Since publication of the first edition, environmentalism has become an increasing concern on the global political agenda. Following the Rio Conference and meetings on population, social justice, women, urban settlement and oceans, civil society has increasingly promoted the cause of a more radical agenda ranging from rights to know, fair trade, social empowerment, social justice and civil rights for the oppressed as well as novel forms of accounting and auditing. This new edition is set in the context of a changing environmentalism and a challenged science. It builds on the popularity and applicability of the first

edition and has been fully revised and updated by the existing writing team from the internationally renowned School of Environmental Science at the University of East Anglia Environmental Science for Environmental Management is an essential text for for undergraduate students of environmental science environmental management planning and geography It is invaluable supplementary reading for environmental biology and environmental chemistry courses as well as for engineering economics and business studies
