anthropological approach to understanding a particular society by taking the reader through her own discovery of the field explaining her practice of it in Oxford and Japan and then offering a selection of the results and findings she obtained Her work starts with a study of marriage made in a small rural community continues with education and the rearing of children and later turns to consider polite language especially amongst women This lead into a study of wrapping and cultural display for example of gardens and theme parks which became a comparative venture putting Japan in a global context Finally the book sums up change through the period of Hendry s research *Pacific Islands Monthly* ,1956 **New York Times**
