Single Cell Protein II:

Single-cell Protein II Steven R. Tannenbaum, 1975 ABSTRACT Technical alternatives for the production of Single Cell Protein SCP and the operational and economic aspects of these alternatives are discussed Topics include 1 SCP for human and animal consumption 2 cell collection fermentation and protein extraction techniques 3 production and processing methods 4 uses of carob agricultural wastes cane coffee whey sulfite liquor methane and yeast in SCP production 5 evaluation methods 6 marketing procedures and 7 international applications and guidelines **Single-cell Protein II**

Steven R. Tannenbaum, Daniel I. C. Wang, 1975 **Single Cell Protein** Israel Goldberg, 2013-03-13 In early 1973 I returned to Israel from a post doctoral fellowship at Harvard University and was accepted as a lecturer in the Department of Applied Microbiology at the Hebrew University of Jerusalem Shortly after my return Professor Richard Mateles who at that time was head of the Department suggested that I purchase a good and comprehensive book on single cell protein SCP in order to expand my general knowledge in the subject I had started then to work on that was microbial utilization of one carbon C compounds I Naturally I took his advice after all he was the Boss and bought the book which was the only general book published on this subject at that time and was based on papers presented at the First International Conference on Single Cell Protein held at the Massachusetts Institute of Technology M I T on October 1967 Mateles and Tannenbaum editors 1 Through this book I became acquainted with the world's hunger problem that existed in the past and ways in which it was to be solved by SCP products prepared from CO fossil based raw 2 materials and from wastes *Single Cell Protein* Jean A.

Larson, 1990 **Single-Cell Protein Safety for Animal and Human Feeding** Silvio Garattini, Silvio Pagliarunga, Nevin S. Scrimshaw, 2013-09-24 Single Cell Protein Safety for Animal and Human Feeding covers the proceedings of the Protein Calorie Advisory Group of the United Nations System Symposium Investigations On Single Cell Protein held at the Istituto di Ricerche Farmacologiche Mario Negri Milan Italy on March 31 April 1 1977 This text is divided into three parts The first part discusses taxonomy and pathogenicity including topics on strengths and weaknesses of traditional criteria in the systematics of yeasts DNA relatedness between physiologically similar strains and species of yeasts and studies of potential pathogenicity of industrial yeasts This book then explains the models of pathogenicity for yeasts of the genus *Candida* as well as the characteristics and comparative studies of this genus Metabolism and toxicology of odd numbered carbon chain fatty acids are also tackled which is the main topic of the second part of this book The last part is concerned mainly with the metabolism and toxicology of alkanes This publication will be invaluable to chemists and students of chemistry and related disciplines

Biotechnology: Economic and Social Aspects E. J. DaSilva,C. Ratledge,A. Sasson,1992-04-30 This book was first published in 1992 This book deals with an area of great importance the issues involved in developing biotechnologically based industries in the developing countries The science and most of the techniques are well established and it is often possible to obtain the desired finance This book however examines the sort of choices that a developing country has to make as to whether to go ahead with any of the projects outlined in the book and their likely socio economic consequences Each chapter is written by experts in their field and discusses the current biotechnologically based industries and their state of development their suitability for various economies and the problems associated with developing them Chapters discuss environmental questions and further socio economic factors that need to be considered in order to bring about successful wealth creation in these countries This book will be invaluable reading for all those interested in biotechnology and its application to the developing world **Biotechnology and Food Ingredients** Israel Goldberg,Richard Williams,1991-02-28 Reviews the successful cases of developing food ingredients by biotechnological processes as a sort of catalogue for people in the food industry Describes the production of proteins vitamins enzymes flavors colors and other ingredients using traditional genetic engineering and entirely new technologies Chapters discuss the various products and sources methodologies and regulation Annotation copyrighted by Book News Inc Portland OR *Methylotrophs : Microbiology. Improvement of Food and Feed Proteins Mendel Friedman, 2013-03-09 The nutritional quality of a protein depends on the
proportion of its amino acids especially the essential amino acids their physio logical availability and the specific
requirements of the consumer Availability varies and depends on protein source interaction with other dietary components
and the consumer s age and physiological state In many foods especially those from plants low levels of various essential
amino acids limits their nutritive value This is particularly important for cereals which may be inadequate in the essential
amino acids isoleucine lysine threonine and tryto phan and legumes which are often poor sources of methionine Moreover
these commodities are principle sources of protein for much of the earth s rapidly growing population At the current annual
growth rate of about 2 percent the world population of about 4 billion will increase to 6 5 billion by the year 2000 and to 17
billion by the year 2050 Five hundred milliQn people are presently estimated to suffer protein malnutrition with about fifteen
thousand daily deaths The ratio of malnourished to adequately nourished will almost surely increase For these reasons and
especially in view of the limited availability of high quality largely animal protein to feed present and future populations
improvement of food and feed quality is especially important **Bibliography of Medical Reviews** , 1976
