Pensions In A Changing Economy:

Pensions in a Changing Economy Richard V. Burkhauser, Dallas L. Salisbury, 1993 Special Study on Economic Change: Social security and pensions : programs of equity and security ... December 4, 1980 ,1980 **Pensions in the European Union: Adapting to Economic and Social Change** Gerard Hughes, Jim Stewart, 2012-12-06 The ageing financial and labour market challenges facing the old age pension systems of the member states of the European Union are well known Those who cast doubt on the ability of the present system of pension provision at least to the extent that it is pay as you go financed to cope with the problems posed by these challenges are getting more vociferous Increasingly there are calls for pay as you go systems to be cut back and for funded systems to be expanded This book contests the view that funding is the answer It shows how adaptable the largely pay as you go old age pension systems in the European Union are Actuaries economists lawyers political scientists pension advisers and sociologists from nine European countries and the United States consider four main themes population ageing competitiveness and retirement pension financing and economic growth adapting pension systems to meet change and decision making processes They argue that pay as you go financed old age pension systems in the European Union have the ability to successfully adapt to economic and social change provided they do not take on too many non insurance related risks Solving the problems of the labour market and controlling the direction and extent of economic development are beyond the powers of old age pension systems regardless of how they are structured or financed Separate budgets for separate risks is an indispensable principle if the complex processes of social protection are to be successfully managed monitored and made transparent There can be no single plan for the future development of old age pension systems which would be universally valid for all the countries of the European Union A single solution cannot take into account the special circumstances obtaining in every nation and since respect for the special features of national systems is the basis of popular acceptance the way forward is to reform existing systems in existing contexts **Nonfinancial Defined Contribution Pension Schemes in a Changing Pension World** Robert Holzmann, Edward Palmer, David Robalino, 2012-11-01 Nonfinancial Defined Contribution NDC schemes are now in their teens The new pension concept was born in the early 1990s implemented from the mid 1990s in Italy Latvia Poland and Sweden legislated most recently in Norway and Egypt and serves as inspiration for other reform countries This innovative unfunded individual account scheme created high hopes at a time when the world seemed to have been locked into a stalemate between piecemeal reforms of ailing traditional defined benefit schemes and introducing pre funded financial account schemes The experiences and conceptual issues of NDC in its childhood were reviewed in a prior anthology Holzmann and Palmer 2006 This new anthology published in 2 volumes serves to review its adolescence and with the aim of contributing to a successful adulthood Volume 1 on Progress Lessons Implementation includes a detailed analysis of the experience and the key policy lessons in the old and new pilot countries and the implementation of NDCs elements in other

reform countries This volume 2 on Gender Politics Financial Stability includes deeper and new analyses of these issues that found little or no attention in the 2006 publication The gender perspective includes 5 chapters with perhaps the most complete discussion on gender and pension issues available to date The financial stability perspective addresses in 6 chapters critical micro and macroeconomic aspects such as the balancing mechanism the use of a reserve fund the handling of legacy costs and technicalities related to the management of the longevity risk when designing annuities While the 2 volumes address many issues it also opens a number of new questions for which good answers are not yet readily available
