Many crime shows and movies deal with the topic of a mysterious disappearance but fictional stories often sensationalize the topic in order to catch the viewer's interest. In reality, finding a missing person can be hard work for detectives as there are sometimes few clues left behind. Readers discover how police use math and science to solve this puzzle. Full color photographs, informative sidebars, and by the numbers fact boxes augment the compelling text, giving readers a more accurate understanding of the process of searching for missing persons than they will find on television or at the movies.

**Missing People** Seth Balfour, 2016-04-18 *The Chilling True Stories Of Strange And Unusual Disappearances*  
Unexplained Missing People And Missing Persons Cases Most of us just skip over the info about missing person cases on the news because our reality doesn't involve losing anyone we like or love. But for those people whose day starts and ends with a prayer of safe homecoming, the reality is cruel, sad, and dark. Not that your reality will be affected if you listen to the missing persons updates, but in an era when no child is left behind, it's shameful to leave behind someone who somebody cares about. Most missing people cases usually end up as murders. A large number of them are just people who are trying to escape their life and forge a new identity. But the most interesting cases are those with few clues and evidence to never be completely solved; the cases remain as mysteries forever. One thing's for sure: even though they say that the truth always wins, missing people cases can prove that with enough planning, money, and power, you can make anybody disappear and get away with it.

**Missing People** Phil Coleman, 2017-09-12 *MISSING PEOPLE: Gone Without A Trace* An FBI study showed in 2014 there were 83,957 people missing in the United States. An average of 750,000 missing persons cases are reported each year, with around 2,000 people being reported missing daily. When a missing person report is filed, the longer the case goes on without the person reappearing, the more likely the missing person in question is dead from either homicide or natural causes. The majority of missing people are white male adults; missing children are rightfully more covered by the media, as studies show that the first three hours after a child is missing is when they are most likely to be murdered if killing the child is the intent of the abductor. With increased technology, improvements in DNA evidence gathering, and better law enforcement, communication, and cooperation, solving missing persons cases should have gotten easier and been more successful over time. However, solving these cases is still difficult, and many are never found. This is the story of some of those cases affecting victims who still remain unfound. Where did these people go? What fate befell them? And will they ever be found? *The Civil Code of the Mongolian People's Republic* Mongolia, 1963 **Assembly Bill** California. Legislature. Assembly, 1985
