Silent Moments in Education Colette A. Granger, 2011-01-01 Silent Moments in Education combines autoethnography with psychoanalytic theory and critical discourse analysis in a

unique consideration of the relations teachers and learners forge with knowledge with ideas and with one another Time Travel in Popular Media Matthew Jones, Joan Ormrod, 2015-03-18 In recent years numerous films television series comic books graphic novels and video games have featured time travel narratives with characters jumping backward forward and laterally through time No rules govern time travel in these stories Some characters move by machine some by magic others by unexplained means Sometime travelers can alter the timeline while others are prevented from causing temporal aberrations The fluid forms of imagined time travel have fascinated audiences and prompted debate since at least the 19th century What is behind our fascination with time travel What does it mean to be out of one's own era How do different media tell these stories and what does this reveal about the media's relationship to time This collection of new essays the first to address time travel across a range of media answers these questions by locating time travel narratives within their cultural historical and philosophical contexts Texts discussed include Doctor Who The Terminator The Georgian House Save the Date Back to the Future Inception Source Code and others

Tragedy and the Witness Fred Parker, 2025-04-15 As he dies Hamlet pleads with Horatio to report me aright tell my story This book deals with the task of bearing witness to anguish atrocity and madness as these are staged in the tragic theatre Focusing on the relationship between the protagonist and the onlooker or witness it explores how the tragic figure often and understandably viewed as alien or culpable or profoundly strange struggles to be understood Centred on Shakespeare its wide ranging approach also introduces works by among others the Greeks Racine Ibsen Pirandello Kafka Beckett and Kane The discussion intersects with trauma studies and with psychoanalytic theory especially around how subjective experience is held by others The challenge of entering into such difficult experience is likened to the offering of hospitality to the foreigner or stranger the challenge of overcoming xenophobia Another large concern is with how tragedy represents madness and how far such states of mind may be shared with an audience particularly through the lens of King Lear Written in an accessible style this book grounds tragedy in matters that resonate in common experience from mental breakdown and our need to be heard to questions around grieving trauma and the ethics of telling someone's story

Bibliophobia Brian Cummings, 2022 Richly illustrated with manuscripts printed objects and art works Bibliophobia tells a 5000 year history of writing and of books to give readers a fascinating account of why books matter and how they impact on our lives

The Fantasy of Disability Jeffrey Preston, 2016-07-15 What are the unconscious fantasies circulating in representations of disability What role do these fantasies play in defining the condition of disability What can these fantasies teach us about human vulnerability writ large The Fantasy of Disability explores how popular culture texts such as Degrassi The Next Generation and Glee fantasize about what life with a physical disability must be like while at the same time exerting tremendous pressure on disabled individuals to conform their identity and behaviour to fit within the margins of these societally perpetuated archetypes Rather than merely engaging with how disability is represented though this text investigates how representations of disability reveal their nondisabled producers to

be perpetually anxious subjects doomed to fear not just the disabled subject but the very reality of disability lurking within. Situated at the nexus of disability studies, media studies and psychology, this text presents an innovative way of analyzing representations of disability in popular culture, inverting the psychoanalytic gaze back upon the nondisabled to investigate how disability can become a lens through which to interrogate the normative subject.

Executive Coaching: A Psychodynamic Approach Sandler, Catherine, 2011-10-01. This book aims to provide the reader with a clear and concise introduction to psychodynamic concepts and their application to executive coaching.

Sigmund Freud Michael Jacobs, 2003-03-13. Praise for the First Edition: This is the Second Edition of a book first published in 1992 as part of the Key Figures in Counselling and Psychotherapy series edited by Windy Dryden. It has proved a successful introduction to the life and work of Sigmund Freud. In this present edition, Michael Jacobs takes the opportunity of the new translation of Freud now appearing to offer more suggestions about reading, particularly the papers of technique available through Virago's 2001 publication of the Standard Edition, *The Journal of Analytical Psychology*. In refreshing contrast to most other books on Sigmund Freud, this is a highly accessible account of his life and ideas which focuses on the relevance of Freud's work for contemporary approaches to counselling and psychotherapy. The book provides an overview which is based firmly on Freud's own writings but which goes far beyond a recapitulation of the existing literature to offer fresh insights and some surprises both about Freud the man and his theories. Written by bestselling author Michael Jacobs and now fully updated for its Second Edition, *Sigmund Freud* presents and responds to the criticisms that Freud's work attracted and charts his continuing influence in the 21st century. This is highly recommended reading for those training in counselling and psychotherapy as well as those studying Freud in other contexts. Michael Jacobs is a retired lecturer in Counselling Studies and bestselling author whose publications include, in the same series, *D.W. Winnicott* (SAGE 1995) and *Psychodynamic Counselling in Action* (Second Edition, SAGE 1999).

Toying with Childhood Usha Mudiganti, 2022-02-27. This book studies the dialectic relationship between the image of the child and the toy in literary depictions of childhood in 19th and 20th century Anglo-American fiction. Drawing from the psychoanalytic theories of Sigmund Freud, Anna Freud, D.W. Winnicott and Sudhir Kakar, it analyses themes such as the heterogeneity of childhood and the construction of the ideals of childhood. It explores the linkages between the ideals of childhood in Britain and its travel to America and further dissemination in British India. It discusses the established tropes of childhood such as innocence, a formative period, the centrality of play and the presence of a toy to argue that the mores of childhood are culturally constructed and lead to the reification of a child into an image of perfection. The author problematises the notion of essential innocence and discusses the repercussions of such stereotypes about childhood. The work also highlights parallels between the ideals of childhood established in 19th century Britain and the portrayals of postcolonial Indian childhoods in 20th century Indian English literature. *Toying with Childhood* will be useful for students and researchers of education, childhood studies, psychology, sociology, literature, gender studies and development studies. It will

also appeal to general readers interested in cultural perceptions of childhood literary depictions of children and the works of Sigmund Freud Freud's Principal Case Studies Revisited Helena Texier, Eve Watson, 2025-05-30 Freud's Principal Case Studies Revisited explores Freud's six principal case studies: Dora, Little Hans, Schreber, the Wolf Man, the Rat Man, and the Young Homosexual Girl through the lens of contemporary psychoanalytic practice. Thirteen leading Freudian and Lacanian psychoanalysts reassess these cases in light of their significance to psychoanalytic theory and practice and consider their relevance in the twenty-first century. With new case material, theory, and analysis, the cases are critically reinvigorated and restored to a privileged place within psychoanalysis. Each of the cases is approached via a pairing of two psychoanalysts who engage with the clinical material as well as with each other in addressing their contributions to an assembled audience of clinicians, trainees, and scholars. This book will be of great interest to psychoanalysts in practice and in training as well as psychologists, psychotherapists, and psychiatrists. It will also be relevant for academics and students of psychoanalytic studies, philosophy, critical and cultural theory, social studies, critical psychology, gender and sexuality studies, and queer theory.

The Uses of Psychoanalysis in Working with Children's Emotional Lives Michael O'Loughlin, 2013-03-14 This volume offers very specific illustrations of psychoanalytic ways of thinking and working in both clinical and pedagogical contexts with children. It is designed for professionals who work with infants, children, and adolescents and who are seeking modes of working that respects emotions, that embrace context, and that privilege imagination and possibility. For professionals who already practice in ways that are sympathetic to these modes of working, the scholarly underpinning of this work offers a rationale for taking a stand in favor of emotionally focused, child-centered work and in opposition to systems that negate the lives of children. This book is for caring professionals who devote their lives to creating spaces for children to find their own paths and is intended to serve as a source of sustenance and support for such work. *Psychoanalysis and Literary Theory* Mathew R. Martin, 2022-08-30 Psychoanalysis and Literary Theory introduces the key concepts, figures, and movements of both psychoanalytic theory and the history of literary criticism and theory, engaging with Freud, Žižek, Plato, posthumanism, and beyond. Divided into two parts, concepts and movements, the structure of the book is clear and accessible. Each chapter builds upon the one before, allowing the reader to progress from little or no background in psychoanalysis, philosophy, or literary theory to the ability to engage actively with the relatively sophisticated ideas presented in later sections of the work. Mathew R. Martin consistently directs attention to the task of interpreting texts by illustrating abstract theoretical points with literary texts and at apposite moments provides brief readings of selected texts. This book will be essential reading for academics and students of psychoanalytic studies, literary criticism, and literary theory. **Contemporary Masculinities in Fiction, Film and Television** Brian Baker, 2016-07-28 While masculinity has been an increasingly visible field of study within several disciplines—sociology, literary studies, cultural studies, film and TV—over the last two decades, it is surprising that analysis of contemporary representations of the first part of the century has yet to emerge. Professor Brian Baker, evolving

from his previous work *Masculinities in Fiction and Film Representing Men in Popular Genres 1945-2000* intervenes to rectify the scholarship in the field to produce a wide ranging readable text that deals with films and other texts produced since the year 2000. Focusing on representations of masculinity in cinema, popular fiction and television from the period 2000-2010, he argues that dominant forms of masculinity in Britain and the United States have become increasingly informed by anxiety, trauma and loss, and this has resulted in both narratives that reflect that trauma and others which attempt to return to a more complete and heroic form of masculinity. While focusing on a range of popular genres such as Bond films, war movies, science fiction and the Gothic, the work places close analyses of individual films and texts in their cultural and historical contexts, arguing for the importance of these popular fictions in diagnosing how contemporary Britain and the United States understand themselves and their changing role in the world through the representation of men, fully recognising the issues of race, ethnicity, class, sexuality and age. Baker draws upon current work in mobility studies and in the study of masculinities to produce the first book-length comparative study of masculinity in popular culture of the first decade of the twenty-first century. Edinburgh Companion to Science Fiction and the Medical Humanities Donna

McCormack, Anna McFarlane, Gavin Miller, 2025-03-31. The medical humanities are becoming increasingly important as their first wave is interrogated by a critical approach that aims to uncover the wider possibilities of the field. In conversation with this debate, this volume explores the ways in which science fiction studies can contribute to such discussions. Science fiction challenges techno-optimism and offers a non-realist avenue for the expression of illness experience. Science fiction also estranges its readers from their societies and the medical possibilities inherent in those societies, inviting consideration of how medicine may be complicit with or opposed to other structures of power. By engaging these concerns, this Companion volume offers a unique viewpoint on the power of the future to shape the present. **Envisaging Death** Michele Aaron, 2014-07-18. *Envisaging Death: Visual Culture and Dying* enters the expanding field of Death Studies and connects some of its key interpretive frameworks such as issues of internment, practice, trauma or end-of-life care to visual culture and more than that to visual culture's socio-political, geographic and aesthetic specificities. Where the prevailing picture of death within this field is as a Western experience framed by its denial on one side and its sensationalism on the other, this collection confronts the specifics of death's marginalisation, its experience as local rather than universal, and the precise relationship between the context and the cultural mediation of death. Who and where you are, which part of the world you live in, whether you are famous or wealthy, subject to natural catastrophe, civil unrest or high-tech healthcare, has enormous influence on how your death is marked, imaged and imagined. As such, this book addresses the socio-cultural factors permeating and styling the visual and inevitably material treatment of death and dying in a broad array of personal and national settings. Advanced society has been characterised by an increased distancing of death from the everyday and its distortion or invisibility within the public sphere. The essays collected here return some shape and context and geo-politics to the treatment of death and

dying within contemporary culture and specifically within contemporary visual culture which provides an ever more dominating forum for society's depiction of and dealings with death Charting important new interdisciplinary terrain scholars and practitioners from a wide range of fields address an assortment of cultural mediations of real fictional or fictionalised death They navigate in different ways the fraught policed but always relative distance between the living and the dead which characterises these mediations a distance which works inevitably to reassure and re secure those supposedly untouched by death and dying Envisaging Death whether through discussion of the cemetery landscape the still or moving image the therapeutic or educational art practice addresses how such a distance is reinforced It also crucially explores countless cases of and increasing possibilities for the disruption of this distance With the various crises of current times be they economic environmental or regional such possibilities for this disruption and the altered dynamics of human connection that they represent can only gain in significance

The New Normal Swatie, 2021-04-30 The New Normal explores the relation between the subject and the state after the events of 9 11 that left the world stunned It looks at this relation through the lens of trauma for the mind biopolitics for the body and visibility for the body politic This interpretive frame helps examine how the 9 11 violence created a moment where the mind body and body politic could be redefined after 9 11 In an important theoretical intervention into 21st century American Studies it asks what the relation between the state and those it expels from its citizenry is It makes a special mention of sites of incarceration such as Guantanamo Bay and Abu Ghraib as 9 11 phenomena While referring to sources as diverse as 9 11 poetry political and presidential speeches journalistic accounts atrocity photographs and theories of trauma biopolitics and visibility the book argues for the presence of a new normal

A History of the Modern British Ghost Story S. Hay, 2011-10-27 Ghost stories are always in conversation with novelistic modes with which they are contemporary This book examines examples from Sir Walter Scott Charles Dickens Henry James and Rudyard Kipling amongst others to the end of the twentieth century looking at how they address empire class property history and trauma
