political theory Questions about power and identity in the practices of political communication remain central to the rhetorical tradition how do we know that we are not being manipulated by those who seek to persuade us Only a grasp of the techniques of rhetoric and an understanding of how they manifest themselves in contemporary politics argues the author can guide us in answering these perennial questions Politics and Rhetoric draws together in a comprehensive and highly accessible way relevant ideas from discourse analysis classical rhetoric updated to a modern setting relevant issues in contemporary political theory and numerous carefully chosen examples and issues from current politics It will be essential reading for all students of politics and political communications Schools That Change Lew Smith, 2008 Schools That Change integrates equal parts passion and intellect A well crafted contribution to the literature on successful reform and a sophisticated and nuanced book that should be read with care From the Foreword by Michael Fullan Schools have shown themselves to be gifted and talented at resisting and subverting change Lew Smith hands us the keys to the storehouse of insights about how schools can change really change Roland Barth Founder The Principals Center Harvard University Author Lessons Learned Learn from schools that have made meaningful positive and lasting changes With an in depth look at eight schools across the nation winners of the National School Change Awards this illuminating resource shows how schools can transform themselves from low performing into exemplary national status Qualitative research specific examples and portraiture offer an inside view of the day to day dynamics of change in schools This insightful book examines questions such as Why are some schools able to change while other schools cannot Why are people challenged by change What is the best way to measure change What professional characteristics must principals develop to bring about significant and sustainable change Learn how your school can realize substantive change that supports a culture of learning teacher development and enhanced student achievement How to Analyze the Works of Franklin D. Roosevelt Mari Kesselring, 2013-01-01 Presents critiques of the President's speeches and guides readers through the process of analyzing them from different critical angles including biographical Marxist and rhetorical viewpoints Suffolk's Defended Shore Cain Hegarty, Sarah Newsome.2014-06-30 Suffolk's Defended Shore presents an illustrated history of the development of military defences on the Suffolk coast using data collected as part of the English Heritage national survey The survey involved the examination of both modern and historic aerial photographs which led to the creation of a detailed map of the archaeological remains on the county's coast The results of the survey are dominated by evidence for the military defence of the coast reflecting the importance of the Suffolk coast in national defence strategies over many years Extensively illustrated this book highlights the particular importance of historic aerial photographs which provide a different and unique perspective on the coastal defences constructed in World War II Photographs taken during and immediately after this war sometimes provide the only visual record of the rapidly evolving defences from this period Political Ideologies Paul Wetherly, 2017 Political Ideologies provides a broad ranging introduction to both the classical and contemporary political ideologies Adopting a global outlook it

introduces readers to ideologies increasingly global reach and the different national versions of these ideologies Importantly ideologies are presented as frameworks of interpretation and political commitment encouraging readers to evaluate how ideologies work in practice the problematic links between ideas and political action and the impact of ideologies Regular learning features encourage readers to think critically about ideologies and view them as competing and contestable ways of interpreting the world A unique stop and think feature calls for readers to reflect on their own ideological beliefs Provided by For King And Country Brian MacArthur, 2014-02-27 Far more than an anthology FOR KING AND COUNTRY is Brian MacArthur's attempt to write a history of the First World War by drawing on the writings of those who were present at the events they describe Those writings will be drawn from a broad range of sources from most obviously the officers and men who served on the western front at the Somme and elsewhere accounts of fear and tedium horror and occasional joy also from those were left behind on the home front to wait for news of their loved ones As well as letters diary entries and memoir extracts the book will also include the songs sung in the trenches by the men at the front there are poems too the less well known alongside the familiar The material reproduced will be linked by Brian MacArthur's commentary and notes to create a seamless and movingly immediate narrative of the First World War Neo-Liberal Globalism and Social **Sustainable Globalisation**, 2006-06-01 According to mainstream economic thinking inspired by the ideas of Smith Ricardo and others globalisation of the world economy is profitable But unlike these classic writers neoliberal economists pay little attention to the moral and social consequences of economic policies Despite the fact that present social circumstances differ a great deal from those in the time of Smith and Ricardo they keep maintaining that an invisible hand will further social ends In doing so they ignore growing poverty worldwide and the exclusion of countries from the international legal order and of people from the right to social participation and freedom This book pays attention to economic aspects of globalisation and also to philosophical legal social cultural ethical and ecological aspects Its aim is to contribute to possible solutions for worldwide problems that accompany the globalisation process The Europe Dilemma Roger Liddle, 2014-02-20 What is Britain's future in Europe This book revisits an old argument but for dramatically new times The old argument is about Britain's semi detachedness from Europe and whether that posture could ever change The new times are the crisis in the Eurozone and its wider impact on the European Union's future While logic may point to deeper integration the politics associated with the EU s problems make this a significant and possibly insurmountable challenge Where should Britain stand What future should Britain want for the EU And how important is continued membership of the EU for Britain's future This book offers new answers to these questions from the perspective of an author who has combined experience both at the heart of the British Government as Tony Blair's European adviser and with years of understanding Europe from the inside working at a senior level in the European Commission This book will be essential reading for anyone interested in the future of British and European politics **Ideas, Insights and Arguments** Michael Marland, 2008-03-20 A new series of anthologies to get
