The Doctrines of US Security Policy Heiko Meiertöns, 2010-06-10 The practise of outlining principles for the conduct of US security policy in so called doctrines is a characteristic feature of US foreign policy From an international lawyer's point of view two aspects of these doctrines are of particular interest First to what degree are the criteria for the use of force as laid down in these doctrines consistent with the limitations for the use of force in international law Second which law creating effects do these doctrines have Furthermore the legal nature of these doctrines remains uncertain These matters are examined beginning with the Monroe Doctrine of 1823 and taking into account the Stimson Doctrine of 1932 the doctrines of the Cold War period and the Bush Doctrine of 2002 The Bush Doctrine in particular has generated controversies concerning its compatibility with Article 51 of the UN Charter due to its principle of preventive self defence

The Evolution of the Doctrine and Practice of Humanitarian Intervention Francis Kofi Abiew, 1999-03-25 The topic of humanitarian intervention has become increasingly significant since the end of the Cold War Despite a substantial body of literature on the subject in the past recent developments justify a contemporary study of the subject This book is not only timely given the crises which have occasioned United Nations interventions over the past several years but enduring as international political structures undergo stress and reform and as international law and international relations theorists grapple with the sovereignty intervention problem It defends the emergence of a right of humanitarian intervention and argues that state sovereignty is not incompatible with humanitarian intervention After a thorough review of historical precedents the book concludes by assessing contemporary developments in terms of sources of support for intervention on humanitarian grounds

Power, Politics, Law: International Law and State Behaviour During International Crises Radhika Withana, 2008-07-31 This volume addresses the question as to where international law fits into the making and implementation of foreign policy during an international crisis in which a State is considering and or may actually use force

Empirical literature on the law State behaviour relationship during international crises has not been able to answer this question adequately The limitations of existing empirical literature are identified as stemming from the limitations of existing positivist realist and functionalist theoretical explanations of the law State behaviour relationship These theoretical approaches which underpin existing empirical literature on international crises assume that international law matches what is referred to in this book as its rule book image This is the notion of international law as a finite set of objective politically neutral rules that can be applied so as to distinguish objectively between legal and illegal action The rule book image of international law does not match reality but the assumption that it is true underpins both theoretical literature and references to international law in political rhetoric The rule book image and the reality of international law have been reconciled within the theory of International law as Ideology ILI as developed by Shirley Scott This book hypothesises that an ILI perspective offers a better explanation of the law State behaviour relationship during international crises than rival explanations grounded in positivism realism or functionalism Four case studies of State behaviour of the US the Soviet Union and the PRC during the Korean War 1950 1953 of the US and UK during the Suez crisis 1956 of the US and the Soviet Union during the Cuban Missile Crisis 1962 and of the US and an alliance of Latin American States during the Dominican Republic crisis 1965 are used to test the hypothesis The findings confirm the greater explanatory efficacy of ILI and demonstrate that the significance of international law to foreign policy decision making during international crises is more than that of deterring the use of force as is assumed by rival theoretical approaches grounded in a rule book image of international law International law is shown to serve as a vehicle for inter State competition during international crises
