Penny Capitalists A Study Of 19th Cent:

The Penny Capitalists John Benson,1983 This work examines the virtually ignored subject of working class entrepreneurial activity during the 19th and early 20th centuries By using a wide variety of oral and other evidence the author shows that far from being destroyed by urban industrial development penny capitalism remained a widespread and vital part of working day life He shows that the survival of penny capitalism has major implications for the understanding of some of the most important issues under discussion in labour and social history

Women's Work, 1840-1940 Elizabeth Roberts,1995-09-28 This volume addresses some of the difficult issues surrounding women s work during a century of social upheaval and demonstrates how hard it is to be precise about the nature and extent of women s occupations It focuses on working class women and the many problems relating to their work full time and part time paid and unpaid outside and inside the home Elizabeth Roberts examines men s attitudes to women s work the difficulties of census enumeration and women s connections with trade unions She also tackles in depth other areas of contention such as the effects of legislation on women s work a family wage and unequal pay and status Dr Roberts study provides a unique overview of an expanding field of social and economic history while her survey of the available literature is a useful guide to further reading

The Legal Concept of Work Zoe Adams,2022 Spanning from the 14th century to the present day The Legal Concept of Work explores how the role of law and legal concepts comes to consider some forms of human labour as work and some forms of human labour as non work and why perceptions of these activities change over time

Cheap Street Victoria Kelley,2019-08-06 From around 1850 London s street markets grew in number and scale giving working class Londoners a site for shopping entertainment and sociability Cheap Street is the first major study of this subject analysing the street markets as a component of London s lively informal economy and providing new insights into urban and consumer geographies

From Physick to Pharmacology Louise Hill Curth,2017-05-15 From Physick to Pharmacology addresses the important albeit neglected history of the distribution and sale of medicinal drugs in England from the sixteenth to the twenty first century The social history of early medicine and the evolution of British retailing are two areas that have attracted considerable attention from academics in recent years That said little work has been done either by medical or business historians on the actual retailing of drugs This book merges the two themes by examining the growth in the retailing of medicinal drugs since late medieval times The six academics contributing essays include both medical and business historians who provide an informed and stimulating perspective on the subject After an introduction setting out the context of drug retailing and surveying the current literature the volume is arranged in a broadly chronological order beginning with Patrick Wallis s study of apothecaries and other medical retailers in early modern London The next chapter by Louise Hill Curth looks at the way the distribution network expanded to encompass a range of other retail outlets to sell new branded pre packaged proprietary drugs Steven King then examines various other ways in which medicines were sold in the

eighteenth century with a focus on itinerant traders This is followed by pieces from Hilary Marland on the rise of chemists and druggists in the nineteenth century and Stuart Anderson on twentieth century community pharmacists The final essay by Judy Slinn examines the marketing and consumption of prescription drugs from the middle of that century until the present day Taken together these essays provide a fascinating insight into the changes and continuities of five centuries of drug retailing in England

More Than Mere Amusement Catriona M. Parratt,2001 This groundbreaking study surveys how working class women restricted by gender time and financial means as well as cultural and social tensions managed to find spheres of leisure and recreation

Love and Toil : Motherhood in Outcast London, 1870-1918 Ellen Ross Professor of Women's Studies Ramapo College,1993-10-19 The history of the British working class has until recently been written with a focus on the workplace or on such male organizations as clubs unions or national political parties This study of mothers in London before World War I stresses the distinctiveness of their experiences from those of other classes and of the post World War I period and demonstrates the ways in which mothers and their domestic choices were essential to the survival and cultural perpetuation of the working classes

The Business of Women Melanie Buddle,2011-01-01 Throughout history Western women have inhabited a conceptual space divorced from the world of business But women have always engaged in business Who were these women and how were they able to justify their work outside the home The Business of Women explores the world of those women who embraced British Columbia s frontier ethos in the early twentieth century In this detailed examination of case studies and quantitative sources Buddle reveals that contrary to expectation the typical businesswoman was not unmarried or particularly rebellious but a woman reconciling her entrepreneurship with her identity as a wife mother or widow This groundbreaking study not only incorporates women into the history of business it challenges commonly held beliefs about women business and the marriage between the two

Women at Work, 1860-1939 Valerie G. Hall,2013 A major contribution to women s history labour history and economic and social history This book examines three different groups of women in coal mining communities in inshore fishing communities and in agricultural labour It demonstrates how the work these groups undertook was fundamental in shaping their experiences as women in different ways and shows that women s experiences varied within class as well as between classes The book illustrates how mining women despite being restricted to domestic roles created through meticulous housekeeping a power base in their homes and rendered their husbands dependent on them while a minority took so active a role in politics that they were said to be the backbone of the Labour Party how fisher women engaging in a household economy reminiscent of pre modern times exercised great influence on financial decision making through their roles in baiting lines and selling fish and how some single female agricultural labourers exercised considerable autonomy whereas those who were tied in a family economy had little independence Overall the book makes a very significant contribution to women s history to labour history and to economic and social history This is a tremendously useful and relevant book for historians of women as well as social and labor

historians Professor Joan Scott Institute of Advanced Studies Princeton University VALERIE HALL is Professor Emerita of History at William Peace University North Carolina

Behind the Counter Pamela Horn, 2015-01-15 The story of the shopworkers who emerged during the Victorian and Edwardian era to cater for all clientele from behind the counters of the increasing number of shops and lavish department stores

Darts in England, 1900-39 Patrick Chaplin, 2018-09-30 Drawing on an eclectic range of primary and secondary sources Chaplin examines the development of darts in the context of English society in the early twentieth century He reveals how darts was transformed during the interwar years to become one of the most popular recreations in England not just amongst working class men and to a lesser extent working class women but even to some extent among the middle and upper classes This book assesses the social economic and cultural forces behind this transformation This work also considers the growth of the darts manufacturing industry and assesses the overall effect the growing popularity of darts had on interwar society and popular culture with particular reference to the changing culture and form of the English public house This original study will be of interest to sports historians social historians business historians sociologists and sports scientists

Against Socialist Illusion - A Radical Argument David Selbourne, 1984-11-01

Cultures of Selling Laura Ugolini, 2018-12-07 The study of consumption and its relationship to cultural and social values has become a vibrant and important field in recent years Hitherto however relatively few detailed and full length works on this topic have been published In what will become a seminal volume this book examines retail selling in various historical contexts and locations as both an activity at once mundane and almost universal The book introduces the reader to the existing literature relevant to the subject and explores the widespread perceptions of moral ambiguity surrounding the practice of selling consumer goods ranging from concerns about the adulteration of goods to fears about sharp practice on the part of retailers and places such concerns in the context of wider societal values and ideas The ambivalence towards retail selling and sellers is also a central focus of the collection focussing on the attempts by retailers to develop selling techniques and successful practices of salesmanship and at the same time establish widely shared understandings of good retailing The book also delves into the more dubious practices of retail selling including practices on the margin of legality the issue of credit and changing attitudes towards debt Uniquely the book examines how sales techniques relate to the wider context of a whole shopping experience or shopping environment Taken as a whole this volume will provide a first port of call for students researchers and others interested in exploring consumer cultures and the cultural norms and practices involved in the sale of consumer goods in various historical periods and geographical contexts

Using Computers in History M.J. Lewis, Roger Lloyd-Jones, 2005-11-23 Using Computers in History is designed to introduce students to historical computing through practical workshop exercises With topics such as the pattern of nineteenth century emigration from the UK the performance of the American and German economies in the 1930s and the Lancashire cotton industry Lloyd Jones and Lewis explain and illustrate the possible uses of the computer for the historian

Using Computers in History raises awareness of the use of computers as an important tool for the historian provides a practical introduction to basic computer terminology includes high quality diagrams of the screen displays which should appear at each stage examines the use of spreadsheets and how to design and work with them discusses the different software packages available concentrating on Microsoft Excel 4 includes spreadsheet exercises based around a range of historical data sets explores the use of databases shows how to construct them gives guidelines for further study prompts students to apply the skills they have learnt to a number of examples *Men and Menswear* Laura Ugolini,2017-03-02 Despite increasing academic interest in both the study of masculinity and the history of consumption there are still few published studies that bring together both concerns By investigating the changing nature of the retailing of menswear this book illuminates wider aspects of masculine identity as well as patterns of male consumption between the years 1880 and 1939 While previous historical studies of masculinity have focused overwhelmingly on the moral spiritual and physical characteristics associated with notions of manliness this book considers the relationship between men and activities which were widely considered to be at least potentially unmanly selling as well as buying clothes thus shedding new light on men s lives and identities in this period **They Worked All Their Lives** Carl Chinn,1988 The Social Cost of Cheap Food Sébastien Rioux,2019-09-26 The distribution of food played a considerable yet largely unrecognized role in the economic history of Victorian and Edwardian Britain In the midst of rapid urbanization and industrialization retail competition intensified and the channels by which food made it to the market became vital to the country s economic success Illustrating the pivotal importance of food distribution in Britain between 1830 and 1914 The Social Cost of Cheap Food argues that labour exploitation in the distribution system was the key to cheap food Through an analysis of labour dynamics and institutional changes in the distributive sector S bastien Rioux demonstrates that economic development and the rising living standards of the working class were premised upon the growing insecurity and chronic poverty of street sellers shop assistants and small shopkeepers Rioux reveals that food distribution far from being a passive sphere of economic activity provided a dynamic space for the reduction of food prices Positing food distribution as a core element of social and economic development under capitalism The Social Cost of Cheap Food reflects on the transformation of the labour market and its intricate connection to the history of food and society **Love and Toil** Ellen Ross,1993 The feisty warm hearted mum has long figured as a symbol of the working class in Britain yet working class history has emphasized male organizations such as clubs unions or political parties Investigating a different dimension of social history Love and Toil focuses on motherhood among the London poor in the late Victorian and Edwardian years and on the cultures communities and ties with husbands and children that women created Mothers skills in managing the family budget earning income and caring for their children were critical in protecting households from the worst hardships of industrial capitalism yet poverty or the threat of it molded intimate relationships and left its imprint on personalities This book is also a case study demonstrating the larger argument

that the concept of motherhood is more socially and historically constructed than biologically determined Shaky household economics pressure toward respectability the close proximity of neighbors the precariousness of infant and child life and little chance of better lives for their children shaped the work and emotions of motherhood much more than did the biological experiences of pregnancy birth and lactation This beautifully written book embellished with Cockney slang and music hall songs addresses fascinating questions in the fields of women s studies labor history social policy and family history pub description

The British Building Industry Since 1800 Christopher G. Powell, 1996 Powell introduces and describes two centuries of building activity and the building industry addressing such questions as why and what was built who decided to build and how they did so

The Petite Bourgeoisie in Europe 1780-1914 Geoffrey Crossick, Heinz-Gerhard Haupt, 2021-02-25 First published in 1995 Geoffrey Crossick and Heinz Gerhard Haupt provide a major overview of the social economic cultural and political development of the petite bourgeoisie in eighteenth nineteenth and early twentieth century Europe Through comparative analysis the authors examine issues such as the centrality of small enterprise to industrial change the importance of family and locality to the petit bourgeois world the search for stability and status and the associated political move to the right This title will be of interest to students of history
