**Venomous Tongues** Sandy Bardsley, 2006 Sandy Bardsley examines the complex relationship between speech and gender in the fourteenth and fifteenth centuries and engages debates on the static nature of women's status after the Black Death Focusing on England *Venomous Tongues* uses a combination of legal literary and artistic sources to show how deviant speech was increasingly feminized in the later Middle Ages Women of all social classes and marital statuses ran the risk of being charged as scolds and local jurisdictions interpreted the label scold in a way that best fit their particular circumstances Indeed Bardsley demonstrates this flexibility of definition helped to ensure the longevity of the term women were punished as scolds as late as the early nineteenth century The tongue according to late medieval moralists was a dangerous weapon that tempted people to sin During the fourteenth and fifteenth centuries clerics railed against blasphemers liars and slanderers while village and town elites prosecuted those who abused officials or committed the newly devised offense of scolding In courts women in particular were prosecuted and punished for insulting others or talking too much in a public setting In literature both men and women were warned about women's propensity to gossip and quarrel while characters such as Noah's Wife and the Wife of Bath demonstrate the development of a stereotypically garrulous woman Visual representations such as depictions of women gossiping in church also reinforced the message that women's speech was likely to be disruptive and deviant

**The Long Fifteenth Century** Helen Cooper, Sally Mapstone, 1997 *The Long Fifteenth Century* is intended as a companion volume to Douglas Gray's ground breaking *Oxford Book of Late Medieval Verse and Prose* and incorporates a bibliography of his published writings Gray's anthology revolutionized critical appreciation of English and Scottish literature of the long fifteenth century from the death of Chaucer to the Reformation but the literature of the period as a whole remains much under read

*Sixteenth-century Identities* A. J. Piesse, 2001 Institutionalism has become one of the dominant strands of theory within contemporary political science Beginning with the challenge to behavioural and rational choice theory issued by March and Olsen institutional analysis has developed into an important alternative to more individualistic approaches to theory and analysis This body of theory has developed in a number of ways and perhaps the most commonly applied version in political science is historical institutionalism that stresses the importance of path dependency in shaping institutional behaviour The fundamental question addressed in this book newly available in paperback is whether institutionalism is useful for the various sub disciplines within political science to which it has been applied and to what extent the assumptions inherent to institutional analysis can be useful for understanding the range of behaviour of individuals and structures in the public sector The book consists of a set of strong essays by noted international scholars from a range of sub disciplines within the field of political science each analysing their area of research from an institutionalist perspective and assessing what contributions this form of theorising has made and can make to that research The result is a balanced and nuanced account of the role of institutions in contemporary political science and a set of suggestions for the further development of institutional theory

The Kingis Quair and Other Prison Poems Mary-Jo Arn, Linne R Mooney, 2005-05-01 Readers have noticed that the fifteenth century saw a remarkable flourishing of poems written in conditions of physical captivity or on the subject of imprisonment The largest body of this poetry is from the pen of Charles of Valois duke of Orleans who was captured by the English at the battle of Agincourt in 1415 and not released until 1440 The longest single poem on the subject is James I of Scotland's *The Kingis Quair* purportedly written at the time of his release from an eighteen year imprisonment in England This volume reflects the wide scope of these prison poems by bringing together a new edition of *The Kingis Quair* a selection from Charles d Orleans *Fortunes Stabilnes* a poem by George Ashby who was imprisoned in London's Fleet prison and the poems of two other poets both anonymous who wrote about physical and or emotional imprisonment

**Corpus Based Studies in English** Magnus Ljung, 2023-11-27. *Corpus based Studies in English* contains selected papers from the seventeenth International Conference on English Language Research on Computerized Corpora (ICAME 17). The topics include parsing and annotation of corpora, discourse studies, lexicography, translation studies, parallel corpora, language variation and change, national varieties, methodology, and English language teaching. The papers on parsing and annotation include discussions of the treatment of irregular forms, semantic/pragmatic labels in air traffic control, a comparison of tagging systems, and a presentation of T-tag lexicon construction. The papers on discourse and lexicography include a study of *like* as a discourse marker, thesaural relations, and the lexicalisation of NPs. In translation studies, one paper discusses explicitness as a universal feature of translation, and the paper on parallel corpora contrasts English and Norwegian. Many papers deal with variation and change; here we find a discussion of dialogue vs. non-dialogue in modern English fiction and an account of verbal disputes in adolescent English. The historical studies deal with e.g. text type evolution, multi-verb words, normalization in Middle English prose, and modalities in Early Modern English. The methodology papers discuss the use in corpus analysis of inferential statistics, probabilistic approaches to anaphora resolution, and multi-method approaches to data. The ELT paper compares the use of the progressive in native and non-native compositions.

**Language History and Linguistic Modelling** Jacek Fisiak, 1997. This work presents a collection of some 130 contributions covering a wide range of topics of interest to historical, theoretical, and applied linguistics alike. A major theme is the development of English, which is examined on several levels in the light of recent linguistic theory. In various papers, the geographical dimension is also treated extensively, with papers on controversial aspects of a variety of studies as well as topical linguistic matters from a more general perspective.

**Language Acquisition and Learnability** Stefano Bertolo, 2001-05-14. *Language Acquisition and Learnability* is an accessible introduction to learnability theory and its interactions with linguistic theories. Working within the Principles and Parameters framework, the book surveys general concepts from formal learning theory and complexity theory together with important findings from developmental psycholinguistics, historical linguistics, and language processing. Written by a team of leading researchers, it examines important techniques that can be used to obtain interesting and empirically testable predictions from parametric theories of language variation and includes chapters on syntax, diachronic syntax, and the relationship between linguistic complexity and the form of parameters. Fully integrated and complete, with a large number of exercises to test readers on their understanding of the material, this book will become essential reading for students and researchers in linguistic theory.
