Americans today are poorly prepared to finance their retirement years and such under preparedness is especially acute for members of disadvantaged racial and ethnic minority groups Black and Hispanic families for example have only a quarter of the amount of net private wealth assets minus liabilities compared to White families Moreover racial wealth gaps have not diminished much in the past four decades in part because Whites tend to save more in and withdraw less from employer sponsored retirement plans than do their Black and Hispanic counterparts The studies herein provide a range of perspectives on the causes and consequences of retirement wealth inequality along with suggested opportunities to close the gaps The contributors explore new datasets analyze historical trends in income and wealth disparities and evaluate alternative wealth and inequality measures They also evaluate the roles of differential access to financial housing and human capital and the role of the social security program While the latter is a great equalizer narrowing racial gaps considerably the program faces insolvency and without reform it will be unable to pay full scheduled benefits within a decade This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations

Retirement Security in the Great Recession Christian Weller,2013-09-13 Few events have posed as many challenges for retirement and retirement policy as the crisis of the late 2000s At the end of the last decade the United States experienced the Great Recession a combination of unprecedented wealth losses and historically high unemployment increases that marked the longest economic recession since the Great Depression These adverse economic shocks coincided with the burgeoning entry into retirement by the baby boomer generation those born in the United States between 1946 and 1964 The confluence of these trends meant that retirees may have faced greater economic insecurity than at any point since World War II This book brings together a number of influential researchers whose work is focused on economic policies and their impacts on retirement income security They come from both academic and policy backgrounds Specifically half of the eight contributors are academics while the other four come from think tanks in Washington DC This book is thus intended to combine research and policy This book was published as a special issue of the Journal of Aging and Social Policy

do it yourself retirement schemes and companies like Enron that have left employees without any retirement savings Ghilarducci puts forward a sweeping plan to revive the retirement income system a plan that will ensure that after forty years of work every American will receive 70 percent of their preretirement earnings guaranteed for life No other book makes such a persuasive case for overhauling the pension and Social Security system in order to provide older Americans with the financial stability they have earned and deserve **Democratizing Pension Funds** Ronald B. Davis,2009-01-01 This book will spark a debate concerning the need for democracy and accountability in the governance of trillions of dollars of plan members pension plan assets and the legitimacy of the present mostly unaccountable corporate governance decisions made by these plans The author analyzes the reasons for this passivity pointing to conflicts of interest with respect to corporate governance activity in pension plans and also to limitations in corporate securities and pension law He argues that plan members should be given a voice in pension plan governance and the plans made accountable and he outlines the legal reforms necessary **Social Security Bulletin** ,2009 **Retirement Security and Defined Benefit Pension Plans** United States.
