**Landscape Heritage of the World with Google Earth** Andrew Goudie, 2025-09-26 The rationale of this book is to provide carefully selected images from Google Earth to discuss what they show and to provide references to the heritage sites portrayed so that readers can go deeper if they wish. Taking examples from all over the world, this book aims to demonstrate their value for understanding heritage landscapes and for appreciating their aesthetics. It is organised around different types of landscape and the processes that created them rather than regionally or on the basis of age. It includes a large number of archaeological sites that have been designated as UNESCO World Heritage Sites. Google Earth has proved to be important for demonstrating some of the threats that major sites have been exposed to, including during recent wars in the Middle East. The landscapes discussed are those of Water Management, Agricultural Management, War, Burial, Mines, Quarries and Salterns, Cities and Settlements, Tells, Theatres, Amphitheatres and Hippodromes, Churches, Temples, Pagodas and Mosques and Geoglyphs.

**The Past in Contemporary Society: Then, Now** Peter Fowler, 2002-09-11 First published in 2002, Routledge is an imprint of Taylor & Francis, an informal company.

Geography and National Identity David Hooson, 1994-10-20 This volume of especially commissioned essays explores the geography of and the role of geography in national and proto-national identity. Place and national identity are bound together. Attachment to the one is almost always inseparable from the sense of the other. Yet as this volume shows, the articulated self-conscious linking of place and identity is by and large a modern phenomenon that took root in nineteenth-century Europe. The formation of supranational states and the much vaunted globalization of culture led many to believe there would be a progressive dilution of national identities and a growing agglomeration of places and nations into larger state units. Precisely the reverse has taken place. This book explores the connections between identity and homeland, showing how a place may be perceived as archetypal, endowed with love and celebrated in music and poetry, yet be a pretext for violence and war. It examines the evolution of ideas about identity and their manifestations in a wide variety of settings, from the former Soviet Union to the island states of the South Pacific.

**The United Kingdom** Britannica Educational Publishing, 2013-06-01 Despite its comparatively small size, England has been a nation of considerable stature on the international stage for much of its history. As the home of parliamentary government, William Shakespeare and the English language, England has been an influential player in the political and cultural development of nations the world over. The story of England is captured in this compelling volume, which provides an overview of its rich past, remarkable present and promising future.

**Grounds for Review** Andrew C. Theokas, 2004-01-01 In recent decades, suburban growth and the decline of industry have left cities throughout Europe and America searching for creative and effective ways to revitalize blighted areas and reclaim underused land. In *Grounds for Review*, Andrew Theokas examines one particularly exciting tool for reinvigorating urban areas: the garden festival. These

festivals which began in post war Europe have been popular throughout the Continent for decades but are just beginning to gain currency in the United States A garden festival temporarily transforms a previously derelict area such as an abandoned factory lot into a festival of horticulture combining luxurious landscapes with exhibits and carnival rides Most garden festivals last about six months during which time they draw millions of visitors but the success of the fair itself is only the initial step in a detailed plan for urban improvement At the conclusion of the festival funds from its operation are used to transform the grounds once again this time with an eye toward the long term use of the land The enduring result of a successful garden festival is thus the transformation of derelict land into a community asset such as a new urban park or an affordable housing project Theokas considers here fifteen garden festivals in Europe England and the United States in all their dimensions He examines the role they play in stimulating urban redevelopment their effects on the practice of landscape architecture and the contentious debates over their financing purposes and future prospects This highly illustrated volume will serve as a useful introduction to garden festivals for all those interested in urban planning horticulture and the future of cities

Wood, 2002-09-24 New England colonists Wood argues brought with them a cultural predisposition toward dispersed settlements within agricultural spaces called towns and villages Rarely compact in form these communities did however encourage individual landholding By the early nineteenth century town centers where meetinghouses stood began to develop into the center villages we recognize today Just as rural New England began its economic decline Wood shows romantics associated these proto urban places with idealized colonial village communities as the source of both village form and commercial success *Representing the Environment* John R. Gold, George Revill, 2004-08-02 This is an introductory guide to the representations of the environment found in everyday life in nature culture landscape art and in the media These provide an important means of understanding environmental attitudes and decision making Form and Fabric in Landscape Architecture Catherine Dee, 2004-03-01 Form and Fabric in Landscape Architecture provides an original visual approach to the study of landscape architecture by creating a spatial morphology based on use and experience of landscapes It explores aesthetic spatial and experiential concepts by providing a structure through which landscapes can be understood and conceived in design Fabric is the integrated structure of whole landscapes while form refers to the components that make up this fabric Together form and fabric create a morphology of landscape useful for the development of visual spatial design thinking and awareness This book is intended as both an introduction to the discipline for students of landscape architecture architecture and planning and a source of continuing interest for more experienced environmental designers
