Pensees Notes On Religion And Other Subjects:

Pensées Blaise Pascal, 1960 *Pensées* Blaise Pascal, 2021-11-14

Pensées Blaise Pascal From the notes for Pascal's contemplated Apology for the Christian Religion the Port Royalists compiled and edited the book known as his *Pensées* or Thoughts The early texts were much tampered with and the material has been frequently rearranged but now at last it is possible to read these fragmentary jottings as they came from the hand of their author In spite of their incompleteness and frequent incoherence the Thoughts have long held a high place among the great religious classics Much of the theological argument implied in these utterances has little appeal to the modern mind but the acuteness of the observation of human life the subtlety of the reasoning the combination of precision and fervid imagination in the expression make this a book to which the discerning mind can return again and again for insight and inspiration

The Aphorism and Other Short Forms Ben Grant, 2016-05-20 The aphorism captures a huge amount of truth meaning or wit in a very short statement It has been used and studied from classical times to contemporary theory and takes on a new relevance when we look at today's communication media such as text messages and twitter This concise guide offers an overview of The history of the aphorism to the present day Its relation to other short forms including the fragment the proverb the maxim the haiku the epigram and the quotation The use of the aphorism by authors such as Heraclitus Bacon La Rochefoucauld Chuang Tzu Blake Schlegel Emerson Nietzsche Wilde Woolf and Barthes The interdisciplinary nature of the aphorism bringing together science philosophy literature and religion Exploring all the key aspects of the form Ben Grant guides readers through this large and lively area in a wide ranging and critically informed study of the aphorism

Infinity, Faith, and Time John Spencer Hill, 1997-11-26 In Part 1 Hill examines the effect of the idea of spatial infinity on seventeenth century literature arguing that the metaphysical cosmology of Nicholas of Cusa provided Renaissance writers such as Pascal Traherne and Milton with a way to construe the vastness of space as the symbol of human spiritual potential Focusing on time in Part 2 Hill reveals that faced with the inexorability of time Christian humanists turned to St Augustine to develop a philosophy that interpreted temporal passage as the necessary condition of experience without making it the essence or ultimate measure of human purpose Hill's analysis centres on Shakespeare whose experiments with the shapes of time comprise a gallery of heuristic time centred fictions that attempt to explain the consequences of human existence in time *Infinity Faith and Time* reveals that the sixteenth and seventeenth centuries were a period during which individuals were able with more success than in later times to make room for new ideas without rejecting old beliefs

The Aesthetics of Argument Martin Warner, 2016-02-04 Argument and imagination are often interdependent The Aesthetics of Argument is concerned with how this relationship may bear on argument's concern with truth not just persuasion and with the enhancement of understanding such interdependence may bring The rationality of argument conceived as the advancement of reasons for or against a claim is not simply a matter of deductive validity Whether arguments are relevant have force or look foolish or whether an example

is telling or merely illustrative cannot always be assessed in these terms Martin Warner presents a series of case studies which explore how analogy metaphor narrative image and symbol can be used in different ways to frame one domain in terms of another severally or in various combinations and how criteria drawn from the study of imaginative literature may have a bearing on their truth aptness Such framing can be particularly effective in argumentative roles which invite self interrogation as Plato saw long ago Narrative in such cases may be fictional whether parabolic or dramatic autobiographical or biographical and in certain cases may seek to show how standard conceptualizations are inadequate Beyond this whether in poetry or prose and not only with respect to narrative the logic of imagery enables us to make principled sense of our capacity to grasp imagistically elements of our experience through words whose use at the imaginative level has transformed their standard conceptual relationships and hence judge the credibility of associated arguments Assessment of the argumentative imagination requires criteria drawn not only from dialectic and rhetoric but also from poetics

The Holy and the Daemonic from Sir Thomas Browne to William Blake Robert D. Noble in Reason, Infinite in Faculty A.W. Moore, 2012-09-10 In this bold and innovative new work Adrian Moore poses the question of whether it is possible for ethical thinking to be grounded in pure reason In order to understand and answer this question he takes a refreshing and challenging look at Kant's moral and religious philosophy Identifying three Kantian Themes morality freedom and religion and presenting variations on each of these themes in turn Moore concedes that there are difficulties with the Kantian view that morality can be governed by pure reason He does however defend a closely related view involving a notion of reason as socially and culturally conditioned In the course of doing this Moore considers in detail ideas at the heart of Kant's thought such as the categorical imperative free will evil hope eternal life and God He also makes creative use of the ideas in contemporary philosophy both within the analytic tradition and outside it such as thick ethical concepts forms of life and becoming those that we are Throughout the book a guiding precept is that to be rational is to make sense and that nothing is of greater value to use than making sense

Walter Benjamin M. Kohlenbach, 2002-09-06 Walter Benjamin's work represents one of the most radical and controversial responses to the problems of twentieth century culture and society This new interpretation analyzes some of the central enigmatic features of his writing arguing that they result from the co presence of religious scepticism and the desire for a religious foundation of social life Margarete Kohlenbach focuses on the structure of self reference as an expression of Benjamin's sceptical religiosity and examines its significance in his writing on language literature and the cinema as well as history politics and modern technology

Pensées Blaise Pascal, 1973

A Bloody and Barbarous God Petra Mundik, 2016-05-15 A Bloody and Barbarous God investigates the relationship between gnosticism a system of thought that argues that the cosmos is evil and that the human spirit must strive for liberation from manifest existence and the perennial philosophy a study of the highest common factor in all esoteric religions and how these traditions have influenced the later novels of Cormac McCarthy namely Blood Meridian All the Pretty Horses The Crossing Cities of the Plain No Country for Old Men and The Road Mundik argues that McCarthy continually strives to evolve an explanatory theodicy throughout his work and that his novels are to a lesser or greater extent concerned with the meaning of human existence in relation to the presence of evil and the nature of the divine

Pensées; , 1973

Religion and the Domestication of Dissent Russell T. McCutcheon, 2025-06-27 In its first edition Religion and the Domestication of Dissent focused on the representations of Islam that circulated in the wake of the 9 11 attacks representations that scholars pundits and politicians alike used either to essentialize and demonize it or instead to isolate specific aspects as apolitical and thus tolerable faith This little book's larger

thesis therefore argued for how the classifications that we routinely use to identify and thereby negotiate our social worlds notably such categories as religion or faith are explicitly political This new edition which updates the first and adds a new closing chapter continues to be relevant today a time when assertions concerning supposedly authentic and homogenous identities whether shared by us or them continue to animate a variety of public debates where the stakes remain high Thinking back on how Islam was often portrayed in scholarship and popular media in western Europe and North America offers lessons for how debates today unfold on such topics as Christian nationalism a designation now prominent among pundits intent on identifying the proper and improper ways in which religion intersects with modern political life But it is this very distinction between religion and politics that ought to be attracting our attention if we are interested not in which way of being religious is right or reasonable but instead in determining why some social groups are known as religious in the first place Seeing the latter question as linked to studying how socially formative categories function in liberal democracies Religion and the Domestication of Dissent offers an anthropology of the present when the longstanding mechanisms of liberal governance seem to be under threat

The Crisis of Meaning and the Life-World Ľubica Učník, 2016-12-15 In The Crisis of Meaning and the Life World ubica U n k examines the existential conflict that formed the focus of Edmund Husserl s final work which she argues is very much with us today how to reconcile scientific rationality with the meaning of human existence To investigate this conundrum she places Husserl in dialogue with three of his most important successors Martin Heidegger Hannah Arendt and Jan Pato ka For Husserl 1930s Europe was characterized by a growing irrationalism that threatened to undermine its legacy of rational inquiry Technological advancement in the sciences Husserl argued had led science to forget its own foundations in the primary life world the world of lived experience Renewing Husserl s concerns in today s context U n k first provides an original and compelling reading of his oeuvre through the lens of the formalization of the sciences then traces the unfolding of this problem through the work of Heidegger Arendt and Pato ka Although many scholars have written on Arendt none until now has connected her philosophical thought with that of Czech phenomenologist Jan Pato ka U n k provides invaluable access to the work of the latter who remains understudied in the English language She shows that together these four thinkers offer new challenges to the way we approach key issues confronting us today providing us with ways to reconsider truth freedom and human responsibility in the face of the postmodern critique of metanarratives and a growing philosophical interest in new forms of materialism
