locating surviving materials relating to the Occupation of Malaya The group had three objectives to collect primary sources to interview Japanese military and civilian officials who took part in the military administration and people in Malaysia and Singapore who experienced the period and to publish the results of the studies Based on interviews with Japanese Malaysians and Singaporeans who lived through the war years and materials gathered from archives and libraries in Britain Malaysia Singapore USA Australia and India the Forum has produced a number of Japanese language publications This book makes available some of their research findings in English Topics covered include the Watanabe Military Administration Japanese research activities in Malaya Japan s Economic Policies Malayan Communist Party Leaders and the Anti Japanese Resistance the Massacre of Chinese in Singapore Railway Transportation during the Japanese Occupation Period The Singapore Internment Camp for Allied Civilian Women and the Japanese Surrender This volume is a revised version of Akashi Yoji ed *Nippon Senryōka no Eiryō Maraya Shingaporu* Tokyo Iwanami Shoten Publishers Co 2001

**Women in Medicine** Laura Windsor, 2002-11-14 The definitive compilation of the inspiring and educational stories of women in medicine through the ages and around the world *Women in Medicine An Encyclopedia* tells the hidden history of healing practitioners Since ancient times and in every human society women have played a critical if unheralded role in the practice and progress of the medical arts and sciences From the 11th century German nun Hildegard of Bingen to early 20th century radiology pioneer Marie Curie to controversial Surgeon General Jocelyn Elders *Women in Medicine* portrays the struggles the skills the science and the inspiring stories of more than 200 of history s great women physicians and medical researchers Not just a biographical compendium *Women in Medicine* also includes entries on the key universities institutes and foundations of this illustrious history Chock full of unique illustrations and complete with extensive bibliography and

**Between Feast and Famine** John Nott,2025-03-18 Ghana s twentieth century was one of dramatic political economic and environmental change Sparked initially by the impositions of colonial rule these transformations had significant if rarely uniform repercussions for the determinants of good and bad nutrition All across this new and uneven polity food production domestic reproduction gender relations and food cultures underwent radical and rapid change This volatile national history was matched only by the scientific instability of nutritional medicine during these same years Moving between the dry Northern savannah the mineral rich and food secure Southern rainforest and the youthful ever expanding cities *Between Feast and Famine* is a comparative history of nutrition in Ghana since the end of the nineteenth century At the heart of this story is an analysis of how an uneven capitalist transformation variously affected the lives of women and children It traces the change from sporadic periods of hunger in the nineteenth and early twentieth centuries through epidemics of childhood malnutrition during the twentieth century and into emergent epidemics of diet related non communicable disease in the twenty first century Employing a novel critical approach to historical epidemiology John Nott argues that detailing the co production of science and its subjects in the past is essential for understanding and improving health in the present Praise for *Between Feast and Famine* This is a tour de force Ghana was an important site for the development of nutritional science in the colonial period as well as a site for its application It is therefore central to the history of a global nutritional science Not only has John Nott pieced together a complex history of that changing science and its application in Ghana in the twentieth century he has also provided a carefully constructed analysis of what was actually happening in terms of food supply health and nutrition in Ghana in this period Few other works manage to do both these things Megan Vaughan Professor of African History and Health Institute of Advanced Studies UCL
