Pensions in the European Union: Adapting to Economic and Social Change Gerard Hughes, Jim Stewart, 2012-12-06 The ageing financial and labour market challenges facing the old age pension systems of the member states of the European Union are well known Those who cast doubt on the ability of the present system of pension provision at least to the extent that it is pay as you go financed to cope with the problems posed by these challenges are getting more vociferous Increasingly there are calls for pay as you go systems to be cut back and for funded systems to be expanded This book contests the view that funding is the answer It shows how adaptable the largely pay as you go old age pension systems in the European Union are Actuaries economists lawyers political scientists pension advisers and sociologists from nine European countries and the United States consider four main themes population ageing competitiveness and retirement pension financing and economic growth adapting pension systems to meet change and decision making processes They argue that pay as you go financed old age pension systems in the European Union have the ability to successfully adapt to economic and social change provided they do not take on too many non insurance related risks Solving the problems of the labour market and controlling the direction and extent of economic development are beyond the powers of old age pension systems regardless of how they are structured or financed Separate budgets for separate risks is an indispensable principle if the complex processes of social protection are to be successfully managed monitored and made transparent There can be no single plan for the future development of old age pension systems which would be universally valid for all the countries of the European Union A single solution cannot take into account the special circumstances obtaining in every nation and since respect for the special features of national systems is the basis of popular acceptance the way forward is to reform existing systems in existing contexts *Pensions in the European Union: Adapting to Economic and Social Change* Gerard Hughes, Jim Stewart, 2000-06-30 The ageing financial and labour market challenges facing the old age pension systems of the member states of the European Union are well known This book contests the view that funding is the answer It shows how adaptable the largely pay as you go old age pension systems in the EU are The Future of Pension Plans in the EU Internal Market Nazaré da Costa Cabral, Nuno Cunha Rodrigues, 2019-11-26 This edited volume takes a closer look at various European pension plan models and the recent challenges trends and predictions related to the design of such schemes The contributors analyse new ideas both from national governments and European institutions and consider current debates on topics such as the Capital Markets Union CMU and the so called European Pillar of Social Rights calling for a new approach to social policy at the European level in response to common challenges such as ageing and the digital revolution This interdisciplinary work embraces economic financial and legal perspectives while focusing on previously selected coherence aspects in order to ensure that the analyses are comprehensive and globally consistent *The Evolution of Supplementary Pensions* Kolaczkowski, James, Maher, Michelle, Stevens, Yves, Werbrouck, Jakob M., 2022-01-18 Presenting the evolution of

Mierzejewski, 2016-03-04 A History of the German Public Pension System Continuity amid Change provides the first comprehensive institutional history of the German public pension system from its origins in the late nineteenth century to the major reform period in the early twenty first century Relying on a wide range sources including many used for the first time this study provides a balanced account of how the pension system has coped with major challenges such as Germany's defeat in two world wars inflation the Great Depression the demographic transition political risk reunification and changing gender roles It shows that while the pension system has changed to meet all of these challenges it has retained basic characteristics particularly the tie between work contributions and benefits that fundamentally define its character and have enabled it to survive economic and political turmoil for over a century This book also demonstrates that the most serious challenge faced by the pension system has consistently been political intervention by leaders hoping to use it for purposes unrelated to its mission of providing the insured with secure and adequate retirement income **Handbook of the Life Course** Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14 This comprehensive handbook provides an overview of key theoretical perspectives concepts and methodological approaches that while applied to diverse phenomena are united in their general approach to the study of lives across age phases In surveying the wide terrain of life course studies with dual emphases on theory and empirical research this important reference work presents probative concepts and methods and identifies promising avenues for future research **The Future of Social Security for this Generation and the Next, Experiences of Other Countries** United States. Congress. House. Committee on Ways and Means. Subcommittee on Social Security, 1998 *Generations* Judith Burnett, 2016-04-15 *Generations* The Time Machine in Theory and Practice challenges the fragmented and diverse use of the concept of generation commonly found in the social sciences It approaches the concept in a manner that stretches the sociological imagination away from its orientation toward

the present by building the concept of the passage of time into our understanding of the social. It proposes an innovative and exciting view of the field of generations lifting it out from life course and cohort analysis and reconstituting the area with fresh and dynamic ways of seeing. With its unique intellectually innovative and sustained critical study of generational work, *Generations* will appeal to scholars across a range of social sciences and humanities and will be of particular interest to social theorists and anthropologists as well as sociologists of social history, consumption, identity and culture.

Pension Systems Birgit Mattil, 2006-01-11. Recently, policy debate and comparative research on old age pensions have focused on the financial sustainability of pension systems in the face of demographic change. This study, however, also takes into account distributional effects involved in pension system structures. Theoretical, institutional and empirical analyses are combined to form a comprehensive framework for evaluating financial sustainability and distributional effects of the pension systems implemented in Germany and the United Kingdom. Along with projections of demographic trends and future public pension expenditure, the empirical results on old age incomes and their distribution allow for identifying a number of reform options for each pension system to improve their financial or distributional results.

Ageing Matters John Doling, 2018-01-18. The implications of population ageing have long concerned politicians, policy makers and governmental and non-governmental organizations in the welfare states of Europe. However, an ageing workforce is increasingly a matter of concern for the developed and fast developing countries of Asia. Japan leads the field in this respect on account of the speed of its postwar economic development. But the little tigers of Hong Kong, Singapore, South Korea and Taiwan are poised to catch up and Malaysia, though in the second tier of developing Asian economies, faces the prospect of population ageing sufficient to daunt an as yet under-prepared infrastructure for old age support. This book is the first to examine in detail the experiences and prospects of population ageing in those Asian countries with the highest GDP per capita. The authors pose the question to what extent Asia and old Europe can learn from each other in terms of policy planning. The first section of the book sets out the field in terms of the demographic characteristics and policy predicaments of European and Asian countries. The second section presents case studies of six countries: Japan, Hong Kong, Singapore, South Korea, Taiwan and Malaysia.
