*A Visual Catalog of Spanish Frontier Missions, 16th to 19th Centuries* Robert H. Jackson, 2019-02-01 From the sixteenth to the early nineteenth centuries, the Spanish Crown sponsored missions staffed by members of different Catholic missionary orders to evangelize the indigenous populations and engage in social engineering in line with royal policy. The missionaries directed the construction of building complexes that included churches, leaving behind an important historical and architectural legacy. This visual catalog documents the surviving complexes on selected missions on the frontiers of Spanish America in what today is Mexico and parts of South America. It also presents basic historical data on the mission communities, including demographic data and documents damage to early mission buildings by the earthquakes of September 7 and September 19, 2018.

Jackson, 2022-01-17 The Bourbon monarchs who ascended the Spanish throne in 1700 attempted to reform the colonial system they had inherited and in particular to make administration more efficient and cost effective This book analyses one aspect of the Bourbon reforms which was the efforts to transform frontier missions to make the missions more cost effective and to accelerate the integration of indigenous peoples in northern Mexico to European cultural norms In some instances the Crown had funded missions for more than a century but with minimal results The book attempts to show how the mission programs changed and what the consequences especially demographic were for the indigenous peoples brought to live on the missions

**A Visual Catalog of Jesuit Missions in Spanish America** Robert H. **Demographic Change and Ethnic Survival among the Sedentary Populations on the Jesuit Mission Frontiers of Spanish South America, 1609-1803** Robert H. Jackson, 2015-04-14 Beginning in 1609 Jesuit missionaries established missions reductions among sedentary and non sedentary native populations in the larger region defined as the Province of Paraguay Rio de la Plata region eastern Bolivia One consequence of resettlement on the missions was exposure to highly contagious old world crowd diseases such as smallpox and measles Epidemics that occurred about once a generation killed thousands Despite severe mortality crises such as epidemics warfare and famine the native populations living on the missions recovered An analysis of the effects of epidemics and demographic patterns shows that the native populations living on the Paraguay and Chiquitos missions survived and retained a unique ethnic identity A comparative approach that considers demographic patterns among other mission populations place the case study of the Paraguay and Chiquitos missions into context and show how patterns on the Paraguay and Chiquitos missions differed from other mission populations The findings challenge generally held assumptions about Native American historical demography

**Women and the Conquest of California, 1542-1840** Virginia M. Bouvier, 2004-08 Studies of the Spanish conquest in the Americas traditionally have explained European Indian encounters in terms of such factors as geography timing and the charisma of individual conquistadores Yet by reconsidering this history from the perspective of gender roles and relations we see that gender ideology was a key ingredient in the glue that held the conquest together and in turn shaped indigenous behavior toward the conquerors This book tells the hidden story of women during the missionization of California It shows what it was like for women to live and work on that frontier and how race religion age and ethnicity shaped female experiences It explores the suppression of women's experiences and cultural resistance to domination and reveals the many codes of silence regarding the use of force at the missions the treatment of women indigenous ceremonies sexuality and dreams Virginia Bouvier has combed a vast array of sources including mission records journals of explorers and

missionaries novels of chivalry and oral histories and has discovered that female participation in the colonization of California was greater and earlier than most historians have recognized Viewing the conquest through the prism of gender Bouvier gives new meaning to the settling of new lands and attempts to convert indigenous peoples By analyzing the participation of women both Hispanic and Indian in the maintenance of or resistance to the mission system Bouvier restores them to the narrative of the conquest colonization and evangelization of California And by bringing these voices into the chorus of history she creates new harmonies and dissonances that alter and enhance our understanding of both the experience and meaning of conquest

*A Population History of the Missions of the Jesuit Province of Paraquaria* Robert H. Jackson, 2019-05-08

Scholars have debated the demographic consequences for the indigenous populations of the Americas of 1492 the beginning of sustained contact between the Old and New Worlds Some have hypothesized an initial die off of indigenous population resulting from the introduction of highly contagious crowd diseases such as smallpox and measles So called virgin soil epidemics caused catastrophic mortality that culled the indigenous populations and some scholars such as the late Henry Dobyns hypothesized a rate of decline of around 90 percent as epidemics spread across the Americas like a miasmic cloud However over the course of generations the indigenous populations developed immunities to the maladies and recovered This book presents a detailed case study of indigenous populations congregated on Jesuit missions in lowland South America that challenges the basic assumptions of the model of virgin soil epidemics It shows that epidemic mortality varied between communities and that catastrophic mortality occurred on some mission communities generations after first sustained contact It concludes that patterns of demographic change among indigenous populations were far more complex than is often assumed This study is of interest to specialists in historical demography colonial Spanish America Native American history and the history of Spanish frontier missions

Jackson, 2017-07-21 The Spanish crown wanted native peoples in its American territories to be evangelized and to that end facilitated the establishment of missions by various Catholic orders Focusing on the Franciscan missions of the Sierra Gorda in Northern New Spain Mexico and the Jesuit missions of Chiquitos in what is now Bolivia *Frontiers of Evangelization* takes a comparative approach to understanding the experiences of indigenous populations in missions on the frontiers of Spanish America Marshaling a wealth of data from sacramental military and census records Robert H Jackson explores the many factors that influenced the stability of mission settlements including the indigenous communities previous subsistence patterns and family structures the evangelical techniques of the missionary orders the social and political organization within the mission communities and epidemiology in relation to population density and mobility The two orders Jackson s research shows organized and administered their missions very differently The Franciscans took a heavy handed approach and implemented disruptive social policies while the Jesuits engaged in a comparatively kinder and gentler form of colonization Yet the most critical factor to the missions success Jackson finds was the indigenous peoples existing demographic profile in particular their mobility Nonsedentary populations like the Pames and Jonaces of the Sierra Gorda were more prone to demographic collapse once brought into the mission system whereas sedentary groups like the Guaran of Chiquitos experienced robust growth and greater resistance to disease and natural disaster Drawing on more than three decades of scholarly work this analysis of crucial archival material augments our understanding of the role of missions in colonization and the fate of indigenous peoples in Spanish America
